I. Foundations of the Assessment Process with the Developmentally Disabled

1. Developmental Patterns in Disabled Infants and Preschoolers	3
Theodore D. Wachs and Robert Sheehan	
Patterns of Development: The Visually Impaired	3
Cognitive Development	3
Social-Emotional-Interpersonal Development	5
Patterns of Development: The Deaf and Hard of Hearing	7
Cognitive Development	7
Social-Emotional-Interpersonal Development	8
Patterns of Development: The Motor-Impaired	10
Cognitive Development	10
Social-Emotional-Interpersonal Development	12
Patterns of Development: The Behaviorally and Emotionally Disturbed	14
Cognitive Development	14
Social-Emotional-Interpersonal Development	16
Patterns of Development: The Mentally Retarded	16
Cognitive Development	16
Social-Emotional-Interpersonal Development	18
Patterns of Development: The Multiply Handicapped	19
References	20
2. Essential Elements of the Assessment Process	25
Rune B. Simeonsson and Donald B. Bailey, Jr.	
The Role of Assessment in Early Intervention	25
Purpose of Assessment	26
Interpreting Assessment Information	26
Population and Definitional Variability in Assessment	29
Models for the Specification of Child Characteristics	30
Global Index	31
Multiaxial Classification	31

Profile of Functional Capacities	32
Summary of Models	33
Essential Elements of the Assessment Process	36
Specification of Child Variables	36
Specification of Intervention Variables	37
Specification of Outcome Variables	37
Summary	40
References	40
3. Instrument Selection	43
Nancy C. Hubert and Jan L. Wallander	
Practical Considerations	43
Psychometric Considerations	45
Basic Concepts	45
Application to Developmental Disabilities	47
Consideration of Assessment Objectives	48
Basic Concepts	49
Application to Developmental Disabilities	52
Conclusion	58
References	59
4. Clinical Considerations in the Assessment of Young Handicapped Children	61
Vaughan Stagg	
Assessment Dilemmas	61
Approaches to Assessment	63
A Child-Referenced Approach	63
Examiner, Instrument, and Procedural Adaptations	64
Types of Modifications	65
Theoretical Issues Guiding Modifications	66
Clinical Implications	67
Impact of Modifications	68
Summary	69
References	72
5. Involvement of Parents in Early Childhood Assessment	75
Robert Sheehan	
Reasons against Parental Involvement in Assessment	76
Reasons for Parental Involvement in Assessment	77
A Review of Empirical Studies	78
Explaining Parental Estimations of Children's Development	83
A Model for Parental Involvement in Assessment	85
Interest and Skill Level of Parents	86
Purpose of Assessment	86

Instruments Used for Assessment	87
Decision Rules for Involvement of Parents in Assessment	88
Summary	88
References	89

II. Cognitive Assessment

6. Assessment of Visually Impaired Infants and Preschool Children	93
Michael D. Orlansky	
Terminology	93
Sources of Interindividual and Intraindividual Differences	94
Causes of Visual Impairment	95
Prevalence and Nature of Visual Impairment in Children	96
Visually Impaired Children with Multiple Impairments	97
Effects of Impaired Vision on Development and Learning	97
General Principles in Assessment of Visually Impaired Children	99
Specific Concerns in the Assessment Process	100
Tests Used with Visually Impaired Infants and Preschool Children	100
Verbal Intelligence Tests	100
Performance Tests	101
Social Development	101
Comprehensive Assessment Procedures	102
Further Resources	103
References	103
7. Cognitive Assessment in Deaf Preschoolers	109
Robert J. Hoffmeister	
Definition of Major Terms	110
Two Perspectives on Deafness	110
How Perspectives Influence Outcomes	112
Implications of Differing Perspectives for Assessment	113
Child Language Capabilities and Task Performance	115
Nature of Communications Skills in the Deaf Population	115
Language Capabilities of the Examiner	117
Level of Cognitive versus Language Skills Necessary to Complete the Task	118
Background Influences on the Deaf Child	119
Testing Procedures with the Young Deaf Child	120
Cognitive Testing	120
Examples of Instruments	121
Factors Influencing Choice of Instruments	121
Behavior Rating Scales	122
Summary	123
References	124

8. Cognitive Assessment of Motorically Impaired Infants and Preschoolers	127
Cordelia Robinson and Nancy Fieber	
Introduction	127
Goals	127
Approaches to Assessment	128
Traditional Approaches to Assessment	128
Problems with Traditional Approaches	128
Violation of Assumptions in Traditional Assessment	130
An Alternative Approach to Assessment	133
Rationale for the Process Approach	133
The Process Approach	135
Developmental Framework for the Process Assessment	135
Strategies for Adaptation of Tasks	136
Clinical Examples of the Process Approach	137
Sensorimotor-Stage Examples	137
Case Example 1: Roger	139
Case Example 2: Amy	144
Preoperational-Stage Examples	148
Case Example 3: Robert	149
Case Example 4: Terri	150
Conclusion	151
References	159
9. Cognitive Assessment of Mentally Retarded Infants and Preschoolers	163
James V. Kahn	
Infant Tests	164
Screening Tests	164
Diagnostic Measures	166
Program Planning	170
An Experimental Approach	172
Preschool Tests	173
Screening Tests	173
Diagnostic Measures	174
Program Planning	177
Conclusions	178
References	179
10. Cognitive Assessment of Infants and Preschoolers with Severe Behavioral Disabilities	183
Sydney S. Zental	
Assessment of Cognitive Abilities	184
Ability Differences in Autism	184

Ability Differences in Hyperactivity	187
Conclusions	190
Measurement of Ability Differences	191
Assessment of Cognitive and Behavioral Style Differences	193
Style Differences in Autism	194
Style Differences in Hyperactivity	195
Measurement of Style Differences	197
Situational Variance in Assessment	200
Test Stimuli	201
Motivation and Reinforcement	202
Examiner and Context Familiarity	202
Conclusions	203
References	206
11. Cognitive Assessment of Multiply Handicapped Young Children	213
Carl J. Dunst and R. A. McWilliam	
A Developmental Model of Interactive Competencies	215
Levels of Interactive Competence	215
Types and Forms of Interaction	223
Contexts of Interactions	225
Assessment of Interactive Competencies	226
Methods of Eliciting Interactive Competencies	226
Modes of Interactions	227
Context of Interactions	228
The Assessment Process	228
From Assessment to Intervention	229
Summary	234
Appendix: The OBSERVE Record Form for Mapping a Child's Topography of Interactive Competencies	235
References	235
<i>III. Noncognitive Assessment</i>	
12. Motor Assessment	241
R. J. Gallagher and D. Cech	
Introduction	241
Normal Motor Development	242
Abnormal Development	243
Implications of Motor Impairment for Development	246
Motor Assessment: Issues of Concern	247
Psychometric Properties	247
Content	248
Administrative Criteria of Motor Assessment	249
Conclusion	252
References	253

13. Assessment of Temperament in Developmentally Disabled Infants and Preschoolers	255
Sean C. McDevitt	
Concepts of Temperament	255
Developmental Aspects of Temperament	257
Measurement Techniques and Problems	258
Measuring the Temperament of the Developmentally Disabled	259
Studies of the Temperament of the Developmentally Disabled	259
The Role of Temperament in the Assessment of Handicapped Children	261
Temperament and Intervention Strategies	262
References	264
14. Mastery Motivation and Developmental Delay	267
Lois M. Brockman, George A. Morgan, and Robert J. Harmon	
Introduction	267
What Is Mastery Motivation?	268
Historical Background	269
Mastery Motivation Assessment	270
The Structured Mastery-Task Situation	271
Parental Reports of Observed Mastery Behavior	274
A Global Rating of Goal-Directedness	276
Free-Play Situation	276
Interpretation and Use of Mastery Motivation Indicators in the Assessment of Children with Developmental Delay	278
Developmental Delay	279
Developmental Disability	279
Dysfunction Behavior	280
Parents' Responses to the Child's Play and Mastery Motivation	281
References	282
15. Assessment of Language in Developmentally Disabled Infants and Preschoolers	285
Lesley B. Olswang and Barbara A. Bain	
Introduction	285
Assumptions	285
Purpose	286
Data Collection	287
General Issues: Testing Variables	287
General Assessment Procedures	288
Specific Assessment Procedures	291
General Differences in Development between Normal and Developmentally Disabled Children	301

Data Organization	302
General Issues	302
Profiling	303
Data Interpretation	305
Discrepancy	305
Implications for Management	312
Summary	313
Appendix: Language Assessment Procedures	314
References	317
16. Environmental Assessment of Developmentally Disabled Infants and Preschoolers	321
Theodore D. Wachs	
Criteria for Choice of Procedures	323
Psychometric Considerations	323
Decision Theory and the Environmental Assessment Process	324
Representativeness of Environmental Assessments	325
Applicability to the Population	326
Summary	329
Procedures for Environmental Assessment	329
Clinical Interviews	329
Parent Questionnaires	331
Direct Observation	333
Conclusions	342
References	342
17. Biophysical Considerations in the Assessment of Young Children with a Developmental Disability	347
Diane Magyary, Kathryn Barnard, and Patricia Brandt	
Health Needs: Primary and Specialty	347
Primary Health Care	348
Primary-Care Components	348
Preventive Health Guidelines	350
Physiological and Anatomical Expressions of Disabilities	352
Evaluation Process	353
Health History	353
Physical and Neurological Examination	355
Genetic and Metabolic Screening	356
Common Physical-Health Problems and Responses	358
Feeding, Nutrition, and Growth	361
State Regulation Alterations	362
Activity Alterations and Safety Hazards	363
Hearing Alterations	364
Visual Alterations	365

Susceptibility to Infection and Illness	366
Summary	367
References	368
<i>IV. From Assessment to Intervention</i>	
18. Interface between Assessment and Intervention for Infants and Preschoolers with Disabilities	373
Kathleen Gradel	
Introduction	373
Utility of Criterion-Referenced Assessment Data in Developing Interventions	375
Administration of Standardized Test Items	375
Systematic Item Modification	377
Provision of Assistance on Items	378
Direct Assessment of Skills: Skill-Sequence-Based Assessment	380
Assessment Procedures	383
Interface between Skill Sequence Assessment and Intervention	385
Environmental Assessment	389
Assessment of Behaviors Needed in Transitions	389
Parental Input	390
Summary	392
References	393
19. Issues in the Linkage of Assessment to Intervention	397
Theodore D. Wachs and Robert Sheehan	
The Nature of Developmental Disabilities	397
The Selection of an Assessment Strategy	398
The Selection of Test Procedures	400
Why Is This Assessment Being Done?	401
The Selection of an Assessment Strategy	402
The Selection of Test Procedures	403
The Role of the Examiner	404
References	405
Author Index	407
Subject Index	417
