Series Preface	xi
Preface	xiii
Introduction	1
PART ONE: THE NATURE OF THE PROBLEM	7
The referral	7
1 Clinical assessment	9
Assessment	10
The American Psychiatric Association Classification System: DSM-III	11
Multivariate approaches	18
Continuities of behaviour	21
Life-span development	26
The family: a systems approach	31
The parent-child attachment system	35
2 The analysis of 'causes'	37
Learning by direct reinforcement	37
Learning by induction	39
Learning by observation (imitation)	40
Social learning	42
From theory to practice	42
Organismic variables	51
3 Applied social learning theory: Behaviour therapy/modification	61
The scientific status of behaviour therapy	61
Behaviour: Identifying target problems	63
The choice of procedures/techniques	67

PART TWO: TAKING A HISTORY: EARLY INFLUENCES ON BEHAVIOUR	71
4 Biological foundations of childhood problems	73
Genetic influences	73
Intellectual impairment	74
Interaction of heredity and environment	75
Genetic accidents	77
Physical growth	77
Physical anomalies	78
Perinatal influences	79
Prematurity	79
Birth trauma	81
Autonomic response patterns	82
5 Prenatal and early postnatal influences	85
Intrauterine influences	85
Postnatal influences	87
Mother-to-infant bonding	89
Child abuse and bonding	93
Father-to-infant bonding	94
Varieties of parenting	95
Styles of child rearing	96
Parent–infant relationships	97
Later parent–child relationships	98
Disruption of socialization	100
 PART THREE: PRESCHOOL CHILDREN	 101
Introduction	101
Prevalence rates of behaviour problems	101
The range of problems	102
Handicap	103
Developmental tasks	103
The stability of problem behaviour	104
Resilience	106
Assessment	108
 6 Problems associated with infancy (birth to approximately 18 months)	 109
Individual factors	109
Early learning	112
Core learning/teaching situations	112
Systemic factors: parent–child interactions	113
Assessment criteria of attachment	117

Child-to-parent attachment	119
Insecure behaviour in infants	120
Behavioural problems following disruption of attachments	121
Divorce/separation	121
Resilience and vulnerability	123
7 Problems associated with early childhood (the preschool period from 18 months to about 5 years)	125
The negativistic crisis	126
Non-compliance and temper tantrums	126
Conformity and imitation	127
The development of conscience	128
Over-controlled behaviour	129
Reality testing	130
Decentring	130
Parental pathology	131
Maternal depression	132
Parental rejection	132
Emotional abuse	133
Damage to the self-concept	133
8 Developmental disorders	135
Failure-to-thrive	136
Nocturnal enuresis	139
Bowel control and encopresis	144
Problems of communication	146
Stuttering	149
Developmental aphasia	150
9 Handicap in early childhood and beyond	153
Pervasive developmental disorders	153
Autism	154
Severe learning difficulties	159
Impairment of intellect	161
Parent training	163
10 Internalizing and externalizing problems of early childhood	167
Internalizing (emotional) problems	167
Children's anxiety disorders	167
School refusal	168
Psychological problems due to personality extremes	170
Neuroticism	172
Nightmares and night terrors	173
Separation anxiety and dependency	173
Externalizing (conduct) problems	177
Non-compliant oppositional behaviour	178
Rules	185

Commands	186
Daily routines and parent–child confrontations	186
PART FOUR: THE SCHOOL-GOING CHILD AND EARLY ADOLESCENT	189
Introduction	189
Life tasks	189
Middle childhood (5–11)	189
Rules and values at school	190
Early adolescence	192
Adolescence: fact and fiction	194
Parental attributions	197
11 Problems of middle childhood (from about 5 to 11 or 12 years of age)	199
Developing a new individuality	199
Problems in the classroom	200
Specific learning disabilities	201
Language and other communication problems	203
Motor-incoordination	203
Hyperactivity	204
Problems of attention	204
Perceptual difficulties	206
Specific learning difficulties (reading problems)	206
Intellectual difficulties	209
Sequelae of academic failure	209
Behaviour problems	209
12 Problems related to identity and the self-concept	211
Self-attitudes	211
Self-esteem	212
Adolescent identity	213
Depression	215
Suicide and attempted suicide	217
Sexual orientation and identity	219
Cross-gender behaviour	220
Sexual intercourse in adolescence	222
13 Health care problems of childhood	225
Health care psychology	225
Psychophysiological illness	228
PART FIVE: CLINICAL PSYCHOLOGY INTERVENTIONS	235
Provision of services	236
Mobilizing human resources	237
Counselling and giving advice	237

14	Psychological therapies	239
	Therapeutic goals	239
	Sources of therapeutic change	240
	The effectiveness of psychological therapies	241
	Varieties of treatment	242
	Family therapies	243
	Structural family therapy	245
	Behavioural family therapy	248
	Family-style residential homes	252
15	Parent and child skills training	255
	Components of parent training	255
	Effectiveness	259
	The maintenance of change (generalization)	259
	Life skills training	260
	Behavioural marital work	262
PART SIX: FIVE MAJOR CLINICAL PROBLEMS OF CHILDHOOD AND EARLY ADOLESCENCE		265
16	Antisocial, disruptive behaviour disorders	267
	Defining disruptive behaviour	267
	Developmental-behavioural assessment	268
	Oppositional defiant disorder	269
	Conduct disorders	270
	Delinquent behaviour	271
	Aggression	281
	Attention-deficit hyperactivity disorder	288
	Summary	292
17	Cognitive behaviour modification with delinquents	
	<i>Clive R. Hollin</i>	293
	Clinical approaches to criminal behaviour	293
	Cognitive behaviour modification	294
	Delinquency	295
	Cognition and crime	295
	Cognitive behavioural programmes	298
	Multimodal programmes	301
	Outcome: A critical review	303
	Maximizing success: minimizing failure	306
	Summary	307
18	Fears and phobias of childhood	
	<i>Thomas H. Ollendick and Neville J. King</i>	309
	Developmental-behavioural assessment	312

	Treatment	320
	Summary	328
19	Acute pain in childhood	
	Chrissi Ioannou	331
	Introduction	331
	The nature of pain	331
	Assessment	332
	Psychological intervention	339
	Summary and future directions	347
20	Work with children following disasters	
	William Yule	349
	Summary	349
	Introduction	349
	Some disasters involving children	350
	Common stress reactions in children	356
	Individual differences	358
	Treatment	359
	Discussion	362
	Appendix I Recording and assessment	365
	Appendix II Interviewing children and parents	373
	Appendix III Race, gender and creed in clinical child psychology	379
	References	381
	Index	431
