Preface	xv
Acknowledgements	xvi
PART ONE DECISIONS AND MANAGEMENT	1
CHAPTER 1 DECISION MAKING IN MANAGEMENT	3
Good and Bad Decisions	3
The Process of Decision Making	4
Decision Making or Problem Solving?	4
Steps in the Decision Making/Problem Solving Process	5
An Example of a Problem Solving/Decision Making Process	8
Recycling in the Decision Making Process	10
The Elements of a Decision	11
The Decision Body	12
The Decision Options	13
Uncontrollable Factors	14
Consequences	15
Managers and Decision Making	16
What is a Manager?	17
What do Managers Do?	18
The Range of Managerial Work Roles	19
Specialisation and Managerial Activity	21
Management Level	22
Managerial Activity and Discretion	23
The Place of Decision Making in Management	25
Time Spent in Making Decisions	25
Summary	27
Bibliography	28
CHAPTER 2 THE CONTENT AND CONTEXT OF MANAGEMENT DECISIONS	29
Types of Management Decision	29
Strategic and Operational Decisions	30
Unstructured and Structured Decisions	32
Dependent and Independent Decisions	33
Decision Types and Decision Elements	36
The Decision Environment	36
Core and Boundary Decisions	36

Functional Area and Boundary Decisions	37
The Decision Environment	38
“Environment” Defined	39
The Specific Environment	39
The General Environment	40
Complexity, Change and Perceived Uncertainty	41
The Extent of Information Available	42
The Time Available	43
The Decision Stimulus	43
The Approach to Decision Making	44
Boundary Discretion	45
Treatment Discretion	45
Summary	46
Case Exercise	47
Bibliography	51
PART TWO THE DECISION MAKERS	53
CHAPTER 3 INDIVIDUAL DECISION BEHAVIOUR	55
Rational and Non-rational Behaviour	55
Perception and the Decision Process	57
Selective Perception	58
Organisation of Perception	59
Categorising	59
Stereotyping	60
Set or Expectancy	60
Values and Value Systems	61
The Construction of Value Systems	61
Attitudes and Values	62
Managerial Values	64
Values and the Decision Process	66
Decision Behaviour Under Uncertainty	69
Assessment of Probability	69
Acceptance of Risk	71
Propensity for Risk	72
The Individual Decision Maker in a Social Context	74
Social Needs as Motivators	74
Significant Others	76
Summary	76
Case Exercises	77
Bibliography	78
CHAPTER 4 DECISIONS IN GROUPS	79
Work Groups and Decision Making	79
Understanding Work Group Behaviour	80
The Harvard Model	80
The Importance of Emergent Internal System Behaviour	83
Group Influences on Individual Behaviour	83
Ambient Stimuli	84
Discretionary Stimuli	85
The Importance of Both Ambient and Discretionary Stimuli	87
The Dysfunctional Consequences of Group Pressure	87

The Creation of "Norms" of Behaviour	88
Non-compliance	88
Group Processes and Decision Making	90
Productivity	90
Satisfaction	91
Individual Development	92
The Move to Group-acceptable Decisions	93
Decisions Made by Groups	94
Group Process and Decision Success	94
The Quality of Group Decisions	94
The Speed of Decision Making	95
Commitment	96
Group Decisions and Risk Taking	96
Management Style and Decision Effectiveness	98
Deciding on Style	98
The Advantages of Group Decision Making	101
The Built-in Advantages	102
The Potential Advantages	102
Summary	103
Case Exercise	104
Bibliography	104
CHAPTER 5 DECISIONS WITHIN THE ORGANISATION	105
The Concept of Climate	105
The Dimensions of Organisation Climate	107
Autonomy	107
The Degree of Imposed Structure	108
Orientation of Rewards	109
Degree of Consideration and Support for the Individual	111
The Interaction of Climate Dimensions	111
Managing Organisation Climate	112
Organisational Climate and the Wider Society	113
The Ethics of the Organisation	114
Social Responsibility in Decision Making	114
Ethics and the Decision Maker	116
Organisation Structure and Decision Making	116
Information Flow and Structure	117
Location	117
Direction of Communications	117
Time Differences and Shift Working	119
Status Differences	119
Communication Networks	119
Differences between Networks	121
Other Findings Relating to Decision Making	122
The Development of Open Channel Networks	123
Organisational Growth and Specialisation of Function	123
Inter-group Conflict	124
The Exercise	125
The Results	125
The Consequences of Intergroup Conflict	126
Summary	128
Case Exercise	129
Bibliography	130

PART THREE	DECISION MODELLING	133
CHAPTER 6	MODELLING	135
Verbal Descriptive Models		135
Analogue Models		136
Relationship Models		137
The Uses of Modelling		138
The Process of Modelling		139
Classifying Variables in a Decision Model		140
Cause–Effect Diagrams		142
Mathematical Models		144
Operational Research		145
Heuristic Models		149
Simulation Modelling		156
Corporate Modelling		160
Example of Corporate Modelling		162
Model Classification		165
The Two Key Dimensions		168
Summary		169
Case Exercise		170
Bibliography		171
CHAPTER 7	MODELLING UNCERTAINTY	173
Certainty, Uncertainty and Risk		173
Incorporating Uncertainty		174
Quantifying Uncertainty		175
Types of Probability		176
Discreet and Continuous Probabilities		177
Cumulative Probability Distributions		178
Manipulating Probabilities		181
Bayes Law		184
Example		184
The Decision Matrix		188
Example		189
The Optimistic Decision Rule		190
The Pessimistic Decision Rule		191
The Regret Decision Rule		191
Inconsistency in the Regret Rule		192
Expected Value Decision Rule		193
Decision Trees		195
Example – The Metropole-Royal		196
The Outcome Balance		201
Some Problems with the Analysis		201
Risk Simulation		205
Example		206
Comparing the Results		207
Summary		209
Case Exercise		210
Bibliography		212
CHAPTER 8	MODELLING PREFERENCE	213
Modelling Single Attribute Preference		214
The Utility of Money		214
Drawing the Utility Function		215

Some Utility Functions	220	
The Underlying Axioms of Utility Theory	221	
Expected Utility vs. Expected Monetary Value	222	
Analysis Using Monetary Values	224	
Analysis Using Utility Values	225	
Modelling Multi-attribute Preference	226	
The Three Modelling Conditions	226	
Overall Preference Methods	227	
Multi-attribute Utility	227	
Weighted Scoring	229	
Vector Methods	231	
Ideal Profile Method	232	
Ratio Comparison	232	
Modelling Separate Preference	234	
Simple Elimination	234	
Complex Elimination Method	236	
Summary	237	
Case Exercise	238	
Bibliography	240	
PART FOUR	DECISION PRACTICE	241
CHAPTER 9	DECISION OBJECTIVES	243
Whose Objectives?	244	
The Characteristics of Decision Objectives	244	
Strategic and Operational Objectives	244	
Multiple Objectives	250	
Implicit and Explicit Objectives	252	
Efficiency and Effectiveness	253	
Changing Objectives	254	
Intrinsic and Extrinsic Objectives	255	
Setting Decision Objectives	258	
Objectives Should be Clear	258	
Objectives Should be Consistent	259	
Objectives Should be Agreed	260	
Formalisation of Objectives	260	
Summary	261	
Case Exercise	262	
Bibliography	264	
CHAPTER 10	ORGANISING FOR DECISION	265
Deciding to Decide	265	
The Processes	266	
The Key Role of Information	266	
Establishing Sources of Information	268	
Information Needs in Stable Conditions	268	
Information Needs in Conditions of Uncertainty	269	
Establishing the Decision Point	270	
Choice of Management Style	272	
Using the Dimensions	274	
Other Deciding Factors	274	
The Need to be Flexible	276	
Problems in the Situational Approach	276	

The Effective Decision Group	277	
The Flexible Role Structure	279	
Organising for an Effective Team	279	
Development of Content Capability	280	
Task Process Skills	280	
Maintenance Process Skills	281	
The Characteristics of an Effective Team	282	
Recruiting for the Decision Making Group	284	
Personality Characteristics as Key Variables	284	
The Team Types	285	
Summary	286	
Case Exercise	288	
Bibliography	289	
CHAPTER 11 CREATIVITY IN DECISION MAKING		291
Creativity as a Widespread Activity	291	
Creativity and Decision Making	292	
The Generation of Alternative Solutions	293	
Blocks to Creativity in Organisational Decision Making	293	
The Blocks	294	
The Creative Individual	296	
The Creative Organisation	298	
The Link Between the Individual and the Organisation	300	
Recruitment or Development	300	
The Creative Management Strategy	302	
The Development of Appropriate Control and Reward Systems	303	
The Development of a Supportive Personal Style	304	
The Manager and Creativity	306	
Management as a Creative Activity	309	
Techniques for Developing Creativity	310	
Basic Rules for Creativity Techniques	310	
Conditions which Aid Creativity	311	
The Techniques	312	
Forced Relationship Techniques	314	
Individual and Group Techniques	314	
Reliance on Techniques	314	
Summary	315	
Case Exercises	315	
Bibliography	317	
CHAPTER 12 INFORMATION FOR DECISION SUPPORT		319
What is Information?	319	
The Characteristics of Information	319	
The Quantification and Measurement of Information	321	
To Quantify or not to Quantify?	321	
Scales of Measurement	323	
Choosing Performance Measures	324	
Cost and Value of Information	326	
An Example – Wallingford Foods Limited	330	
How Will the Probabilities Change?	331	
The Value of the Information	332	
The Value of Perfect Information	335	

Computerised Information Support	335
Management Information Systems	336
Decision Support Systems	338
When are DSS Useful?	340
Summary	341
Case Exercise	342
Bibliography	344
CHAPTER 13 EVALUATION	345
Factors to be Evaluated	345
Evaluating Resource Requirements	346
Skills Requirements	346
Capacity Requirements	347
Financial Requirements	348
The Degree of Change in Resource Requirements	350
Evaluating Degree of Fit	350
Financial Evaluation	352
Acquisition and Opportunity Costs	352
Fixed and Variable Costs	353
Average and Marginal Costs	354
Direct and Indirect Costs	355
The Life-cycle Cost	355
The Time Value of Money – Net Present Value	357
The Benefit–Cost Ratio	359
The Internal Rate of Return	361
The Payback Period	362
Comparison of Financial Criteria	362
Evaluating Risk	362
The Portfolio Approach to Risk	365
Evaluating the Effect on Future Flexibility	367
Summary	369
Case Exercise	370
Bibliography	372
CHAPTER 14 USING EVALUATION MODELS	373
When Can Decision Models Help?	374
The Assumptions in Modelling	376
Successful Decision Modelling	377
The Conditions for Successful Modelling	378
Factors Concerned with the Organisational Setting	379
Factors Concerned with the Modelling Process	381
Factors Affecting the Final Decision Model	382
Open Modelling	382
The Role of Decision Models	384
Using Predictive Models	385
Forecasting Models and Techniques	386
Time Series	388
Regression Models	388
Econometric Models	388
Individual Expert Judgement	389
Delphi Group Forecasts	390
The Performance of Forecasting Models	390

Summary	392	
Case Exercise	393	
Bibliography	394	
CHAPTER 15 CHOICE	395	
Comparison Against Reference Standards		396
Historical Standards	396	
External Standards	397	
Independent Standards	397	
The Do Nothing Standard	398	
Which Standard?	399	
Feasibility and Acceptability	400	
The Degree of Consensus Within the Decision Body		402
The Choice Process	403	
Choice by Computation	404	
Choice by Judgement	404	
Choice by Compromise	406	
Choice by Inspiration	408	
A Check-list for Decision Makers	408	
Objectives of the Decision	409	
The Decision Body	409	
The Decision Options	410	
Information	410	
The Decision Model	411	
Evaluation	411	
Determining Preference	412	
Summary	412	
APPENDIX	414	
INDEX	415
