TABLE OF CONTENTS

Introduction to the Series v

Preface vii

Introduction 1

1. Circuit Description
   G.L.J.M. JANSSEN 5

2. Formulation of Circuit Equations
   K. SINGHAL, J. VLACH 45

3. CAD Models for Devices

   3.1 Current Modeling for MOSFET
   H.I. HANAFI 71

   3.2 Capacitance Modeling for MOSFET
   P. YANG 107

   3.3 Bipolar Transistor Models for CAD
   F.Y. CHANG 131

   3.4 GaAs FET Models
   M. SHUR 155

   3.5 Computer-Simulation Models for Digital Josephson Devices and Circuits
   J. JÄCKEL, W. BÄCHTOLD 179

4. Solution of a Set of Nonlinear Algebraic Equations for General Purpose CAD Programs
   D.A. ZEIN 207

5. Integration Methods for the Solution of Circuit Equations
   W. LINIGER, F. ODEH, A. RUEHLI 235

6. Sparse Matrix Techniques
K.S. KUNDERT 281
