I INTRODUCTION

1 The Development of Deaf Children: An Overview of Issues	3
LYNN S. LIBEN	
Introduction	3
Individual Differences in Deafness	3
Family Environments	5
Linguistic Environments	6
Educational Environments	13
Summary	18
References	18
2 The “Natural History” of a Research Project: An Illustration of Methodological Issues in Research with Deaf Children	21
KATHRYN P. MEADOW	
Criteria and Procedures for Recruitment of Subjects	22
Selection of Matching or Comparison Groups	31
Other Potential Variables for the Selection of Subjects	33
Summary and Conclusions	38
References	38

II LINGUISTIC ISSUES

3	Structural Properties of American Sign Language URSULA BELLUGI AND EDWARD S. KLIMA	43
	Basic Issues in the Study of Sign Language	45
	On Pantomime and Signs	48
	Historical Change in American Sign Language	51
	On the Internal Structure of Signs: Evidence from the Experimental Study of Short-Term Memory	53
	Slips of the Hand	60
	Grammatical Processes	61
	Summary	67
	References	67
4	The Acquisition of Signed and Spoken Language HILDE S. SCHLESINGER	69
	Traditional Transmission of Ameslan: Deaf Children of Deaf Parents	70
	Connie's Children	71
	The Process of Learning Bimodal Language	71
	First Signs	73
	Word-Sign Order	74
	End of Words-Signs	75
	Perceptual Salience and Other Morphemes	82
	Summary	84
	References	84
5	Some Speculations Concerning Deafness and Learning To Read PENELOPE H. BROOKS	87
	Locus of the Problem	88
	Cognitive Factors	89
	Some Aspects of Linguistic Structure Relevant to Reading	90
	A Prospectus for One Stage in Reading Development	93

Summary	99
References	99
6 Future Prospects in Language and Communication for the Congenitally Deaf	103
GEORGE SPERLING	
The Early Acquisition of Language	104
An Ideal Written Language	107
Cross-Modality Transformation Rules and Supplementary Communication Devices	111
Summary and Conclusions	113
References	114
7 On The Role of Vision in Language Acquisition by Deaf Children	115
R. S. NICKERSON	
Vision as a Channel for Language Acquisition	117
Manual Signing	120
The Visual Representation of Speech	122
Reading	125
References	132
III SOCIAL DEVELOPMENT	
8 Impulse Control in Deaf Children: Research and Clinical Issues	137
ROBERT I. HARRIS	
Research on Impulse Control in Deaf Children: A Review	141
Etiology of Poor Impulse Control in Deaf People: Theoretical Alternatives	143
Parental Hearing Status: Implications for Impulse Control	145
Implications for Intervention	151
References	152

9	The Effects of Deafness on Childhood Development: An Eriksonian Perspective	157
	HILDE S. SCHLESINGER	
	Infancy: The Development of Trust	158
	Early Childhood: Autonomy versus Shame and Doubt	161
	Later Childhood: Initiative versus Guilt	166
	Summary	167
	References	167
 IV EDUCATIONAL AND CULTURAL CONTEXTS 		
10	Current Research and Theory with the Deaf: Educational Implications	173
	DONALD F. MOORES	
	The Research to Application Process	174
	Contributions of Ethology	176
	Relationship of Thought, Language, and Deafness	179
	Manual Communication, Sign Language, and Total Communication	185
	Summary	189
	References	190
11	Developmental Perspectives on the Experiential Deficiencies of Deaf Children	195
	LYNN S. LIBEN	
	A Piagetian Perspective on Experiential Deficiencies	197
	The Deaf Child's Environment	198
	Summary and Conclusions	210
	References	211
12	The Development of the Deaf Individual and the Deaf Community	217
	ADRIENNE E. HARRIS	
	Institutional Control	220
	Family Dynamics and Social Interaction	223

Individual Functioning	225
Conclusion	229
References	230
