A.	Foreword	1
B.	Acknowledgements	3
C.	Terms of reference	4
D.	Summary and conclusions	5
E.	Recommendations	13
F.	Types of computer information service	17
G.	Historical background	19
	Plan of work and work undertaken	20
	Resources available and required	21
	University Conference	23
	Developments, January - November 1977	24
H.	Evaluation plans	27
I.	The sample	31
J.	Retrospective on-line searches	35
	Facilities offered and data collected	35
	The users of the service	36
	Characteristics of the searches	37
	Use of data bases	41
	Use made of the references obtained	43
	Effects of the travelling workshop	44
	The costs of retrospective search	49
	Developments during 1977	50
K.	User comments on retrospective search	55
	Advantages of computer information search: (1) Time saving, (2) Literature coverage, (3) Browsing, interdisciplinarity, flexibility, (4) Relevance	56
	Comparison with other search methods	57
	Uses and effects	58
	Some disadvantages: (1) Choice of keywords, (2) Time span, (3) Foreign references	59
	User and system: (1) The intermediary, (2) User training	61
	Cost and charging	62
	Suggestions for the future	64
