Contents

Preface *vii*

Introduction by Hugo F. Sonnenschein *1*

1 An Equilibrium Existence Theorem without Complete or Transitive Preferences *15*
Journal of Mathematical Economics

2 A Model of Equilibrium with Differentiated Commodities *27*
Journal of Mathematical Economics

3 On the Equilibrium Price Set of an Exchange Economy *62*
Journal of Mathematical Economics

4 Efficiency and Decentralization in the Pure Theory of Public Goods *73*
Quarterly Journal of Economics

5 The Price Equilibrium Existence Problem in Topological Vector Lattices *90*
Econometrica

6 Real Indeterminacy with Financial Assets (with John Geanakoplos) *110*
Journal of Economic Theory

7 Potential, Value, and Consistency (with Sergiu Hart) *129*
Econometrica

8 An Equivalence Theorem for a Bargaining Set *161*

Journal of Mathematical Economics

9 A Simple Adaptive Procedure Leading to Correlated Equilibrium (with Sergiu Hart) *174*

Econometrica

10 Uncoupled Dynamics Do Not Lead to Nash Equilibrium (with Sergiu Hart) *205*

American Economic Review

Appendix A: Rhyme and Reason *217*

Appendix B: List of Scientific Publications *225*
