

## Contents

**Preface** XVII

**List of Contributors** XIX

**Abbreviations** XXVII

### **Part I**      **Molecular Switching** 1

#### **1**      **Multifunctional Diarylethenes** 3

*C. Chad Warford, Vincent Lemieux, and Neil R. Branda*

##### 1.1 Introduction 3

##### 1.2 Electrochemical Ring-Closing and Ring-Opening of DTEs 4

##### 1.2.1 Electrochemical Behaviour of DTEs 4

##### 1.2.2 Fully Functional Photo- and Electrochromic DTEs 14

##### 1.3 Using Dithienylethenes to Modulate How Chemicals React or Interact with Others 14

##### 1.3.1 Control of Chemical Behaviour through Photoswitching 14

##### 1.3.2 Controlling Molecular Interactions and Reactions Using the Steric Differences in the DTE Photoisomers 16

##### 1.3.3 Controlling Molecular Reactions and Interactions Using the Electronic Differences in the DTE Photoisomers 19

##### 1.3.4 A Specific Approach to Using the Changes in Location of $\pi$ -Bonds to Control Reactivity 21

##### 1.4 Gated Photochromism 24

##### 1.4.1 'Gated' Photochromism Based on Steric Effects 24

##### 1.4.2 Intramolecular 'Gating' 25

##### 1.4.3 Intermolecular 'Gating' 25

##### 1.4.4 Gating Based on Electronic Effects 27

##### 1.5 Reactivity-Gated Photochromism Using the Functional Group Effect 31

##### 1.6 Conclusion 32

##### References 32
