

Table of Contents

FOREWORD by Alan Rogerson	v
Adenegan, Kehinde Emmanuel Mathematics Drama and Ethno-Mathematics.....	1
Galit Ashkenazi-Golan & Vered Gabai Teaching about Angles and Triangles for 3rd Grade Students Using Origami	11
Pam Austin & Julie Hechter Posing Fraction Problem Scenarios: A Comparative Study of Pre- Service Teachers and Grade Five Learners.....	19
Mike Bedwell Statistics and Literary Criticism.....	27
Andy Begg School mathematics: why, what, and how?.....	29
Carol Bier Geometry: Drawing from the Islamic Tradition	41
Esther Billings & Lisa Kasmer Facilitating Positive Student-Faculty Relationships in Mathematics Education Courses	49
Larry G. Blaine Benford's Law in the Classroom and the Courtroom.....	57
Julie A. Bradley & Robert F. Cunningham Using Tableaus and Teacher Moves to Increase Student Discourse and Understanding	61
Gail Burrill Building Concepts: Expressions and Equations and Beginning Algebra.....	69
Benedetto Di Paola & Giovanni Giuseppe Nicosia Cultural diversity: how can it increases the complexity of teaching mathematics in multicultural class? The case of Chinese students ..	77

Wolfram Eid	
Communication in Mathematics Lessons	85
Clyde Felix	
Narratives of micro-politics obstructing the professional development of mathematics teachers.....	95
Daniela Ferrarello, Maria Flavia Mammana & Mario Pennisi	
From Research to Classroom: Proposals.....	105
Sonica Froneman & Trudie Benadé	
An analysis of the views of mathematics of first-year students from an outcomes-based curriculum.....	117
Talya Gilat & Miriam Amit	
Evaluating Students' Mathematical Creative Thinking Involved in Modeling Process	123
Barbara Graves	
We have no idea how capable children are: A multimodal analysis of children's mathematical reasoning	131
Majid Haghverdi & Maryam Gholami	
A Study of the Effect of using "What if Not" Strategy in Posing Geometry Problems	137
Bradford Hansen-Smith	
Units and Unity	143
Gary A. Harris	
Mathematical Habits of Mind: Fostering or Impeding	151
Hodaya (Liora) Hoch & Miriam Amit	
Knowledge of Assessment and its Implications.....	155
Elena Iurchenko	
How to increase the interest of studying maths.....	163
Colin Jackson	
All-attainment teaching in one English secondary school: a challenge in a challenging school?	165
Arne Jakobsen & C. Miguel Ribeiro	
Lesson Study as a Tool in Field Practice for Prospective Mathematics Teachers' Training.....	177

Murad Jurdak	
Border Crossing Between Problem Solving in School Mathematics and Real World through Modeling and Narrative.....	183
Gibbs Y. Kanyongo & James B. Schreiber	
A Structural Equation Model Explaining 6th Grade Mathematics Achievement Using SACMEQ III Data.....	189
Jay Kappraff	
The Logarithmic Spiral in Geometry, Nature, Architecture, Design, and Music.....	199
Axel Kilian	
Example of a Self-Contained e-Lecture.....	211
Nancy Leveille, Judith Quander, Tim Redl, Karen Orta, Karen Carlton & Jacqueline Sack	
Developing Research Practitioners: Senior Projects for Pre-service Teachers.....	213
Genoveva Levi, Eduardo Ramos & José Antonio Carillo	
Mathematical competence assessment: comparison of student answers facing different styles of formulating the examination questions.....	219
Cheryl A. Lubinski & Albert D. Otto	
Developing a Mathematics Course for Pre-service Teachers: A Futuristic Approach	225
Elsa Medina & Amélie Schinck-Mikel	
Math Academy: A model for reaching out to underrepresented students in STEM fields	233
Petra Menz, Cindy Xin & Jing Li	
Design of Online Metacognitive Activity in a Post-Secondary Mathematics-for-Teachers Course	237
Lloyd Munroe	
The Open Approach in Lesson Study- Enhancing Teachers' Knowledge of Teaching Division of Fractions.....	247
Aya Naito & Ryosuke Nagaoka	
Innovation Possible? New problems on secondary level education of elementary geometry – Japanese experience.....	255

Margaret L. Niess	
Transforming Teachers' Technological Pedagogical Content Knowledge for Teaching Mathematics with Technology through Online Professional Development	259
Hercules D. Nieuwoudt	
Collaborating towards teaching proficiency in Mathematics: Connecting some dots - A South African perspective	269
Mehryar Nooriafshar	
A Workshop on the Use of an Interactive Multimedia Environment for Learning the Basics of Network Diagram Construction in Project Management.....	275
Samuel Olu Olagunju	
Relationship between the volumes of a conical frustrum and a square frustrum.....	279
Catherine Paolucci	
Outreach in mathematics teacher education: Developing future educators through experiences outside of the classroom	289
Maria Piccione	
A "Factory of triangles" in a multicultural class	295
Mariana Plotz	
Mathematics teachers that can prepare learners for the transition to real-life and tertiary mathematics.....	301
Ildikó-Anna Pomuczné Nagy	
GEOMATECH - supported by modern software GeoGebra, the Revised National Curriculum fitting mathematical and scientific development of teaching material and training of trainers – in Hungary.....	307
Yelena Portnov-Neeman & Miriam Amit	
Using an Explicit Teaching Approach to Develop Strategic Spirit – The Case of the Working Backwards Strategy.....	309
Roland Pourdavood	
Access and Equity in Mathematics Education.....	317
Hilary Povey	
The teaching of mathematics in undergraduate (UG) secondary initial teacher education (ITE): some students' responses to enquiry based pedagogy with transformative intentions.....	327

Mark Prendergast & Niamh O'Meara	
Investigating the Time allocated to Teaching Mathematics in Irish Second Level Schools	339
Shagufta Raja, David K. Pugalee & Alisa Wickliff	
How Teacher Knowledge and Perceptions in Representations of Linear Functions Translate into Their Classroom Teaching	349
Shiori Saito & Ryosuke Nagaoka	
Analysis of the role of learning of equation in the formation and structure of the general mathematical view in Japan – A strategy to reconstruct of mathematics education	359
S.R. Santhanam	
The Pedagogical Aspects of Teaching Prime Numbers to Gifted Children – A classroom Experience	365
William R. Speer	
Fundamental Concepts of Linear Equations and Slope Explored via Simple Technology	373
Martin Stein	
Nudge and the Concept of Mathematical Learning Spaces as Learning Environments for Problem Classes	375
Bruce Warren Stephens & Kerry Ann Dickson	
Statistics Education in a Connected World – Back to the Future? ..	385
John M. Stockie	
Engaging undergraduate students in a modeling course on the mathematics of (mostly Olympic) sport	387
Christine Suurtamm	
Developing Leadership: Engaging School Principals in Mathematics Teaching and Learning	395
Allan Tarp	
Count in Icons before Tens, then Add NextTo before OnTop	403
Páraic Treacy & Fiona Faulkner	
Analysing the effects of the introduction of the new Project Maths syllabus on beginning undergraduates' performance of basic mathematical skills in Ireland	409

Ariana-Stanca Văcărețu	
An approach to assessing students' competences developed through math research.....	421
Natalya Vinogradova	
Visualizing Algebra	431
Chuang Wang & David K. Pugalee	
Relationship between Formative and Summative Assessments for Elementary School Students	435
Alisa Wickliff, David K. Pugalee & Shagufta Raja	
The E and M in STEM Education: Considering Opportunities to Integrate Engineering and Mathematics	441
David Womack	
Mathematics 'sans frontiers': An experimental notation to teach mathematical operations.....	449
Andrew Wrigley	
Mathemagical Marvels to Liven up Lessons.....	457
Evgeny Yurchenko	
Some problems of retraining teachers.....	461
