Introduction	1
<hr/>	
Part I	A constructive critique of common modeling practice 11
<hr/>	
1	Models and modeling 13
1.1	The fallacies of the instrumental-positive standard 14
1.2	Introducing the pragmatic account 23
1.3	A closer look at representation 26
1.4	Completing the pragmatic account 35
	Conclusion 42
2	The use of mathematics in theoretical modeling 44
2.1	Mathematical modeling: a four-part process 46
2.2	Mathematical models as metaphors 52
2.3	The presuppositions of mathematical modeling 60
	Conclusion 67
3	The use of mathematics in empirical modeling 69
3.1	Introducing empirical modeling 70
3.2	The analysis extended 79
3.3	Empirical modeling exercises using actively generated data 88
	Conclusion 92
<hr/>	
Part II	The critique applied 93
<hr/>	
4	The New, New Institutional Economics 95
4.1	Introducing NNIE 97

4.2	An analysis of NNIE methodology	99
4.3	NNIE and the denaturing of institutions	114
	Conclusion	116
	Appendix 4.1 The formal model of Acemoglu and Robinson (2006)	117
	Appendix 4.2 Supplementary information for solution phase statements of Acemoglu and Robinson (2006) and Glaeser and Shleifer (2003)	118
5	The financial crisis and economics	119
5.1	Macroeconomics, dynamic stochastic general equilibrium models, and the financial crisis	120
5.2	The financial crisis: What was known? What was knowable?	127
5.3	The post-crisis reform debate	132
	Conclusion	141
<hr/> Part III A reform proposal		143
6	Why reform?	145
6.1	The problem	145
6.2	Why reform is necessary	149
	Conclusion	163
7	A reform proposal	165
7.1	Hermeneutics and social categories of meaning	166
7.2	A new field of economics	173
7.3	Ways forward	191
	Conclusion	193
	Appendix 7.1 State Budget Officer Questionnaire from Marglin and Spiegler (2014)	194
	Conclusion	195
