

Contents

Foreword vii

PART ONE | INTRODUCTION

1. Epidemiology of Cerebrovascular Disease and Stroke 3

PART TWO | GENETIC RISK FACTORS

- 2. Introduction to Genetic Risk Factors for Cerebrovascular Disease 21
- 3. Monogenic Diseases Causing Cerebrovascular Disease and Stroke 25
- 4. Heritability of Ischemic Stroke and Intracerebral Hemorrhage 64
- 5. Genetic Determinants of Ischemic Stroke 75
- 6. Genetic Risk Factors of Intracerebral Hemorrhage 85
- 7. Relevance for Stroke of Genes Associated with Other Vascular Phenotypes 99
- 8. Genes Associated with Rare Subtypes of Stroke: Cervical Artery Dissection 114
- 9. Genes Associated with Rare Subtypes of Stroke: Cerebral Venous Thrombosis 125
- 10. Genetic Risk Factors for MRI Markers of Cerebral Small-Vessel Disease 133

PART THREE | ENVIRONMENTAL RISK FACTORS

- 11. Introduction to Environmental Risk Factors for Cerebrovascular Disease 153
- 12. Hypertension: The Major Risk Factor for Stroke 155
- 13. Dyslipidemia and Risk of Stroke and Cerebrovascular Disease 180
- 14. Metabolic Dysfunction as a Risk Factor for Stroke: Obesity, Metabolic Syndrome, and Diabetes Mellitus 222
- 15. Lifestyle Factors and the Risk of Stroke 240
- 16. Risk Factors of Stroke Specific to Young Adults 252
- 17. Sex-Specific Risk Factors for Stroke in Women 268

vi Contents

18. Migraine and Risk of Cerebrovascular Disease and Stroke 284

19. Ethnic, Racial, and Geographic Variations in Stroke Risk, and Risk Factors
Associated with Stroke 311

PART FOUR | INTEGRATIVE APPROACH

20. Carotid Disease as an Intermediate Marker of Stroke Risk 329

21. Magnetic Resonance Imaging-Based Markers of Cerebrovascular Disease
and the Risk of Stroke 347

22. Circulating Biomarkers and the Risk of Cerebrovascular Disease and Stroke 405

23. Secular Trends in Stroke Risk and Risk Factors for Stroke 435

EPILOGUE/SYNTHESIS 453
