Contents

Preface *page* xiii

1 Mathematical Preliminaries 1
- 1.1 Basic definitions and notational conventions 1
  - 1.1.1 Relations 1
  - 1.1.2 Partially ordered sets 2
  - 1.1.3 Euclidean spaces 2
- 1.2 Preference and utility 3
  - 1.2.1 Properties of preferences 3
  - 1.2.2 Utility 4
- 1.3 Order pairs, acyclicity, and extension theorems 5
- 1.4 Cyclic monotonicity 9
- 1.5 Theorem of the Alternative 12
- 1.6 Chapter references 13

2 Classical Abstract Choice Theory 15
- 2.1 Strong rationalization 16
  - 2.1.1 Weak axiom of revealed preference 19
  - 2.1.2 Maximal rationalizability 22
  - 2.1.3 Quasitransitivity 22
- 2.2 Satisficing 23
- 2.3 Weak rationalization 24
- 2.4 Subrationalizability 28
- 2.5 Experimental elicitation of choice 31
- 2.6 Chapter references 32

3 Rational Demand 34
- 3.1 Weak rationalization 34
  - 3.1.1 Proof of Afriat's Theorem 42
  - 3.1.2 Constructive proof of Afriat's Theorem 44
  - 3.1.3 General budget sets 46

3.2 Strong rationalization 47
3.2.1 Smooth utility 50
3.2.2 General budget sets 50
3.2.3 Partially observed prices and consumption 51
3.3 Revealed preference graphs 53
3.4 Chapter references 54

4 Topics in Rational Demand 57
4.1 Discrete goods: Supermodular and submodular rationalizations 57
4.2 Divisible goods 60
4.2.1 Homotheticity 60
4.2.2 Separability 63
4.2.3 Quasilinear utility 65
4.2.4 Gross complements and substitutes 66
4.3 Chapter references 69

5 Practical Issues in Revealed Preference Analysis 71
5.1 Measures of the severity of a violation of GARP 72
5.1.1 Afriat's efficiency index 72
5.1.2 Varian's version of AEI 73
5.1.3 The Money Pump Index 73
5.2 Power of testing GARP 74
5.2.1 Bronars' index 75
5.2.2 Engel curve correction 76
5.3 An overview of empirical studies 77
5.3.1 Panel data 77
5.3.2 Cross-sectional data 78
5.3.3 Time-series data 78
5.3.4 Experimental data 79
5.4 Chapter references 80

6 Production 83
6.1 Cost minimization 83
6.2 Profit maximization 87
6.2.1 Unobserved factors of production 91
6.2.2 Measuring violations from rationalizability 93
6.3 Chapter references 93

7 Stochastic Choice 95
7.1 Stochastic rationality 95
7.1.1 Proof of Theorem 7.2 98
7.2 Luce's model 103
7.2.1 Proof of Theorem 7.6 105
7.2.2 Luce's model and the logit model 106
7.3 Random expected utility 109
7.4 Chapter references 112

8 Choice Under Uncertainty 114
8.1 Objective probability 114
8.1.1 Notation 114
8.1.2 Choice over lotteries 114
8.1.3 State-contingent consumption 116
8.2 Subjective probability 121
8.2.1 The Epstein Test 121
8.2.2 Subjective expected utility 122
8.3 Complete class results 123
8.4 Subjective expected utility with an act-dependent prior 126
8.5 Chapter references 127

9 General Equilibrium Theory 129
9.1 The Sonnenschein–Mantel–Debreu Theorem 130
9.1.1 Sketch of the proof of the Sonnenschein–Mantel–Debreu Theorem 132
9.2 Homothetic preferences 134
9.3 Prices and endowments 136
9.4 The core of exchange economies 140
9.5 Chapter references 141

10 Game Theory 143
10.1 Nash equilibrium 143
10.1.1 Choice from all game forms 144
10.1.2 Choice from a subset of game forms 146
10.1.3 Zero-sum games 147
10.2 Bayesian Nash equilibrium 147
10.3 Bargaining theory 149
10.4 Stable matching theory 153
10.5 Chapter references 156

11 Social Choice and Political Science 158
11.1 Testable implications of preference aggregation functions 158
11.1.1 Utilitarian rationalizability 162
11.2 Models in formal political science 164
11.2.1 Refuting Euclidean preferences 164
11.2.2 Rational voting when policy positions are known 168
11.3 Chapter references 173

12 Revealed Preference and Systems of Polynomial Inequalities 175
12.1 Linear inequalities: The Theorem of the Alternative and revealed preference 175
12.1.1 Linear systems from first-order conditions 176
12.1.2 The existence of a rationalizing utility 178

12.2 Polynomial inequalities: The Positivstellensatz 180
12.2.1 Application: Nash bargaining 181
12.3 Chapter references 184

13 Revealed Preference and Model Theory 186
13.1 A model for observables, data, and theories 188
13.1.1 Empirical content 190
13.1.2 Relative theories 192
13.2 Application: *Status quo* preferences 192
13.3 Choice theory and empirical content 194
13.4 Chapter references 196
