

# Contents

<i>List of Figures, Tables and Boxes</i>	xiii
<i>Preface</i>	xv
<b>1 Introduction</b>	<b>1</b>
What Is Research?	2
What Is Science?	2
<i>Publicness</i>	3
<i>The scientific method</i>	4
Why Research Design?	9
What Is Political Science?	13
The Purposes of This Text	16
<i>Who is this text for?</i>	18
The Way Ahead	20
<b>2 Types of Research and Research Questions</b>	<b>23</b>
Normative and Positive Research	24
Theoretical and Empirical Research	28
Descriptive, Predictive, and Explanatory Research	30
<i>Description</i>	31
<i>Prediction</i>	33
<i>Explanation</i>	35
Theory Generation, Theory Testing, and Theory Application	37
<i>Theory generation</i>	38
<i>Theory testing</i>	39
<i>Theory application</i>	40
Alternative Approaches	42
Choosing a Topic	44
Sharpening the Research Question	51
Further Reading	54
<b>3 Theory in the Research Process</b>	<b>56</b>
Paradigms, Theories, Models, and Interpretations	56
The Functions of Theory	58
The Structure of Theory	62
Developing Explanatory Theory	67
<i>Informal analysis</i>	68
<i>Mathematical analysis</i>	69

<i>Game theory</i>	71
<i>Agent-based modelling</i>	73
<i>Statistical models</i>	76
What Makes a Good Theory?	77
<i>Truth</i>	77
<i>Parsimony</i>	78
<i>Generality</i>	78
<i>Precision</i>	79
Practical Considerations about Theory	80
Further Reading	82
<b>4 Concepts and Operationalization</b>	<b>83</b>
Concepts	83
<i>Defining concepts</i>	84
<i>The nature of concepts</i>	86
<i>The structure of concepts</i>	89
<i>Relationships between concepts</i>	92
<i>Definitions</i>	94
Conceptualization	95
<i>Classification (intensional)</i>	96
<i>Evaluating concepts and classifications</i>	99
<i>Classification and measurement</i>	100
Operationalization	100
Pitfalls of Conceptualization	102
<i>Conceptual profusion</i>	102
<i>Conceptual stretching and functional equivalence</i>	103
<i>The legal-bureaucratic context</i>	103
<i>Contested concepts</i>	104
Summing Up	105
Further Reading	105
<b>5 Measurement and Description</b>	<b>107</b>
Preliminaries	107
A Glossary of Research Terms	109
<i>What is a case?</i>	109
<i>Cases, samples, and populations</i>	111
Measurement Reliability and Validity	117
Measurement Strategies in Political Science	119
<i>Measuring policy positions of political parties</i>	120
Descriptive Inference	123
Goals of Descriptive Research	124
Describing Populations	125
<i>Univariate descriptions of populations</i>	125

<i>Multivariate descriptions of populations</i>	134
<i>Describing associations between variables</i>	138
Describing Individual Cases	140
<i>Participant observation and ethnographic fieldwork</i>	141
<i>Archival historical research</i>	143
Further Reading	144
<b>6 Explanation and Causality</b>	<b>145</b>
Types of Explanation	145
<i>Covering laws</i>	146
<i>Probabilistic-nomological explanation</i>	147
<i>Functional explanation</i>	148
<i>Intentional explanations</i>	149
<i>Mechanistic causal explanations</i>	150
Notions of Causality	153
<i>A counterfactual definition</i>	153
<i>General patterns and particular facts</i>	154
<i>Complete and partial, deterministic and probabilistic explanations</i>	155
<i>Prospective and retrospective causation</i>	156
<i>Association, prediction, and causation</i>	156
<i>Intervention, manipulation, and causation</i>	157
<i>Summing up</i>	158
Causal Inference	160
<i>The problem</i>	160
<i>Partial solutions</i>	161
Further Reading	164
<b>7 Experimental Designs</b>	<b>166</b>
The Basics of Experimental Research	167
<i>Experiments, randomized controlled trials, and quasi-experiments</i>	167
<i>The goals of experimental research</i>	168
<i>The logic of experimental research</i>	169
<i>Validity</i>	173
<i>A hypothetical example</i>	173
The Design of Experimental Research	176
<i>Level of analysis</i>	176
<i>Sample size</i>	177
<i>Blocking and randomization</i>	179
<i>The experimental setting</i>	181
Complications	182
The Analysis of Experimental Data	186

---

Experiments in Political Science and Public Policy Research	190
<i>Survey experiments</i>	190
<i>Field experiments</i>	192
<i>Social network-based experiments</i>	194
<i>Laboratory experiments</i>	195
Limits to Experimental Research	196
Further Reading	197
<b>8 Large-N Designs</b>	<b>200</b>
The Logic of Large-N Research	201
<i>An example</i>	202
Pitfalls on the Way from Association to Causation	205
Conditions for Causal Inference	209
Strategies for Causal Inference in Large-N Research	211
<i>Natural experiments</i>	211
<i>Instrumental variables</i>	216
<i>Mediation analysis</i>	219
<i>Conditioning</i>	220
<i>Summary and additional approaches</i>	225
Common Designs for Causal Inference	227
<i>Time series</i>	227
<i>Cross-sectional designs</i>	231
<i>Panel designs</i>	232
<i>Multilevel designs</i>	236
Estimating Causal Effects	237
<i>Varieties of association</i>	237
<i>Size of the association</i>	238
<i>Uncertainty and statistical significance</i>	239
<i>Linearity and beyond</i>	242
<i>Limited outcomes</i>	243
The Design of Large-N Observational Research	243
<i>Variable selection</i>	244
<i>Case selection</i>	247
<i>Levels of analysis and observation</i>	253
<i>Measurement error and missing data</i>	254
Uses of Large-N Research	255
Further Reading	256
<b>9 Comparative Designs</b>	<b>258</b>
The Logic of Small-N Comparative Research	259
The Design of Small-N Comparative Research	262
<i>Most similar systems design I</i>	262
<i>Most similar systems design II</i>	266

<i>Most different systems design</i>	268
<i>Beyond the most simple designs</i>	269
Qualitative Comparative Analysis	269
<i>Necessary and sufficient conditions</i>	270
<i>Boolean minimization: a simple example</i>	271
<i>A slightly more complex example: the curse of dimensionality, logical remainders, and inconsistency</i>	274
<i>Case and variable selection in QCA</i>	279
<i>Extensions and alternatives</i>	280
Limits of Small-N Comparative Research	282
Further Reading	283
<b>10 Single-Case Study Designs</b>	<b>285</b>
What Is a Case?	286
Uses of Single-Case Designs	288
<i>Theory application and abductive explanation</i>	288
<i>Theory testing: outcomes and mechanisms</i>	290
<i>Exploration, theory generation, and description</i>	291
Selecting Evidence to Observe	294
Conducting Case Study Research	297
<i>Process tracing</i>	297
Limitations of Single-Case Designs	304
Further Reading	307
<b>11 Mixed and Nested Designs</b>	<b>310</b>
A Pragmatic Approach to Political Science Research	310
Mixing and Nesting	312
Uses of Mixed Research Designs	313
<i>Triangulation and cross-validation</i>	313
<i>Validating theoretical and methodological assumptions</i>	314
<i>Exploring and validating causal mechanisms</i>	315
<i>Building theories before testing theories</i>	316
<i>Testing explanations with cross-case and within-case evidence</i>	316
Selecting Cases in Mixed and Nested Designs	318
<i>Case selection when combining large-N and single-case designs</i>	318
<i>Case selection when combining small-N and single-case designs</i>	320
<i>Case selection for composite projects</i>	322
Mixing Methods at the Level of Research Programs	323
Critiques of Combining Research Methods and Designs	325
Further Reading	326

<b>12 Communicating Research</b>	<b>328</b>
The Outputs of the Research Process	329
<i>Styles of academic writing</i>	330
<i>Structuring research proposals</i>	331
<i>Structuring research reports</i>	333
The Ethics of Political Science Research	335
<i>Research integrity</i>	335
<i>Political science and the broader society</i>	340
The Role of Political Science	342
<i>References</i>	345
<i>Index</i>	368
