1 The Sounds of the World's Languages	1
2 Places of Articulation	9
2.1 Places of Articulation by Target Region	15
2.2 Contrasting Places of Articulation	39
3 Stops	47
3.1 Laryngeal Setting	47
3.2 Airstream Mechanisms	77
3.3 Affricates	90
3.4 Length	91
3.5 Strength: Fortis vs Lenis Stops	95
3.6 Summary	99
4 Nasals and Nasalized Consonants	102
4.1 Nasals	102
4.2 Laryngeal Activity in Nasals	106
4.3 Partially Nasal Consonants	118
4.4 Nasalized Consonants	131
4.5 Conclusion	134

5 Fricatives	137
5.1 Non-sibilant Anterior Fricatives	139
5.2 Sibilants	145
5.3 Posterior Non-sibilant Fricatives	164
5.4 Acoustic Differences among Fricatives	173
5.5 Laryngeal Settings and other Modifications of Fricatives	176
5.6 Phonological Features for Fricatives	179
6 Laterals	182
6.1 Voiced Lateral Approximants	183
6.2 Acoustic Characteristics of Voiced Lateral Approximants	193
6.3 Other Types of Laterals	197
6.4 The Feature Description of Laterals	212
7 Rhotics	215
7.1 Rhotics	215
7.2 Trills	217
7.3 Taps and Flaps	230
7.4 Fricative and Approximant /r/'s	232
7.5 Voicing and other Laryngeal Contrasts	236
7.6 Contrasts between Rhotic Types in the Same Language	237
7.7 Relationship to Laterals	243
7.8 Factors Underlying the Unity of Rhotics as a Class	244
8 Clicks	246
8.1 Articulatory Properties of Click Types	247
8.2 Acoustic Properties of Click Types	257
8.3 Click Accompaniments	260
9 Vowels	281
9.1 Major Vowel Features	282
9.2 Additional Vowel Features	298
9.3 Vowel-like Consonants	322
10 Multiple Articulatory Gestures	328
10.1 Preliminary Considerations	329
10.2 Double Closures	332

10.3 Secondary Articulations	354
11 Coda	369
Appendix: List of Languages Cited	374

Figures

- 2.1 Five groups of moveable structures 12
- 2.2 Nine regions of the vocal tract 13
- 2.3 Detailed diagrams of the anterior part of the vocal tract 14
- 2.4 Mean vertical movement trajectories in Ewe **abaa** 16
- 2.5 Tongue and lip contact in a speaker of Vao 19
- 2.6 Palatographic and linguographic records of three Toda words 22
- 2.7 Apical and laminal alveolar nasals in Bulgarian 24
- 2.8 The difference between a laminal dental **ɖ** and an apical alveolar **d** in Isoko 24
- 2.9 Spectrograms of Dahalo alveolar and dental plosives 25
- 2.10 The difference between laminal denti-alveolar **ɖ** and apical retroflex **ɖ** in Ewe 26
- 2.11 The apical retroflex **ɖ** in Hindi and the sub-apical retroflex **ɖ** in Tamil and Telugu 27
- 2.12 Intervocalic coronal stops in Eastern Arrernte 29
- 2.13 The release bursts of the four coronal stops of Eastern Arrernte 30
- 2.14 Laminal denti-alveolar, laminal palato-alveolar, and palatal stops in Ngwo 32
- 2.15 Hungarian voiced palatal stop 32
- 2.16 Movement trajectories for a point on the tongue rear in Ewe **aká** and **eké** 34
- 2.17 Contrasting velar and uvular plosives and ejectives in K'ekchi 37
- 2.18 Intervocalic single and geminate **ʔ** in Dahalo 38
- 3.1 Spectrogram of the Ilwana word **budda** 51
- 3.2 Spectrogram of the Ilwana word **luad'u** 52
- 3.3 Consonant closure and portions of adjoining vowels in Fula 54

- 3.4 Contrasting unaspirated stops in Korean 57
- 3.5 Glottal aperture in Hindi stops 59
- 3.6 Modal and breathy voiced stops in Hindi 59
- 3.7 Aerodynamic records of six Owerri Igbo bilabial stops 61
- 3.8 Voiced and breathy voiced velar stops in Owerri Igbo 62
- 3.9 The difference between Wu Chinese unaspirated stops 65
- 3.10 Contrasts among final velar stops in Eastern Armenian 68
- 3.11 Pre-aspirated, aspirated, and unaspirated bilabial voiceless stops in Icelandic 71
- 3.12 The English word *pack* pronounced with final velar stop with and without accompanying glottal closure 74
- 3.13 Waveforms of Lebanese Arabic geminate and single ʔ 75
- 3.14 Waveforms of Gimi words 77
- 3.15 Differences between Navajo and Hausa ejective stops 80
- 3.16 Clusters with mixed voicing in Zhuǎhōasi 81
- 3.17 Aerodynamic data for Sindhi 83
- 3.18 Contrasts between voiced plosive and voiced implosive in Degema 84
- 3.19 Intra-oral pressure records of two Hausa words 85
- 3.20 The difference between the releases of the modal voice and creaky voiced stops in Hausa 86
- 3.21 Aerodynamic records of Lendu implosives 88
- 3.22 Articulatory trajectories for lips and the tongue in the nonsense words **mipa** and **mippa** 93
- 3.23 Vertical movement trajectories of the lips and jaw in Ewe **apaa** and **abaa** 97
 - 4.1 Difference in nasal airflow in French 104
 - 4.2 Aerodynamic records of two Acehnese words 105
 - 4.3 Modally and breathy voiced nasals in Hindi 108
 - 4.4 Tsonga modal and breathy voiced nasals 109
 - 4.5 Spectrogram of a Columbian Salish word containing two laryngealized nasals 110
 - 4.6 Spectrograms of two speakers of Montana Salish pronouncing **smu** 110
 - 4.7 Aerodynamic records of a Burmese word 111
 - 4.8 Five pairs of Burmese voiced and voiceless nasals 112
 - 4.9 Aerodynamic records of Angami voiceless aspirated nasals 115
 - 4.10 Sinhala words contrasting 'prenasalized stops' and heterosyllabic nasal + stop sequence 120
 - 4.11 Single and geminate nasals in Sinhala 120
 - 4.12 'Prenasalized stop' and geminate nasal + stop in Fula 121
 - 4.13 Voiced and voiceless prenasalized stops in KeSukuma 124
 - 4.14 Voiceless unaspirated and voiceless aspirated bilabial and uvular prenasalized stops in Hmong Daw 125
 - 4.15 Voicing assimilation in homorganic and heterorganic nasal + stop sequences in Bura 126

- 4.16 Weak vocal cord vibration in devoiced nasal preceding aspirated stop in Bondei 127
- 4.17 Contrasting prenasalized alveolar and bilabial stops with trilled release in Kele 130
- 4.18 Aerodynamic records of voiceless glottal fricatives in Kwangali 133
- 5.1 Movement trajectories of the upper and lower lips and the lower incisors in Ewe labial fricatives 140
- 5.2 Spectrograms of Ewe bilabial and labiodental voiced fricatives 142
- 5.3 Means of 30 FFT spectra made at 5 ms intervals throughout the Ewe fricatives ϕ and f 142
- 5.4 The tip of the tongue protruded between the teeth by a speaker of Californian English 143
- 5.5 Icelandic non-sibilant alveolar fricatives, compared with the sibilant alveolar s 145
- 5.6 The articulatory gesture for s as in *saw* 147
- 5.7 A different speaker during the pronunciation of s as in *saw* 147
- 5.8 The articulatory position for \int as in *Shaw* 149
- 5.9 Three speakers producing Standard Chinese sibilant fricatives 151
- 5.10 Palatograms of the same words as in figure 5.9 152
- 5.11 The articulatory gestures involved in Polish fricatives 154
- 5.12 The articulatory gesture involved in Tamil ʃ 156
- 5.13 Palatographic and linguographic records of ko:ʃ 'money' in Toda 157
- 5.14 Palatographic and linguographic records of po:ʃ 'milk' in Toda 158
- 5.15 Palatographic and linguographic records of po:ʃ 'language' in Toda 159
- 5.16 Palatographic and linguographic records of po:ʃ (place name) in Toda 160
- 5.17 A composite diagram of Toda tongue positions in sibilant fricatives 160
- 5.18 The four contrasting gestures for the sibilant fricatives in the Bzyb dialect of Abkhaz 161
- 5.19 Spectrograms of Ubykh syllables containing voiceless sibilants 162
- 5.20 X-ray tracings of Hungarian palatals 166
- 5.21 A comparison between a voiceless velar stop and a voiceless velar fricative in Standard Chinese 166
- 5.22 Voiceless uvular fricative trill in Wolof 167
- 5.23 Spectrograms of two Agul words, spoken by a male speaker of the Burkikhan dialect 168
- 5.24 A voiceless epiglottal fricative h (before $u:$) in Arabic 169
- 5.25 Pharyngeal constrictions in Abkhaz and epiglottal constrictions in Dargi 170
- 5.26 Two speakers of !Xóõ producing epiglottal articulations 171
- 5.27 Swedish ɸ , a highly rounded, labiodental, velar or velarized fricative 172
- 5.28 An alternative form of Swedish ɸ 172
- 5.29 Spectra of Swedish s , ç , and ʃ before $a:$ as produced by five speakers 174
- 5.30 Spectra of Swedish s , ç , and ʃ before $i:$, $y:$ and before $u:$ as produced by two speakers 175

- 5.31 The sibilant fricatives that occur in different Swedish dialects 176
- 5.32 Spectra of 12 fricatives 177
- 5.33 A spectrogram of a Hausa phrase illustrating ejective fricatives 179
- 6.1 Articulatory positions for l and t in German and Standard Chinese 184
- 6.2 Contact area for three repetitions of l by a Gonja speaker 184
- 6.3 Apical dental and apical alveolar laterals in Albanian 186
- 6.4 Apical dental and laminal postalveolar laterals in Breton 187
- 6.5 Apical alveolar and laminal alveolar laterals in Russian 187
- 6.6 Apical alveolar and laminal palatal laterals in Spanish 189
- 6.7 The phrase *belles jambes* spoken by a speaker of French 192
- 6.8 The four coronal laterals of Eastern Arrernte and the variant of l which occurs in clusters before stops 195
- 6.9 Laminal dental, apical alveolar and velar laterals in Mid-Waghi 196
- 6.10 Differences between a voiceless lateral fricative in Zulu and a voiceless lateral approximant in Burmese 199
- 6.11 Spectrogram of the Montana Salish word **ppil** 200
- 6.12 A sequence of lateral consonants in Montana Salish 201
- 6.13 Spectrograms of four laterals in Bura 204
- 6.14 Spectrograms of Zulu lateral approximants, fricatives and affricates 205
- 6.15 The voiced velar lateral fricative of Archi 207
- 6.16 The Navajo voiceless aspirated lateral affricate and the ejective lateral affricate 208
- 6.17 A lateral ejective affricate as spoken by two male Hadza speakers 209
- 6.18 Spectrograms of four KiChaka words, illustrating major allophones of approximant l and the lateral flap J 210
- 6.19 Velar lateral taps in Melpa and Kanite 211
- 7.1 Spectrograms of apical trills in Finnish and Russian 218
- 7.2 Initial, medial single and medial geminate alveolar trills from two speakers of Standard Italian 220
- 7.3 Spectrogram of the Finnish word **koiran** 222
- 7.4 Palatograms of trills spoken by a female speaker of Russian 223
- 7.5 Spectrograms of trills in six Toda words illustrating word-final rhotics 224
- 7.6 The trill in the Toda word **kar** 'border of cloth' 226
- 7.7 The trill in the Toda word **kar** 'juice' 227
- 7.8 The trill in the Toda word **kar** 'pen for calves' 228
- 7.9 German and French intervocalic uvular trills 229
- 7.10 Spectrograms of uvular trills in Swedish 229
- 7.11 A spectrogram of the Czech word **řad** 230
- 7.12 Taps from a female speaker of Peninsular Spanish and a male Spanish speaker from Peru 231
- 7.13 The articulation of American English alveolar flap and Spanish dental tap 232
- 7.14 The word *arrêt* 'stop' pronounced with a uvular fricative by a female speaker of Standard French 233

- 7.15 Mid-sagittal section of Czech rhotics 233
- 7.16 Rhotic approximants in a Southern British pronunciation of *array*, and a Standard German pronunciation of *Ehre* 234
- 7.17 Spectrogram of American English *sorrow* 235
- 7.18 Articulatory position for syllabic 'bunched r' from six speakers of American English 235
- 7.19 Spectrograms of two Ingush words 236
- 7.20 Palatograms and deduced tongue positions in two Hausa words spoken by a male speaker from Zaria 238
- 7.21 Spectrograms contrasting r and ɹ spoken by a male speaker of Hausa 238
- 7.22 Spectrograms of words containing single and geminate Hausa rhotics 239
- 7.23 Waveforms and spectrograms of two Eastern Arrernte words illustrating the contrasting rhotics of the language 240
- 7.24 Rhotics in Warlpiri 241
- 7.25 Flaps in initial and medial position in Warlpiri 241
- 7.26 Spectrograms of Edo words spoken by a male speaker from Benin City 242
- 8.1 The articulatory sequence involved in production of an alveolar click in !Xóó 247
- 8.2 The vocal organs at the onset of the click closure, and just before the release of the click closure in !Xóó 250
- 8.3 Palatograms of ! produced by five speakers of !Xóó 253
- 8.4 An alveolo-palatal click as spoken by two male Hadza speakers 254
- 8.5 The palatal clicks of five !Xóó speakers 255
- 8.6 A lateral click as spoken by a male Hadza speaker 256
- 8.7 Waveforms of the noise bursts for the five !Xóó click types 258
- 8.8 Waveforms illustrating the five click accompaniments in Xhosa with alveolar clicks 262
- 8.9 The difference between aspirated and voiceless aspirated nasalized clicks in Nama 263
- 8.10 Waveforms showing eight alveolar clicks in !Xóó 267
- 8.11 The waveform of a preglottalized nasal click and the first few periods of the vowel 268
- 8.12 Waveforms showing nine alveolar clicks in !Xóó 270
- 8.13 A dental click with a voiceless velar affricate accompaniment 271
- 8.14 A voiced dental click followed by a voiceless velar affricate 271
- 8.15 A voiceless dental click with an ejective accompaniment, followed by a uvular ejective 272
- 8.16 A voiced dental click followed by a uvular ejective 273
- 8.17 A voiced dental click followed by aspiration 273
- 8.18 A dental click with a uvular ejective accompaniment 274
- 8.19 Waveforms of the first six Zhu|'hōasi alveolar clicks in table 8.5 276
- 8.20 Waveforms of the last six Zhu|'hōasi alveolar clicks in table 8.5 277
- 9.1 The primary Cardinal Vowels displayed in terms of the major dimensions of vowel quality 283

- 9.2 The mean tongue positions in American English vowels 284
- 9.3 The mean tongue positions in American English vowels measured in terms of the size of the constriction and the distance of the constriction from the glottis 284
- 9.4 The mean tongue positions in American English vowels measured in terms of the distance of the highest point of the tongue from the roof of the mouth 285
- 9.5 An acoustic and an articulatory representation of a mean set of American English vowels 286
- 9.6 Scatter of values of F1 and F2 for /ə/ in Eastern Arrernte 287
- 9.7 Mean position of values of F1 and F2 for /ə/ in Eastern Arrernte 288
- 9.8 Mean formant frequencies of three Kabardian vowels 288
- 9.9 The relative phonetic qualities of the four front unrounded vowels in Danish 289
- 9.10 The mean formant frequencies of the long vowels of eight speakers of the Amstetten dialect of Bavarian 290
- 9.11 Lip positions for ten vowels of Iaa 294
- 9.12 X-ray tracings of Swedish high front vowels differing in lip position 296
- 9.13 Mean formant frequencies of the vowels of Yoruba and Italian 297
- 9.14 Records of nasal flow in three French words 299
- 9.15 Spectrograms of the three Chinantec words in table 9.9 299
- 9.16 Tracings from X-ray cinematography films of some Igbo vowels 301
- 9.17 The articulatory positions in non-low vowels of the Akyem dialect of Akan 301
- 9.18 Spectra of two Degema vowels 302
- 9.19 The articulatory positions in some so-called Tense/Lax pairs of vowels in English 303
- 9.20 The articulatory positions in some so-called Tense/Lax pairs of vowels in German 303
- 9.21 The acoustic effects of ATR in a number of languages 305
- 9.22 X-ray tracings of plain and pharyngealized vowels in Even 307
- 9.23 Plain and pharyngealized vowels in Tsakhur and Udi 308
- 9.24 Plain and pharyngealized vowels in !Xóó 309
- 9.25 Spectrograms of the word qa'a as pronounced by four speakers of !Xóó 309
- 9.26 Plain, pharyngealized and strident vowels in !Xóó 311
- 9.27 Photographs of a pronunciation of a strident vowel in !Xóó 311
- 9.28 Pronunciation of a word containing the low back strident vowel 312
- 9.29 Two pairs of words with stiff and slack voicing in Parauk 316
- 9.30 Narrow band power spectra of the creaky, modal and breathy vowels of five speakers of Jalapa Mazatec 318
- 9.31 Relative amplitude of the fundamental and the first formant in Jalapa Mazatec vowels 319
- 9.32 Waveforms of the three vowels in the first row of table 9.15 319
- 9.33 Photographs of the lips in three Isoko words 325

- xiv
- 10.1 Abkhaz “bilabial-palatal” fricatives as spoken by a male speaker of the Bzyb dialect 331
 - 10.2 Spectrograms of two SePedi words spoken by a male speaker 331
 - 10.3 Spectrograms of words containing $\widehat{k\bar{p}}$, $\widehat{g\bar{b}}$, $k\bar{p}$, bg and $\widehat{g\bar{b}g}$ in Eggon 335
 - 10.4 Spectrograms of $\widehat{k\bar{p}}$ in Efik and $\widehat{g\bar{b}}$ in Logbara 336
 - 10.5 Spectrograms and stop burst spectra of Dedua words 337
 - 10.6 Coordination of lower lip and tongue back movements in the Ewe word $\widehat{ak\bar{p}a}$ 338
 - 10.7 Coordination of lower lip and tongue back movements in the Ewe word $\widehat{ag\bar{b}a}$ 338
 - 10.8 Idoma words containing labial-velar nasals with oral pressure reduction 340
 - 10.9 Spectrogram illustrating a nasalized bilabial click in $\neq H\acute{o}\bar{a}$ 341
 - 10.10 Aerodynamic records of words extracted from three repetitions of an Edo sentence 343
 - 10.11 Three Yeletnye doubly-articulated nasals 345
 - 10.12 Three Yeletnye doubly-articulated plosives in stem-initial position 346
 - 10.13 Waveforms and intra-oral pressure records of tk cluster in Shona 347
 - 10.14 Some relative timing possibilities among multiple closures 351
 - 10.15 Palatograms of !Xóó bilabial clicks from five speakers 352
 - 10.16 Tracings from x-ray films of !Xóó bilabial clicks 353
 - 10.17 Spectrograms of two SePedi words 354
 - 10.18 Contrast of word-initial and final labialized bilabial plosives and nasals in Pohnpeian 360
 - 10.19 Lip photographs of Shona [s] and [s̥] 360
 - 10.20 An American English speaker’s pronunciation of *leaf*, *feel* using velarized laterals in both words 361
 - 10.21 Spectrograms of two Marshallese words, illustrating the contrast of plain and velarized nasals 362
 - 10.22 Four Marshallese words with contrasting laterals 363
 - 10.23 Spectrograms of contrasting Russian plain and palatalized bilabial stops 364
 - 10.24 X-ray tracings of s and s̥ spoken by a Qatari Arabic speaker 365
 - 10.25 The effect of Kom fricative vowel \bar{u} , inducing labiodental offglide of preceding consonants 367
 - 10.26 Laminagram of Kuteb laminal post-alveolar fricative z as pronounced before v allophone of w 367
 - 11.1 An overview of the relation between a segment (or root node) X and different types of phonetic variation 370

Tables

- 2.1 Terminology summarizing the place of articulatory gestures 15
- 2.2 Some of the labial consonants of the XiNkuna dialect of Tsonga 18
- 2.3 Words illustrating bilabial, linguo-labial and alveolar places of articulation in Tangoa 19
- 2.4 Dental, alveolar and sub-apical retroflex stops in syllable final position in Toda 21
- 2.5 The plain coronal stops and nasals of Eastern Arrernte 28
- 2.6 Contrasts between intervocalic stops and nasals in Yanyuwa 35
- 2.7 Contrasts involving palato-alveolar affricates, and velar and uvular stops in Quechua 36
- 2.8 Contrasts involving velar and uvular plosives and ejectives in K'ekchi 36
- 2.9 Contrasting pharyngeal and epiglottal fricatives, and epiglottal plosives in the Burkikhan dialect of Agul 38
- 2.10 A matrix giving examples of contrasting places of articulation 40
- 2.11 The relationship between the major place features and individual places of articulation 44
 - 3.1 Variations among stop consonants 48
 - 3.2 Short definitions of terms used for laryngeal settings 48
 - 3.3 Stops with three different laryngeal settings in Thai 56
 - 3.4 Contrasts between the three sets of stops in Korean 56
 - 3.5 Contrasts involving stops with breathy voice in Hindi 58
 - 3.6 Bilabial and alveolar stops in Owerri Igbo 60
 - 3.7 Some contrasting stops in Zhu|'hōasi 63
 - 3.8 Stops with stiff and slack voice in Javanese 64
 - 3.9 Stops released with slack voice in the Shanghai dialect of Wu Chinese 64
- 3.10 Voiced, voiceless unaspirated and aspirated stops in final position in Eastern Armenian 67
- 3.11 Aspiration and Burmese causative formation 69

- 3.12 Pre-aspirated and unaspirated long voiceless stops in medial and final position in Icelandic 71
- 3.13 Surface phonetic contrasts between pre-aspirated and voiceless stops in Scottish Gaelic 72
- 3.14 The eight contrasting consonants of Hawaiian in initial position 75
- 3.15 Intervocalic glottal consonants and directly adjoining vowels in Gimi 76
- 3.16 The ejectives in Montana Salish and contrasting plosives and affricates 79
- 3.17 Clusters with mixed voicing in Zhuǎ'hōasi 81
- 3.18 Stop contrasts in Uduk 82
- 3.19 Contrasting stops in Sindhi 83
- 3.20 Contrasts involving so-called glottalized sounds in Hausa 86
- 3.21 Voiced laryngealized stops and voiced implosives in Lendu 87
- 3.22 Contrasting affricates in Standard Chinese 91
- 3.23 Chipewyan stops and affricates 91
- 3.24 Word-initial long stops and continuants in Pattani Malay 94
- 3.25 Word-initial long and short stops in LuGanda 95
- 3.26 A matrix exemplifying languages that contrast stops with different glottal states 100
- 3.27 A matrix giving examples of languages that contrast various different types of stops 101
- 4.1 Words illustrating Jalapa Mazatec nasals 107
- 4.2 Hindi voiced and breathy voiced nasals 107
- 4.3 Voiced and laryngealized nasals in Kwakw'ala 109
- 4.4 Voiced and voiceless nasals in Burmese 111
- 4.5 Angami contrasts involving voiced and voiceless nasals 114
- 4.6 Principal acoustic features of Catalan nasals 117
- 4.7 Mean nasal zeros for the four coronal nasals of Eastern Arrernte 117
- 4.8 Fula single and geminate 'prenasalized stops' 122
- 4.9 Mean duration of medial prenasalized consonants and selected other consonants in Fijian 122
- 4.10 Partial paradigms of Russian nouns with stop + nasal sequences 128
- 4.11 Eastern Arrernte words illustrating plain nasals, and pre- and post-nasalized stops 129
- 4.12 Bilabial and alveolar prenasalized stops with trilled release in Kele 130
- 4.13 Mean measurement of prenasalized bilabial stops with trilled release in three Austronesian languages and in Nweh 131
- 4.14 Nasalized and non-nasalized voiceless glottal fricatives in Kwangali 132
- 4.15 Voiced bilabial segments in Waffa 134
- 5.1 Terms and symbols for principal categories of fricatives 138
- 5.2 Ewe bilabial and labiodental fricatives 139
- 5.3 Contrasts among Standard Chinese fricatives and affricates 150
- 5.4 Words illustrating contrasts among Polish sibilants 155
- 5.5 Words illustrating contrasts among Toda sibilants 156
- 5.6 Words illustrating contrasts among Ubykh sibilants 162

- 5.7 Types of sibilants 164
- 5.8 Margi palatal and velar stops, fricatives and approximants 165
- 5.9 Contrasting pharyngeal and epiglottal fricatives, and epiglottal plosives, in the Burikhan dialect of Agul 168
- 5.10 Contrasts among Burmese fricatives 179
- 5.11 Contrasts among Tlingit pulmonic and glottalic egressive fricatives in verb stems 179
- 6.1 Contrasting laterals in Kaititj 185
- 6.2 Laterals in Mid-Waghi 190
- 6.3 Places of articulation for lateral approximants 191
- 6.4 Formant frequencies of Eastern Arrernte laterals 194
- 6.5 F2 in laterals of two additional Arandic languages 197
- 6.6 F2 in laterals differing in velarization 197
- 6.7 Contrasting laterals in Toda 198
- 6.8 Devoicing and frication of final laterals in Melpa 199
- 6.9 Contrasting alveolar laterals in initial position in Montana Salish 200
- 6.10 Words illustrating laterals in Welsh 203
- 6.11 Words illustrating lateral consonant types in Zulu 205
- 6.12 Non-geminate lateral segments in Archi 206
- 6.13 Contrasts among laterals in Tlingit 207
- 6.14 Languages exemplifying contrasting types of lateral segments 212
- 6.15 Languages exemplifying contrasting places of articulation among lateral segments 213
- 7.1 Symbols for some rhotic consonants 216
- 7.2 Words illustrating contrasting apical trills in Toda 223
- 7.3 Contrasting alveolar rhotics in Edo 242
