Contents

Chapter 1. Introduction and statement of the problem	1
1.1. Introduction	1
1.2. Stochastic differential games and the singular perturbation problem	6
1.3. The Bellman-Isaacs equations	8
Chapter 2. Abstract ergodicity, stabilization, and convergence	11
2.1. Ergodicity and the effective Hamiltonian	11
2.2. Stabilization and the effective terminal cost	15
2.3. The general convergence result	17
Chapter 3. Uncontrolled fast variables and averaging	21
3.1. Ergodicity	22
3.2. Stabilization	23
3.3. Uniform convergence	24
3.4. An explicit formula for the limit control problem	26
Chapter 4. Uniformly nondegenerate fast diffusion	29
4.1. Ergodicity	29
4.2. Stabilization	31
4.3. Uniform convergence	33
Chapter 5. Hypoelliptic diffusion of the fast variables	37
5.1. Ergodicity and stabilization	38
5.2. Uniform convergence	39
Chapter 6. Controllable fast variables	41
6.1. Bounded-time controllability and ergodicity	41
6.2. Stabilization and a formula for the effective initial data	46
6.3. An explicit formula for the effective Hamiltonian and the limit differential game	47
6.4. Uniform convergence	50
6.5. The reduction order formula for the effective control problem	52
Chapter 7. Nonresonant fast variables	55
7.1. Ergodicity	55
7.2. Stabilization	57
7.3. Uniform convergence	60
Chapter 8. A counterexample to uniform convergence	61
Chapter 9. Applications to homogenization	67
9.1. Periodic homogenization of 1st order H-J equations	67

9.2. Periodic homogenization of 2nd order equations	69
Bibliography	73
