Contents

Introduction	vii
0.1. Background and motivation	vii
0.2. Subject matter of this book	xv
0.3. Organization of this book	xxi
0.4. Acknowledgments	xxiii
Chapter 1. p -divisible groups	1
1.1. Definitions	1
1.2. Classification	3
Chapter 2. The Honda-Tate classification	5
2.1. Abelian varieties over finite fields	5
2.2. Abelian varieties over $\bar{\mathbb{F}}_p$	6
Chapter 3. Tate modules and level structures	13
3.1. Tate modules of abelian varieties	13
3.2. Virtual subgroups and quasi-isogenies	14
3.3. Level structures	15
3.4. The Tate representation	15
3.5. Homomorphisms of abelian schemes	16
Chapter 4. Polarizations	19
4.1. Polarizations	19
4.2. The Rosati involution	22
4.3. The Weil pairing	22
4.4. Polarizations of B -linear abelian varieties	23
4.5. Induced polarizations	23
4.6. Classification of weak polarizations	24
Chapter 5. Forms and involutions	27
5.1. Hermitian forms	27
5.2. Unitary and similitude groups	30
5.3. Classification of forms	31
Chapter 6. Shimura varieties of type $U(1, n - 1)$	35
6.1. Motivation	35
6.2. Initial data	36
6.3. Statement of the moduli problem	37
6.4. Equivalence of the moduli problems	39
6.5. Moduli problems with level structure	41
6.6. Shimura stacks	42

Chapter 7. Deformation theory	45
7.1. Deformations of p -divisible groups	45
7.2. Serre-Tate theory	47
7.3. Deformation theory of points of Sh	47
Chapter 8. Topological automorphic forms	51
8.1. The generalized Hopkins-Miller theorem	51
8.2. The descent spectral sequence	54
8.3. Application to Shimura stacks	56
Chapter 9. Relationship to automorphic forms	57
9.1. Alternate description of $Sh(K^p)$	57
9.2. Description of $Sh(K^p)_F$	59
9.3. Description of $Sh(K^p)_{\mathbb{C}}$	59
9.4. Automorphic forms	62
Chapter 10. Smooth G -spectra	65
10.1. Smooth G -sets	65
10.2. The category of simplicial smooth G -sets	67
10.3. The category of smooth G -spectra	69
10.4. Smooth homotopy fixed points	70
10.5. Restriction, induction, and coinduction	71
10.6. Descent from compact open subgroups	72
10.7. Transfer maps and the Burnside category	74
Chapter 11. Operations on TAF	79
11.1. The E_{∞} -action of $GU(\mathbb{A}^{p,\infty})$	79
11.2. Hecke operators	80
Chapter 12. Buildings	87
12.1. Terminology	87
12.2. The buildings for GL and SL	88
12.3. The buildings for U and GU	89
Chapter 13. Hypercohomology of adele groups	95
13.1. Definition of Q_{GU} and Q_U	95
13.2. The semi-cosimplicial resolution	95
Chapter 14. $K(n)$ -local theory	103
14.1. Endomorphisms of mod p points	103
14.2. Approximation results	105
14.3. The height n locus of $Sh(K^p)$	108
14.4. $K(n)$ -local TAF	113
14.5. $K(n)$ -local Q_U	118
Chapter 15. Example: chromatic level 1	121
15.1. Unit groups and the $K(1)$ -local sphere	121
15.2. Topological automorphic forms in chromatic filtration 1	123
Bibliography	129
Index	133
