On the Steady Motion of a Coupled System Solid-Liquid

Josef Bemelmans
Giovanni P. Galdi
Mads Kyed

ISSN 0065-9266 (print) ISSN 1947-6221 (online)

American Mathematical Society
Providence, Rhode Island

Contents

Chapter 1. Introduction 1

Chapter 2. Notation and Preliminaries 5
2.1. Notation 5
2.2. Preliminaries 8

Chapter 3. Steady Free Motion: Definition and Formulation of the Problem 11
3.1. Equations of Motion for the Elastic Body 11
3.2. Equations of Motion for the Liquid 12
3.3. Definition of a Steady Free Motion 13
3.4. Non-dimensionlization 17

Chapter 4. Main Result 19
4.1. Strategy of Proof 19
4.2. Isolated Orientation 20
4.3. Statement of the Main Theorem 23
4.4. Perturbation Parameter 24
4.5. The Stokes Problem 26
4.6. Perturbing Around an Isolated Orientation 32
4.7. Compatibility Conditions 36

Chapter 5. Approximating Problem in Bounded Domains 39
5.1. Fixed-Point Approach 40
5.2. Validity of the Compatibility Conditions 41
5.3. Solvability of the Fluid Equations 44
5.4. Solvability of the Elasticity Equations 57
5.5. Existence in a Bounded Domain 58

Chapter 6. Proof of Main Theorem 63

Chapter 7. Bodies with Symmetry 69
7.1. Symmetry Function Spaces 69
7.2. Main Theorem for Symmetric Bodies 70
7.3. Stokes Problem for a Symmetric Body 70
7.4. Reformulation of the Equations of Motion 71
7.5. Compatibility Conditions 73
7.6. Approximating Problem in Bounded Domains 74
7.7. Fixed-Point Approach 75
7.8. Validity of the Compatibility Conditions 75
7.9. Solvability of the Fluid Equations 76
7.10. Solvability of the Elasticity Equations 77

7.11. Existence in a Bounded Domain 79
7.12. Proof of Main Theorem for Symmetric Bodies 79
7.13. Examples 80

Appendix A. Isolated Orientation 83

Bibliography 87
