CONTENTS

Introduction	1
1. The characteristic submanifold	13
2. Preliminaries	17
3. Algebraic regular neighbourhoods: Construction	35
4. Enclosing	55
5. Algebraic regular neighbourhoods: enclosing	67
6. Algebraic regular neighbourhoods: existence and uniqueness	85
7. Coends when the commensuriser is small	99
8. Coends when the commensuriser is large	109
9. Canonical decompositions over two-ended groups when commensurisers are small	115
10. Canonical decompositions over two-ended groups when commensurisers are large	125
11. Examples	137
12. Canonical decompositions over VPC groups of a given length	143
13. Canonical decompositions over VPC groups of two successive lengths	149
14. Canonical decompositions over virtually abelian groups	161
15. Previous decompositions over two-ended subgroups	173
16. Extensions	175

Appendix

A. The symmetry of intersection numbers in group theory	177
A.1. The symmetry for surface groups	179
A.2. Intersection numbers in general	180
A.3. Interpreting intersection numbers	187
A.4. Correction	192
B. Splittings of groups and intersection numbers	195
B.1. Preliminaries and statements of main results	198
B.2. Zero intersection numbers	210
B.3. Strong intersection numbers	221
Bibliography	229
Index	233
