## Lectures on Mean Curvature Flows

Xi-Ping Zhu

---

American Mathematical Society • International Press

# Contents

<b>1</b>	<b>The curve shortening flow for convex curves</b>	<b>1</b>
1.1	Shrinking to a Point . . . . .	2
1.2	Asymptotic Behavior . . . . .	6
<b>2</b>	<b>The Short Time Existence and The Evolution Equation of Curvatures</b>	<b>15</b>
2.1	Local Existence . . . . .	17
2.2	Evolution of Metric and Curvature . . . . .	18
2.3	Pinching Estimate . . . . .	20
<b>3</b>	<b>Contraction of Convex Hypersurfaces</b>	<b>25</b>
3.1	Some Facts on Convex Hypersurface . . . . .	25
3.2	MCF FOR CONVEX HYPERSURFACES . . . . .	29
<b>4</b>	<b>Monotonicity and Self-Similar Solutions</b>	<b>35</b>
4.1	Type I Limits . . . . .	35
4.2	The Classification of Self-similar Solutions . . . . .	39
<b>5</b>	<b>Evolution of Embedded Curves or Surfaces (I)</b>	<b>47</b>
5.1	Isoperimetric Estimates . . . . .	48
5.2	Blow-up Argument . . . . .	50
5.3	Convexity Theorem . . . . .	52
<b>6</b>	<b>Evolution of Embedded Curves and Surfaces (II)</b>	<b>55</b>
6.1	Curves with Finite Total Absolute Curvature . . . . .	55
6.2	Long Time Existence for Complete Curves . . . . .	60
<b>7</b>	<b>Evolution of Embedded Curves and Surfaces (III)</b>	<b>67</b>
7.1	The Evolution Equation of Gradient Function . . . . .	68
7.2	Gradient Estimates . . . . .	69
7.3	Curvature Estimates . . . . .	71
7.4	Long Time Existence for Entire Graphs . . . . .	75
<b>8</b>	<b>Convexity Estimates for Mean Convex Surfaces</b>	<b>77</b>
8.1	Evolution Equations . . . . .	78
8.2	$L^p$ Estimates . . . . .	80
8.3	De Giorgi Iteration Argument . . . . .	84

<b>9</b>	<b>Li-Yau Estimates and Type II Singularities</b>	<b>89</b>
9.1	Translating Soliton . . . . .	90
9.2	Li-Yau Type Inequality . . . . .	91
9.3	Type II Limits . . . . .	97
<b>10</b>	<b>The Mean Curvature Flow in Riemannian Manifolds</b>	<b>101</b>
10.1	Hypersurfaces in Riemannian Manifolds . . . . .	101
10.2	Evolution Equations . . . . .	104
<b>11</b>	<b>Contracting Convex Hypersurfaces in Riemannian Manifolds</b>	<b>109</b>
11.1	The Pinching Estimates . . . . .	109
11.2	A Geometric Lemma . . . . .	112
11.3	Huisken Theorem . . . . .	115
<b>12</b>	<b>Definition of Center of Mass for Isolated Gravitating Systems</b>	<b>123</b>
12.1	Approximately Round Surfaces . . . . .	124
12.2	Existence of Constant Mean Curvature Surfaces . . . . .	128
12.3	Center of Gravity . . . . .	137
