PRINCETON LECTURES IN ANALYSIS

I

FOURIER ANALYSIS

AN INTRODUCTION

Elias M. Stein

&

Rami Shakarchi

PRINCETON UNIVERSITY PRESS
PRINCETON AND OXFORD

Contents

Foreword vii

Preface xi

Chapter 1. The Genesis of Fourier Analysis 1

1 The vibrating string 2
- 1.1 Derivation of the wave equation 6
- 1.2 Solution to the wave equation 8
- 1.3 Example: the plucked string 17

2 The heat equation 18
- 2.1 Derivation of the heat equation 18
- 2.2 Steady-state heat equation in the disc 20

3 Exercises 23

4 Problem 28

Chapter 2. Basic Properties of Fourier Series 29

1 Examples and formulation of the problem 30
- 1.1 Main definitions and some examples 34

2 Uniqueness of Fourier series 39

3 Convolutions 44

4 Good kernels 48

5 Cesàro and Abel summability: applications to Fourier series 51
- 5.1 Cesàro means and summation 51
- 5.2 Fejér's theorem 52
- 5.3 Abel means and summation 54
- 5.4 The Poisson kernel and Dirichlet's problem in the unit disc 55

6 Exercises 58

7 Problems 65

Chapter 3. Convergence of Fourier Series 69

1 Mean-square convergence of Fourier series 70
- 1.1 Vector spaces and inner products 70
- 1.2 Proof of mean-square convergence 76

2 Return to pointwise convergence 81
- 2.1 A local result 81
- 2.2 A continuous function with diverging Fourier series 83

3 Exercises 8
4 Problems 9

Chapter 4. Some Applications of Fourier Series 10
1 The isoperimetric inequality 10
2 Weyl's equidistribution theorem 10
3 A continuous but nowhere differentiable function 11
4 The heat equation on the circle 11
5 Exercises 12
6 Problems 12

Chapter 5. The Fourier Transform on $\mathbb{R}$ 12
1 Elementary theory of the Fourier transform 13
1.1 Integration of functions on the real line 13
1.2 Definition of the Fourier transform 13
1.3 The Schwartz space 13
1.4 The Fourier transform on $\mathcal{S}$ 13
1.5 The Fourier inversion 14
1.6 The Plancherel formula 14
1.7 Extension to functions of moderate decrease 14
1.8 The Weierstrass approximation theorem 14
2 Applications to some partial differential equations 14
2.1 The time-dependent heat equation on the real line 14
2.2 The steady-state heat equation in the upper half-plane 14
3 The Poisson summation formula 15
3.1 Theta and zeta functions 15
3.2 Heat kernels 15
3.3 Poisson kernels 15
4 The Heisenberg uncertainty principle 15
5 Exercises 16
6 Problems 16

Chapter 6. The Fourier Transform on $\mathbb{R}^d$ 17
1 Preliminaries 17
1.1 Symmetries 17
1.2 Integration on $\mathbb{R}^d$ 17
2 Elementary theory of the Fourier transform 18
3 The wave equation in $\mathbb{R}^d \times \mathbb{R}$ 18
3.1 Solution in terms of Fourier transforms 18
3.2 The wave equation in $\mathbb{R}^3 \times \mathbb{R}$ 18

3.3 The wave equation in $\mathbb{R}^2 \times \mathbb{R}$: descent 194
4 Radial symmetry and Bessel functions 196
5 The Radon transform and some of its applications 198
5.1 The X-ray transform in $\mathbb{R}^2$ 199
5.2 The Radon transform in $\mathbb{R}^3$ 201
5.3 A note about plane waves 207
6 Exercises 207
7 Problems 212

Chapter 7. Finite Fourier Analysis 218
1 Fourier analysis on $\mathbb{Z}(N)$ 219
1.1 The group $\mathbb{Z}(N)$ 219
1.2 Fourier inversion theorem and Plancherel identity on $\mathbb{Z}(N)$ 221
1.3 The fast Fourier transform 224
2 Fourier analysis on finite abelian groups 226
2.1 Abelian groups 226
2.2 Characters 230
2.3 The orthogonality relations 232
2.4 Characters as a total family 233
2.5 Fourier inversion and Plancherel formula 235
3 Exercises 236
4 Problems 239

Chapter 8. Dirichlet's Theorem 241
1 A little elementary number theory 241
1.1 The fundamental theorem of arithmetic 241
1.2 The infinitude of primes 244
2 Dirichlet's theorem 252
2.1 Fourier analysis, Dirichlet characters, and reduction of the theorem 254
2.2 Dirichlet L-functions 255
3 Proof of the theorem 258
3.1 Logarithms 258
3.2 L-functions 261
3.3 Non-vanishing of the L-function 265
4 Exercises 275
5 Problems 279

Appendix: Integration 281
1 Definition of the Riemann integral 281

1.1 Basic properties 2
1.2 Sets of measure zero and discontinuities of integrable functions 2
2 Multiple integrals 2
2.1 The Riemann integral in $\mathbb{R}^d$ 2
2.2 Repeated integrals 2
2.3 The change of variables formula 2
2.4 Spherical coordinates 2
3 Improper integrals. Integration over $\mathbb{R}^d$ 2
3.1 Integration of functions of moderate decrease 2
3.2 Repeated integrals 2
3.3 Spherical coordinates 2
