## CONTENTS

<b>Chapter 7 — Combinatorial Searching . . . . .</b>	<b>0</b>
<b>7.2. Generating All Possibilities . . . . .</b>	<b>0</b>
<b>7.2.1. Generating Basic Combinatorial Patterns . . . . .</b>	<b>0</b>
<b>7.2.1.1. Generating all <math>n</math>-tuples . . . . .</b>	<b>0</b>
<b>7.2.1.2. Generating all permutations . . . . .</b>	<b>0</b>
<b>7.2.1.3. Generating all combinations . . . . .</b>	<b>1</b>
<b>7.2.1.4. Generating all partitions . . . . .</b>	<b>36</b>
<b>7.2.1.5. Generating all set partitions . . . . .</b>	<b>61</b>
<b>Answers to Exercises . . . . .</b>	<b>87</b>
<b>Index and Glossary . . . . .</b>	<b>144</b>

*Quhen a word fales to be divyded at the end of a lyne,  
the partition must be made at the end of a syllab.*

— ALEXANDER HUME, *Orthographie . . . of the Britan Tongue* (c. 1620)
