Table of Contents

Modeling Issues

Schewe K.-D., Thalheim B., Zlatkin S. Modelling Actors and Stories in Web Information Systems	13
Ovchinnikov V. A Conceptual Modeling Technique Based on Semantically Complete Model, its Applications	25
Halpin T. Business Rule Verbalization	39

Transformation and Mapping

Amaneddine N., Bahsoun J.-P., Bodeveix J.-P. TransM: A structured document transformation model	53
Li Y., Liu D., Zhang W. A Data Transformation Method Based On Schema Mapping	67
Doroshenko A., Romanenko V. Object Relational Mapping Techniques for .Net Framework	81

Access Control and Scheduling

Psaila G., Biondi F. An Access Control Service for Dynamic and Hierarchical Resources: Declarative Model and Implementation on top of XACML	93
Prabhu N., Kumar V., Ray I. Periodic Scheduling in On-Demand Broadcast System	107

Integration and Query Support

Xu L., Embley D. W. Combining the Best of Global-as-View and Local-as-View for Data Integration	123
---	-----

Ermolayev V., Keberle N., Shapar V., Vladimirov V.
Ontology-Driven Sub-Query Extraction for Distributed Autonomous
Information Resources in UnIT-Net IEDI 137

Oh'Uchi H., Miura T., Shioya I.
Retrieval for Text Stream by Random Projection 151

Process Models and Organizational Change

Albertyn F., Zlatkin S.
The process of developing a business processes assembler 165

Karastoyanova D.
Applying Web Service Compositions in Systems Management 177

Marin I. O.
Where does Ubiquitous Computing Lead the Organization? 191

Short Presentation on Work in Progress

Lyaletski A., Doroshenko A., Paskevich A., Verchinine K.
Evidential Paradigm and Intelligent Mathematical Text Processing 205

Lamouchi O., Ramdane-cherif A., Lèvy N.
Enterprise Architecture Modeling using Agent Paradigm 213

Kuklenko D., Gamzayev R., Goloborodko V., Tkachuk M.
An Approach to Advanced Data Synchronization in Complex Process Control
Systems 221

Wei R.
On a Network Forensics Model For Information Security

Fu L., Goh D. H.-L., Foo S. S.-B., Supangat Y.
Query Graph Visualizer: A Collaborative Querying System 235

Jianfeng Y., Zhanhuai L.
A Novel Multimedia Data Model Supporting Temporal Semantic Abstraction 241
