Foreword	vi
by Helmer R. Myklebust	
Foreword to the First Edition	ix
by W. M. Cruickshank	
Preface	xii
Preface to the First Edition	xiv
Chapter 1 Neurology and Behavior: Some Professional Problems	1
Is the Medical Model a Help or a Threat?	3
Degrees of Brain Damage	9
Three Levels of Neuropsychological Investigation	13
Some Professional Problems	16
Conclusions	21
Chapter 2 Prevalence Estimates and Etiology of Learning Disabilities	23
Prevalence Estimates	24
Etiology	25
Problems of Definition	29
Is IQ Related to Learning Disabilities?	31
Definition	35
Conclusions	35
Chapter 3 The Nervous System and Learning	36
The Neurological Model of Behavior	36
How Neuroanatomy is Studied	38
The Neuron	38
Synaptic Theory of Learning and the Neural Trace	42
Gross Structure and Functions of the Central Nervous System	44
The Peripheral Nervous System	55
Sensory Pathways	57
Motor Pathways	63
The Reflex Arc	63
Cerebral Blood Supply	65
The Autonomic Nervous System	68
How Brain Functions Are Observed	70
Neural Organization	76
	xvii

	Clinical Addendum	81
	What the Clinical Psychologist Can Do	81
	What the Teacher Can Do	88
	Suggested Readings in Neuropsychology	89
Chapter 4	The Use of Neuropsychological Knowledge in Understanding Learning Disorders	90
	Adult and Child Neuropsychology	92
	Neuropsychological Tests	96
	Cerebral Laterality and Behavior	100
	Frontal Lobes	102
	Occipital Lobes	105
	Temporal Lobes	111
	Epilepsy and Brain Function	116
	Parietal Lobes	122
	Hyperactivity	131
	Environment, Learning, and the Brain	136
	Summary	137
	Clinical Addendum	140
	What the Clinical Psychologist Can Do	140
	A Cautionary Note to the School Psychologist	143
	What the Teacher Can Do	144
Chapter 5	Perceptual Disorders	145
	Sensation	146
	Perception	147
	Attention	149
	Lateral Asymmetries in Perception	151
	Visual Agnosia	153
	Auditory Imperception	155
	Sequencing	158
	Electrical Changes in Attention	165
	Cerebral Blood Flow and Changes in Attention	167
	Summary	169
	Clinical Addendum	170
	Case I: Left-Hemisphere Dysfunction	170
	Case II: Right-Hemisphere Dysfunction	173
	Summary Comment	176
Chapter 6	Sensory and Motor Pathways and Learning	178
	The Sensory and Motor Systems	178
	Sensorimotor Integration	181

	Clinical Addendum	81
	What the Clinical Psychologist Can Do	81
	What the Teacher Can Do	88
	Suggested Readings in Neuropsychology	89
Chapter 4	The Use of Neuropsychological Knowledge in Understanding Learning Disorders	90
	Adult and Child Neuropsychology	92

	Frontal Lobes	102
	Occipital Lobes	105
	Temporal Lobes	111
	Epilepsy and Brain Function	116
	Parietal Lobes	122
	Hyperactivity	131
	Environment, Learning, and the Brain	136
	Summary	137
	Clinical Addendum	140
	What the Clinical Psychologist Can Do	140
	A Cautionary Note to the School Psychologist	143
	What the Teacher Can Do	144
Chapter 5	Perceptual Disorders	145
	Sensation	146
	Perception	147
	Attention	149
	Lateral Asymmetries in Perception	151
	Visual Agnosia	153
	Auditory Imperception	155
	Sequencing	158
	Electrical Changes in Attention	165
	Cerebral Blood Flow and Changes in Attention	167
	Summary	169
	Clinical Addendum	170
	Case I: Left-Hemisphere Dysfunction	170
	Case II: Right-Hemisphere Dysfunction	173
	Summary Comment	176
Chapter 6	Sensory and Motor Pathways and Learning	178
	The Sensory and Motor Systems	178
	Sensorimotor Integration	181

Contents	xix
Basic Research in Tactile Perception	184
Basic Research in Motor Functions	185
Sensorimotor Functions and Learning	189
Neuropsychological Findings	194
Clinical Addendum	196
Three Cases of Parietal Dysfunctions	197
Chapter 7 Hemisphere Specialization, Handedness, and Lateralality	209
Cerebral Dominance	209
Interhemispheric Functions	229
Summary	235
Clinical Addendum	237
Measures of Handedness	237
Three Cases of Varying Cerebral Dominance and Handedness	238
The Clinical Classifications of Handedness	247
Continuum of Cerebral Lateralization	247
Should Handedness Be Changed?	248
Some References on Handedness Examinations and Inventories	249
Chapter 8 Language Development, Aphasia, and Dyslexia	251
Normal Language Development	253
Language and the Functional Anatomy of the Human Brain	255
Aphasia	260
Dyslexia	274
Developmental Aspects of Reading	314
Linguistic Awareness and Reading	317
Summary and a Perspective	318
Clinical Addendum	319
Kathleen: A Case of Auditory Imperception	319
Derrick White: A Case of Mild Receptive Aphasia	322
Chapter 9 The Neuropsychological Basis of Problems in Writing, Spelling, and Arithmetic	328
The Process of Writing	329
Dysgraphia and Aphasia	331
Arithmetic	355

Chapter 9 The Neuropsychological Basis of Problems in Writing, Spelling, and Arithmetic	328
	329
The Process of Writing	331
Dysgraphia and Aphasia	355
Arithmetic	

Arithmetical Aptitude, Nonverbal Learning, and Social Adjustment	362
Chapter 10 Remediation, Therapy, and the Learning-Disabled Child	370
Cognitive Processes and Cerebral Organization	371
What Is Meant by Remediation?	375
Classifications for Therapy	397
Summary	400
Chapter 11 Postscript	401
Basic Assumptions	401
Neuropsychological Principles	404
The Knowledge of Brain Structure and Function	407
A Cautionary Note	408
Appendix: Neuropsychological Tests	411
Glossary	414
References	425
Index of Names	470
Subject Index	480
