Contents

Preface xi
Acknowledgments xvii

Section I: Introduction

Chapter 1 Structural Equation Models: The Basics 3
Basic Concepts 4
The General Structural Equation Model 9
The General *Mplus* Structural Equation Model 15
Notes 17

Chapter 2 Using the *Mplus* Program 19
Mplus Notation and Input File Components and Structure 19
The *Mplus* Language Generator 26
Model Specification From Two Perspectives 27
The Concept of Model Identification 31
Overview of Remaining Chapters 39
Notes 40

Section II: Single-Group Analyses

Chapter 3 Testing the Factorial Validity of a Theoretical Construct: First-Order Confirmatory Factor Analysis Model 43
The Hypothesized Model 43
Mplus Input File Specification and Output File Results 48
Hypothesis 2: Self-Concept Is a Two-Factor Structure 89
Mplus Input File Specification and Output File Results 89
Hypothesis 3: Self-Concept Is a One-Factor Structure 91
Notes 93

Chapter 4 Testing the Factorial Validity of Scores From a Measuring Instrument: First-Order Confirmatory Factor Analysis Model 95
The Measuring Instrument Under Study 96
The Hypothesized Model 96
Mplus Input File Specification and Output File Results 101
Notes 121
Addendum 122

Chapter 5 Testing the Factorial Validity of Scores From a Measuring Instrument: Second-Order Confirmatory Factor Analysis Model 125
The Hypothesized Model 126
Analysis of Categorical Data 126
Mplus Input File Specification and Output File Results 133
Notes 146

Chapter 6 Testing the Validity of a Causal Structure: Full Structural Equation Model 147
The Hypothesized Model 147
Mplus Input File Specification and Output File Results 153
Post Hoc Analyses 168
Notes 188

Section III: Multiple-Group Analyses

Chapter 7 Testing the Factorial Equivalence of a Measuring Instrument: Analysis of Covariance Structures 193
Testing Multigroup Invariance: The General Notion 194
Testing Multigroup Invariance Across Independent Samples 197
The Hypothesized Model 197
Mplus Input File Specification and Output File Results 208
Notes 226

Chapter 8 Testing the Equivalence of Latent Factor Means: Analysis of Mean and Covariance Structures 227
Testing Latent Mean Structures: The Basic Notion 227
The Hypothesized Model 231
Testing Multigroup Invariance 231
Mplus Input File Specification and Output File Results 241
Testing Multigroup Invariance: Other Considerations 254
Notes 257

Chapter 9 Testing the Equivalence of a Causal Structure: Full Structural Equation Model 259
Cross-Validation in Structural Equation Modeling 259
Testing Invariance Across Calibration and Validation Samples 261
The Hypothesized Model 262
Mplus Input File Specification and Output File Results 264
Notes 282

Section IV: Other Important Topics

Chapter 10 Testing Evidence of Construct Validity: The Multitrait–Multimethod Model 285
The General CFA Approach to MTMM Analyses 286
The Hypothesized Model 287
Mplus Input File Specification and Output File Results 288
Examining Evidence of Construct Validity at the Matrix Level 295
Examining Evidence of Construct Validity at the Parameter Level 301
The Correlated Uniquenesses Approach to MTMM Analyses 303
Notes 311

Chapter 11 Testing Change Over Time: The Latent Growth Curve Model 313
Measuring Change in Individual Growth Over Time: The General Notion 316
The Hypothesized Dual-Domain LGC Model 316
Mplus Input File Specification and Output File Results 321
Hypothesized Covariate Model: Age and Surgery as Predictors of Change 338
Notes 344

Chapter 12 Testing Within- and Between-Level Variability: The Multilevel Model 345
Overview of Multilevel Modeling 346
The Hypothesized Model 350
Mplus Input File Specification and Output File Results 354
Notes 371
