Preface	xiii
Acknowledgments	xxi
List of Notations	xxiii
Part 1. Graphs and Trees	
Chapter 1. Directed Graphs	3
§1.1. Set Notations	3
§1.2. Graphs	5
§1.3. Directed Graphs	8
§1.4. Directed (m, n) -Graphs	10
§1.5. Exercises	16
§1.6. Notes	17
Chapter 2. Extra Structures on Graphs	19
§2.1. Edge Coloring	19
§2.2. Vertex Decoration	20
§2.3. Input Labeling	21
§2.4. Incoming Edge Labeling	24
§2.5. Isomorphisms with Extra Structures	26
§2.6. Exercises	27

Chapter 3. Rooted Trees	29
§3.1. Rooted Trees	30
§3.2. Profile of a Vertex	31
§3.3. Profile of a Rooted Tree	31
§3.4. Exceptional Edge and Corollas	32
§3.5. Simple Trees	34
§3.6. Level Trees	36
§3.7. Linear Graphs	40
§3.8. Exercises	40
Chapter 4. Collapsing an Internal Edge	43
§4.1. Motivation	43
§4.2. Defining the Quotient	44
§4.3. Examples	46
§4.4. Associativity	48
§4.5. Compatibility with Extra Structures	48
§4.6. Exercises	51
Chapter 5. Grafting of Rooted Trees	53
§5.1. Motivation	54
§5.2. Defining Grafting	55
§5.3. Examples	57
§5.4. Unity	60
§5.5. Horizontal Associativity	62
§5.6. Vertical Associativity	64
§5.7. Grafting Decomposition of Rooted Trees	66
§5.8. Exercises	72
Chapter 6. Grafting and Extra Structures	75
§6.1. Edge Coloring	75
§6.2. Vertex Decoration	76
§6.3. Input Labeling	77
§6.4. Incoming Edge Labeling	79
§6.5. Canonical Vertex Labeling	80
§6.6. Canonical Input Labeling	82
§6.7. Exercises	85

Part 2. Category Theory

Chapter 7. Basic Category Theory	89
§7.1. Categories	90
§7.2. Functors	98
§7.3. Natural Transformations	100
§7.4. Equivalence	105
§7.5. Coproducts	107
§7.6. Products	109
§7.7. Adjoint Functors	111
§7.8. Exercises	116
§7.9. Notes	119
Chapter 8. Symmetric Monoidal Categories	121
§8.1. Motivation for Monoidal Categories	121
§8.2. Monoidal Categories	122
§8.3. Monoidal Functors	125
§8.4. Mac Lane's Theorem	128
§8.5. Symmetry	130
§8.6. Permuting Iterated Tensor Products	132
§8.7. Symmetric Monoidal Closed Categories	135
§8.8. Standing Categorical Assumptions	137
§8.9. Exercises	139
§8.10. Notes	140
Chapter 9. Colored Symmetric Sequences and Objects	141
§9.1. Colors and Profiles	141
§9.2. Permutation Category	143
§9.3. Colored Symmetric Sequences	147
§9.4. Colored Objects	153
§9.5. Exercises	156
§9.6. Notes	158

Part 3. Operads and Algebras

Chapter 10. Motivation for Colored Operads	161
§10.1. Categories via Linear Graphs	161
§10.2. Colored Operads via Trees	164

Chapter 11. Colored Operads	173
§11.1. Block Permutations and Block Sums	173
§11.2. Defining Colored Operads	175
§11.3. Examples of the Axioms	181
§11.4. Initial and Terminal Colored Operads	185
§11.5. Changing the Base Category	190
§11.6. 1-Colored Operads	193
§11.7. Colored Non-Symmetric Operads	197
§11.8. Exercises	198
§11.9. Notes	200
Chapter 12. Operads in Arity 1	203
§12.1. Motivation for Monoids	203
§12.2. Monoids	205
§12.3. Small Enriched Categories	208
§12.4. Exercises	212
Chapter 13. Algebras over Colored Operads	215
§13.1. Motivation	215
§13.2. Defining Algebras	217
§13.3. Examples of the Axioms	219
§13.4. Visualizing Algebras	221
§13.5. Algebras over a 1-Colored Operad	222
§13.6. Algebras over a Colored Non-Symmetric Operad	224
§13.7. Motivation for Endomorphism Operads	225
§13.8. Colored Endomorphism Operads	226
§13.9. Algebra as a Map	231
§13.10. Exercises	232
§13.11. Notes	235
Chapter 14. Examples of Algebras	237
§14.1. Initial and Terminal Algebras	237
§14.2. Operad for Monoids	239
§14.3. Colored Operad for Monoid Maps	246
§14.4. Colored Operad for Colored Monoids	253
§14.5. Exercises	258

Chapter 15. Motivation for Partial Compositions	265
§15.1. Simplifying the Operadic Composition	265
§15.2. Operadic Composition to Partial Composition	267
§15.3. Partial Composition to Operadic Composition	270
§15.4. Associativity	271
§15.5. Unity	272
§15.6. Equivariance	273
Chapter 16. Colored Pseudo-Operads	275
§16.1. Partial Compositions of Profiles	275
§16.2. Defining Colored Pseudo-Operads	278
§16.3. Examples of the Axioms	285
§16.4. Colored Pseudo-Operads Are Colored Operads	289
§16.5. 1-Colored Pseudo-Operads	293
§16.6. Colored Non-Symmetric Pseudo-Operads	296
§16.7. Algebras via Partial Compositions	298
§16.8. Rooted Trees Operad	301
§16.9. Little Square Operad	305
§16.10. Exercises	309
§16.11. Notes	317
Part 4. Free Colored Operads	
Chapter 17. Motivation for Free Colored Operads	321
§17.1. Free Monoids	321
§17.2. Heuristic Free Colored Non-Symmetric Operads	327
§17.3. Heuristic Free Colored Operads	330
§17.4. Exercises	332
Chapter 18. General Operadic Composition	333
§18.1. Decoration by a Colored Object	333
§18.2. Defining General Operadic Composition	340
§18.3. Associativity	347
§18.4. Exercises	350
Chapter 19. Free Colored Non-Symmetric Operads	351
§19.1. Entries and Structure Maps	352
§19.2. Colored Non-Symmetric Operad Structure	357

§19.3. The Adjunction	361
§19.4. Motivation for Tree Operads	370
§19.5. Colored Non-Symmetric Operad Generated by a Tree	372
§19.6. Exercises	379
Chapter 20. Free Colored Operads	381
§20.1. Colored Non-Symmetric Operads to Colored Operads	382
§20.2. Symmetrization	389
§20.3. Free Colored Operad of a Colored Object	394
§20.4. Colored Operad Generated by a Tree	404
§20.5. Exercises	408
Further Reading	409
Bibliography	413
List of Main Facts	419
Index	423
