List of contributors, ix

Preface, xi

A century of parasitology: 1914–2014, 1

John Janovy, Jr

Part I: Systematics and Diversity

Watson, M. E. 1915. Some new gregarine parasites from Arthropoda. *Journal of Parasitology* **2**: 27–36.

Parasitic protozoology and the scientific lessons of intellectual elegance, 7

Richard E. Clopton

Linton, E. 1916. Notes on two cestodes from the spotted sting-ray. *Journal of Parasitology* **3**: 34–38.

Helminth biodiversity research transformed by a century of evolutionary thought, 21

Janine N. Caira and Kirsten Jensen

Van Cleave, H. J. 1914. *Eorhynchus*: A proposed new name for *Neorhynchus hamann* preoccupied. *Journal of Parasitology* **1**: 50–51.

Acanthocephala in *The Journal of Parasitology*, 1914–2014, 40

Omar M. Amin

Linton, E. 1915. *Tocotrema lingua* (Creplin): The adult stage of a skin parasite of the cunner and other fishes of the Woods Hole region. *Journal of Parasitology* **1**: 128–134.

A century (1914–2014) of studies on marine fish parasites published in *The Journal of Parasitology*, 57

Victor Manuel Vidal-Martínez, Edgar Torres-Irineo and Ma. Leopoldina Aguirre-Macedo

Part II: Ecology and Life History

McCoy, O. R. 1928. Seasonal fluctuation in the infestation of *Planorbis trivolvis* with larval trematodes. *Journal of Parasitology* **15**: 121–126.

An overview of the history and advances in the population ecology of parasites, 77

David J. Marcogliese and Cameron P. Goater

Nadler, S. A. 1995. Microevolution and the genetic structure of parasite populations. *Journal of Parasitology* **81**: 395–403.

History of microevolutionary thought in parasitology: The integration of molecular population genetics, 93

Charles D. Criscione

Cross, S. X. 1934. A probable case of non-specific immunity between two parasites of ciscoes of the Trout Lake region of northern Wisconsin. *Journal of Parasitology* **20**: 244–245.

The worm's eye view of community ecology, 110

Tavis K. Anderson and Michael V. K. Sukhdeo

Ransom, B. H., and Hall, M. C. 1915. The life history of *Gongylonema scutatum*. *Journal of Parasitology* **2**: 80–86.

The iron wheel of parasite life cycles: Then and now!, 131

Matthew G. Bolek, Heather A. Stigge and Kyle D. Gustafson

Jacobs, L., Remington, J. S., and Melton, M. L. 1960. A survey of meat samples from swine, cattle, and sheep for the presence of encysted *Toxoplasma*. *Journal of Parasitology* **46**: 23–28.

Transmission of *Toxoplasma gondii*—From land to sea, a personal perspective, 148

J. P. Dubey

Part III: Host-Parasite Interactions—The Challenge

Todd, J. L. 1914. Tick paralysis. *Journal of Parasitology* **1**: 55–64.

Tick paralysis: Some host and tick perspectives, 167

Lance A. Durden and Ben J. Mans

Bemrick, W. J. 1961. Effect of low temperatures on trophozoites of *Giardia muris*. *Journal of Parasitology* **47**: 573–576.

***Giardia intestinalis* biochemistry and regulation: An evolutionary tale, 177**

Edward L. Jarroll and Timothy A. Paget

Sarles, M. P. 1932. Development of acquired resistance in rabbits by repeated infection with an intestinal nematode, *Trichostrongylus calcaratus* Ransom, 1911. *Journal of Parasitology* **19**: 61–82.

The early history of immunoparasitology in the United States, 189

Raymond E. Kuhn

Hall, M. C. 1926. Some practical principles of anthelmintic medication. *Journal of Parasitology* **13**: 16–24.

Chemotherapy of helminth infections: A centennial reflection, 202

William C. Campbell

Anthelmintic drug discovery: Into the future, 215

Timothy G. Geary, Judy Sakanari and Conor R. Caffrey

Part IV: The First Figures Published in *The Journal of Parasitology*

The Journal of Parasitology as a visual experience: Ten landmark figures, 229

First figure published in *The Journal of Parasitology*: Stanley Fracker's proposal for quantifying the structural features of a nematode, 230

First new species figure: *Stenophora diplocorpa* from the intestine of *Euryurus erythropygus*, 230

First photomicrograph published in *The Journal of Parasitology*: A sarcocyst from an opossum, 231

First transmission electron micrograph published in *The Journal of Parasitology*: sections of *Trypanosoma equiperdum*, 232

First scanning electron micrograph published in *The Journal of Parasitology*: Surface architecture of schistosome cercariae, 233

First digital light micrograph published in *The Journal of Parasitology*: Trophic stages of *Torogregarina sphinx*, 234

First figure of a pathological condition: *Endameba gingivalis* in a pyorrheal pocket, 235

First figure of a seasonal fluctuation in parasite abundance: Cercariae from a planorbid snail, 236

First modern figure of a phylogeny published in *The Journal of Parasitology*, 237

First life cycle diagram, similar to what would be in a textbook, published in *The Journal of Parasitology*, 238

Part V: Overview and Conclusions

Reflections: Closing comments for the centennial celebration of *The Journal of Parasitology*, 241

Gerald W. Esch
