Preface	ix
Contents	xvii
The Author	xix
1. Introduction: Relationship of Behavior and Cancer	1
Racial Differences in Incidence and Survival • Cancer as a Disease: Tumor Biology • Causes of Cancer • Concept of Host Vulnerability	
2. Direct Contributors to Cancer: Sun Exposure, Alcohol and Tobacco Use, and Occupational Hazards	13
Geophysical Factors: Ionizing Radiation and Ultraviolet Light • Alcohol and Tobacco Use • Occupation and Cancer Risk • The World of Work and Everyday Social Reality	
3. Indirect Contributors to Cancer: Sexual Behavior and Diet	50
Sexual Behavior and Cancer Risk: Risk Factors for Gynecological Cancers; Acquired Immune Deficiency, Malignancy, and Sexual Life-Style • Diet and Cancer Risk: Poverty, Nutritional Deficit, and Cancer Risk; Specific Dietary Components in Cancer Prevention and Risk; Role of Nutrition in Cancer Treatment • Summary of Findings and Recommendations	

4.	Progression of Cancer: Role of Screening, Early Detection, and Compliance with Treatment	80
	Reasons for Delays in Seeking Diagnosis • Specific Screening and Early-Detection Technologies • Effects of Delay in Diagnosis of Suspicious Symptoms • Role of Physicians and Health Care Agencies in Promoting Early Detection • Compliance with Therapeutic Regimens • A Cautionary End Note	
5.	Central Nervous System Mechanisms and Immunity: Implications for Tumor Response	120
	<i>by Steven J. Schleifer, Steven E. Keller, and Marvin Stein</i>	
	Psychosocial Factors and Immunity • Stress and Humoral Immune Responses • Brain Effects on Immunity • Mediation of Brain and Behavioral Effects on Immune Function	
6.	Psychosocial Factors and the Hormonal Regulation of Tumor Growth	134
	<i>by Marc E. Lippman</i>	
	Effects of Hormone-Dependent Neoplasia • Hormonal Effects on Other Somatic Systems • Consequences of Hormone-Induced Changes in Neoplasia	
7.	Behavioral Factors Contributing Directly to Progression of Cancer	148
	Problems in Human and Animal Studies • Breast Cancer Studies • Coping and Prognosis for Breast Cancer and Melanoma • Summary of Clinical Findings • Animal Studies on Behavioral Helplessness • Behavioral Implications	
8.	Conclusion: Behavioral Implications for Decreasing Cancer Risk	181
	Risk Factors and Implications • The Cancer Experience: The Heart of Our Topic
