

Contents

Section 1: Methodological Problems

| | |
|--|----|
| 1. The Role of Individual Differences in Psychophysiological Research <i>David T. Lykken</i> | 3 |
| 2. Some Experimental Implications of Change <i>Roy B. Mefferd, Jr.</i> | 16 |
| 3. Experimenter-Subject-Situational Interactions <i>Margaret J. Christie and Judy L. Todd</i> | 50 |

Section 2: States

| | |
|--|-----|
| 4. Sympathetic-adrenomedullary Activity, Behaviour and the Psycho-social Environment <i>Marianne Frankenhaeuser</i> | 71 |
| 5. Physiological Consequences of Informational Load and Overload <i>B. McA. Sayers</i> | 95 |
| 6. Sleep <i>Laverne C. Johnson</i> | 125 |
| 7. Sleep Deprivation in Humans <i>P. Naitoh</i> | 153 |
| 8. Psychophysiology of the Menstrual Cycle <i>Brian Bell, Margaret J. Christie and Peter H. Venables</i> | 181 |
| 9. Pleasure <i>Robert M. Stern, Jo-Ann H. Farr and William J. Ray</i> | 208 |
| 10. The Psychosocial Environment and Precursors of Disease <i>Margaret J. Christie</i> | 234 |
| 11. The Affective Disorders <i>Malcolm Lader and Peter Noble</i> | 258 |
| 12. Psychophysiological Studies of Schizophrenic Pathology <i>P. H. Venables</i> | 282 |
| 13. Psychopathy <i>Robert D. Hare</i> | 325 |

Section 3: Psychology and Psychophysiology

| | |
|---|-----|
| 14. The Sensitivity of the Evoked Potential to Psychological Variables <i>Samuel Sutton and Patricia Tueting</i> | 351 |
| 15. Psychophysiology and Conditioning <i>Irene Martin</i> | 364 |

| | |
|--|-----|
| 16. Psychophysiology and Human Memory <i>Fergus I.M. Craik and Kirk R. Blankstein</i> | 389 |
| 17. Progress in Psychophysiology: Some Applications in a Field of Abnormal Psychology <i>Peter H. Venables</i> | 418 |
| Index | 439 |
