<i>Preface</i>	v
<i>List of contributors</i>	vii
CHAPTER 1. EARLY THEORY OF HYPNOSIS - <i>Leon Chertok</i>	1
Introduction	1
The problems	1
The Saltpetiere school	2
The Nancy school	3
Janet and Freud	4
Neurophysiological hypothesis	5
Theories derived from experimental psychology	6
Psychoanalytical theories	6
Attempts at synthesis	8
Conclusions	9
Summary	10
CHAPTER 2. EGO-PSYCHOLOGICAL PARAMETERS OF HYPNOSIS AND ALTERED STATES OF CONSCIOUSNESS - <i>Erika Fromm and Stephen W. Hurt</i>	13
Introduction	13
Primary and secondary process	14
Ego activity, passivity and receptivity	15
Individual cognitive studies	17
Development of an altered states of consciousness typology	19
Studies of self-hypnosis	20
An ego-psychological approach to hypnosis	21
Towards a comprehensive model of consciousness in altered states of con- sciousness	23
CHAPTER 3. ON THE CONSTRUCT OF HYPNOSIS: HOW ITS DEFINI- TION AFFECTS RESEARCH AND ITS CLINICAL AP- PLICATION - <i>Martin T. Orne</i>	29

Hypnosis as behavioural compliance	29
Why is hypnosis a compelling phenomenon?	32
The alteration of subjective experience in hypnosis	33
Hypnosis – actual state or elaborate hoax?	33
The definition of hypnosis	35
The reality of hypnosis	37
The mechanisms by which hypnosis is explained	37
Does a formal hypnotic induction procedure result in unique changes?	38
Transcendence of normal volitional capacities and the correspondence of subjective experience and verbal report	39
Some methodological considerations	39
An example from hypnotic age regression	41
Other issues of transcendence of normal volitional capacities	42
Hypnotic phenomena that cannot be explained as volitional role playing	43
Conclusions	46
CHAPTER 4. PSYCHOPHYSIOLOGICAL OUTCOMES OF HYPNOSIS – <i>Theodore R. Sarbin and Robert Slagle</i>	53
Introduction	53
Classification of organ systems	54
Effects on organ systems in hypnosis	55
Arnold’s neurophysiological theory	61
Kraibe’s pavlovian theory	62
Robert’s bioelectrodynamical theory	63
Concluding statement about psychophysiological theories of hypnosis	64
CHAPTER 5. PHENOMENA OF HYPNOSIS: 1. AGE REGRESSION – <i>George Foenander and Graham D. Burrows</i>	67
Introduction	67
Experimental studies	68
Physiological studies	68
Psychological studies	70
Summary and findings	75
Technique, methodology and conceptual issues in age regression	75
Techniques of age regression	76
Methodology	77
Conclusion	81
CHAPTER 6. PHENOMENA OF HYPNOSIS: 2. POSTHYPNOTIC AMNESIA – <i>Frederick J. Evans</i>	85
The phenomenology of hypnotic amnesia	85
Posthypnotic source amnesia	86
Posthypnotic amnesia as a disruption of retrieval processes	88
Generic (vague) recall	90
Disruption of retrieval processes during posthypnotic amnesia	91
Temporal disorganization during Posthypnotic amnesia	92
Disorganized retrieval and the neglect hypothesis of amnesia	96
Poor memory: partial recall of past experiences	98

Posthypnotic amnesia – a brief synthesis	100
CHAPTER 7. CLINICAL ASSESSMENT AND PREPARATION OF THE PATIENT – <i>Harold B. Crasilneck</i>	105
Introduction	105
Clinical assessment	106
Rapport	107
Motivation	107
Paranoid patients	113
The masochist	114
Drug addicts	114
Severely depressed suicidal patients	115
Preparation of the patient	115
CHAPTER 8. HYPNOTIZABILITY AND RATING SCALES – <i>David J. De L. Horne and Vicky Powlett</i>	119
Introduction	119
Hypnotic susceptibility scales reviewed	121
The Stanford scales	121
The Harvard group scale of hypnotic susceptibility	123
The children's hypnotic susceptibility scale	124
The hypnotic induction profile	125
The Barber suggestibility scale	126
The creative imagination scale	126
The diagnostic rating scale	127
The Stanford hypnotic clinical scale	128
Conclusion	129
CHAPTER 9. INDUCTION TECHNIQUES – <i>Herbert Spiegel and David Spiegel</i>	133
Introduction	133
Definition	134
Trance inductions: legitimate and illegitimate	134
Coercion	135
Seduction	135
Guidance	136
The aura	136
The interpersonal relationship	137
Psychophysiological enhancement	141
The plunge	142
Induction or deduction? The importance of measurement	143
The hypnotic induction profile	144
Conclusion	145
CHAPTER 10. AFFECTIVE DISORDERS AND HYPNOSIS – <i>Graham D. Burrows</i>	149

Introduction	149
Anxiety	149
Anxiety and fear	150
Occurrence of anxiety	151
Clinical aspects of anxiety	152
The therapist's anxiety	153
Physical illness	153
Treatment of anxiety	154
Hypnosis and anxiety	155
Pharmacotherapy of anxiety	156
Which antianxiety agent?	157
Depressive illness	157
Classification of depression	159
Unipolar and bipolar affective illness	159
Involitional melancholia	160
The amine hypothesis of affective disorders	161
Affect and hormones	161
Treatment of depression	162
Management of depression	162
Antidepressant pharmacotherapy	162
Stimulants	163
Tricyclic antidepressants	163
Dosage regimen of tricyclics	163
Side effects and toxicity of tricyclics	164
Plasma tricyclic levels and clinical response	164
New antidepressants	164
Monoamine oxidase inhibitors (MAOIs)	165
Lithium	166
Hypnosis and depression	167
CHAPTER 11. PHOBIC DISORDERS AND HYPNOSIS - <i>Fred H. Frankel</i>	171
Introduction	171
Phobic disorders as a clinical entity	171
Aetiology	172
Psychoanalytic theory	173
Learning theory	173
Therapy	175
Psychoanalytically oriented therapy in conjunction with hypnosis	176
Learning theory in conjunction with hypnosis	177
The use of hypnosis	178
An alternative theory	179
The effect of hypnosis in the therapy of phobic behaviour	181
CHAPTER 12. HYPNOSIS IN FAMILY MEDICINE - <i>J. Arthur Jackson and Harvard N. Merrington</i>	185
Introduction: the casework of the family doctor	185
Selection: the patient, the disorder, the therapy	187
Depression	190
Simple ad hoc hypnotic applications	190
Formal use of hypnosis	191

Use of Hypnosis in gynaecology	192
Menstrual irregularities	193
Terminal illness	193
Hypertension	194
Skin disease	195
Smoking and obesity	195
Devising the therapeutic programme	197
Autohypnosis	198
Qualities of therapist	199
Significance of trance depth	200
Some associated problems	201
The problem of time	201
Patient dependency	201
Psychiatric contraindications	202
Summary	202
CHAPTER 13. HYPNOSIS WITH CHILDREN – <i>G. Gail Gardner and Richard M. Hinton</i>	205
A brief history of hypnosis with children	205
Norms of hypnotizability in children	206
Correlates of hypnotizability in children	209
Attitudes toward child hypnosis	214
Hypnotic induction and deepening techniques with children	215
Child hypnotherapy for medical and surgical problems	216
Child hypnotherapy for emotional difficulties, habit disorders, and learning problems	223
Considerations for the future of child hypnosis	226
CHAPTER 14. HYPNOSIS IN THE TREATMENT OF PAIN – <i>Ernest R. Hilgard</i>	233
Introduction	233
The problem of pain	233
Clinical applicability of hypnosis	234
Cancer	234
Burns	235
Obstetrics	235
Dentistry	236
Headaches	236
Phantom limb pain	237
Other symptoms	237
Techniques used in the hypnotic treatment of pain	237
Direct suggestion for the reduction of pain	237
The use of neurophysiological metaphors	238
Transference of glove anesthesia	238
Displacement or alteration of the painful symptom	239
Dissociation through imagination	239
Reinterpreting the pain	239
Adapting methods to individual hypnotic talent	239
Self-hypnosis	241

Investigatory methods for studying the control of pain	241
Laboratory methods in the study of pain	242
Clinical methods for studying pain relief	245
The results of laboratory investigations of hypnosis in relation to pain	248
Hypnosis not a placebo	250
Hypnotic pain reduction not simply relaxation or anxiety reduction	251
The hidden observer in analgesia	252
Results of clinical investigations of hypnosis in relation to pain	255
Obstetrics	255
Cancer	256
Children's reaction to therapy for leukemia	257
Burns	258
Dentistry	259
Concluding remarks on clinical investigation	260
Hypnosis in relation to other therapies for pain	260
Chemoanaesthesia	260
Acupuncture	261
Behaviour therapies	261
Biofeedback	262
Relaxation therapies	263
Psychodynamic therapies	263

CHAPTER 15. CHRONIC PAIN AND HYPNOSIS – *Diana Elton, Graham D. Burrows and Gordon V. Stanley*

Introduction	269
Part 1: psychological profile of pain-proneness	270
Aims of the study	271
Method	272
Results	274
Discussion	275
Part 2: comparison of treatments by hypnosis, placebo and behavioural psychotherapy	276
Method	277
Results	277
Discussion	277
Hypnosis and biofeedback	280
Results	281
Discussion	282
Part 3: treatment approaches	282
Contractual relationship	283
Improving self-esteem	283
Assertiveness training	283
Posthypnotic suggestions	283
Autogenic training	284
General homework	284
Specific techniques for pain relief	284
Imagery techniques 'The secret room'	284
Part 4: patient histories	285
Case 1	286
Case 2	287
Case 3	288

Case 4	289
CHAPTER 16. HYPNOSIS AND ANAESTHESIA - <i>Brasil Finer</i>	293
Introduction	293
Description	294
Physiology	296
Pain	296
Hypnosis	296
Author's own experience	297
Hypnosis for preoperative, operative and postoperative control of anxiety and pain	298
Burns	298
Various veins	299
Minor surgery	300
Minor oncological procedures	300
Dental	301
Local anaesthesia supplemented with hypnosis	301
Failed hypnotic anaesthesia requiring pharmacological supplementation	302
Discussion	303
CHAPTER 17. HYPNOSIS AND OBSTETRICS - <i>Peter Stone and Graham D. Burrows</i>	307
Introduction	307
The purpose of preparation for childbirth	307
Review of ante-natal training programmes	309
Dick-Read method	309
Psychoprophylactic method	309
Leboyer method	310
Childbirth education	310
The value of ante-natal preparation	310
Hypnosis and childbirth	311
Features of hypnosis in childbirth	311
Application	311
Pain control	312
Other benefits	312
Techniques	312
Possible disadvantages of hypnosis	313
Inability to predict response to hypnosis	314
Adverse attitudes towards hypnosis	315
Advantages of hypnosis in children	316
General	316
Specific advantages	316
Details of methods of hypnotic preparation	319
Details of hypnotic procedures used in ante-natal preparation	321
Conclusions	323
CHAPTER 18. HYPNOSIS AND RESPIRATORY DISEASE - <i>David R. Collison</i>	327
Introduction	327

Bronchial asthma	327
Hyperventilation	331
Hiccups	332
Coughing	333
Control of smoking	333
CHAPTER 19. HYPNOSIS AND PSYCHOSEXUAL DYSFUNCTION - <i>Lorraine Dennerstein</i>	341
Introductions	341
Hypnosis and psychosexual disorders	342
Unrealistic expectations	343
Psychosexual dysfunction	343
Aetiology of psychosexual dysfunction	344
Symptomatic	344
Learned	347
Intrapsychic conflict	348
Sexual assessment	349
Sexual history	349
Examination	351
Management	352
Sexual dysfunction or abnormal expectations?	352
Is the sexual dysfunction symptomatic of another problem?	352
Is there acceptance of one's own sexuality?	353
Sexual interaction problems	354
A clinical study	354
Cautions in the use of hypnosis	355
Conclusion	356
CHAPTER 20. HYPNOSIS AND SPORTS MEDICINE - <i>William P. Morgan</i>	359
Overview of sports medicine	359
Use of hypnosis in sports medicine	360
Experimental research	362
Clinical applications	368
Summary	373
CHAPTER 21. HYPNOSIS AND SCHIZOPHRENIA: A REVIEW OF EX- PERIMENTAL AND CLINICAL STUDIES - <i>Germain Lavoie and Michel Sabourin</i>	377
Introduction	377
Part one: experimental studies	378
Waking suggestibility	378
Hypnotic susceptibility	381
Posthypnotic amnesia	391
From experimental to clinical concerns	396
Part two: clinical studies	396
First view: that schizophrenics can hardly be hypnotized	396
Second view: therapeutic hypnosis with schizophrenics is dangerous	399
Third view: hypnosis is not bad, but other modalities are better	400

Fourth view: hypnosis can help in many ways	400
Fifth view: the troubling analogy between hypnosis and schizophrenia	410
Epilogue	411
CHAPTER 22. HYPNOSIS AND TERMINAL ILLNESS - <i>Paul Sacerdote</i>	421
Introduction	421
Selection and training of physicians and psychologists for the use of hypnosis in terminally ill patients	423
Introducing the patient to hypnosis	424
Introducing physicians to hypnosis	426
Hypnosis for the family of the terminally ill patient	428
The use of hypnosis in the treatment of the terminally ill patient	429
Techniques	432
Case reports	437
Conclusions	440
CHAPTER 23. HYPNOSIS AND DENTISTRY - <i>Jack A. Gerschman, Peter C. Reade and Graham D. Burrows</i>	443
Introduction	443
Historical development	443
Psychology of the oro-facial region	444
Indications for the use of hypnosis	446
Clinical applications of hypnosis in dentistry	446
Control of anxiety and fear	447
The production of dental analgesia	450
The control of syncope	454
Anaesthesia and sedation techniques	455
The control of gagging	457
The control of salivation	459
The control of bleeding	459
The control of postoperative pain and discomfort	462
The elimination of thumb-sucking and tongue-thrusting	463
Paediatric dental hypnosis	465
Psychosomatic oral problems	466
Miscellaneous uses of hypnosis in dentistry	472
Disadvantages and limitations in the use of hypnosis	472
Cautions and precautions in the use of hypnosis	474
Summary and conclusions	475
CHAPTER 24. HYPNOSIS IN GROUPS AND GROUP HYPNOTHERAPY - <i>Bennett B. Braun</i>	481
Group hypnosis overview	481
History	481
Group type and composition	482
Phases of hypnotic work and stages of group development	483
Curative features of groups	485
Hypnosis in groups	485
Groups related to physical health care	486

Groups for increasing productivity	487
Personal growth and encounter groups	487
Psychotherapy groups formed by diagnosis	487
General considerations for group hypnotherapy	488
Indications, contraindications and cautions	488
Cotherapy considerations	489
The introduction of hypnosis to the group	490
Choice of techniques	491
Hypnotherapeutic techniques in group therapy	491
Techniques for the individual in the group setting	491
Techniques for individuals interacting in a group setting and hypnodrama	492
Techniques for working with the group as a whole	493
Conclusions	493
CHAPTER 25. AUTOGENIC TRAINING AND PSYCHOSOMATIC MEDICINE - <i>Dietrich Langen</i>	497
Introduction	497
The passive autohypnoid procedures	498
The active autohypnoid methods	498
Prerequisites for autogenic training	501
Description of autogenic training	503
CHAPTER 26. HYPNOTHERAPY AND BEHAVIOUR MODIFICATION - <i>William S. Kroger</i>	509
Introduction	509
Programme phases of the hypnobehavioural mode	511
Historo-diagnosis	511
Hypnotic induction	511
Autohypnosis	511
Imagery conditioning	512
Posthypnotic suggestions on affirmations	513
Hypnobehavioural approach	515
Symptom-manipulation	515
Holistic approach	515
CHAPTER 27. RESEARCH IN HYPNOSIS: AN OVERVIEW OF CURRENT METHODS - <i>Peter W. Sheehan and Campbell W. Perry</i>	517
Introduction	517
Some problem issues and approaches to research	518
The relevance of imagination	518
The influence of artifact	518
Transcendence of waking levels of performance	519
Generality of design	521
Same-subject design	522
General features	522
Holding back	523
Control of series effects	524
Summary	524

Between-subjects design	525
General features	525
Supplementation with base-rate data	526
Summary	527
Sampling control procedures in hypnosis	527
Definition, function and purpose	527
Types of control	528
Rules of logic for making inferences about hypnosis	530
Summary	532
Sampling of experimental procedures	533
Definition, function and purpose	533
Summary	534
Summary of guidelines to methodological practice	534
Strong and weak inferences about hypnosis	535
Principles of practice	535
Conclusion	538
INDEX	543
