<i>List of Contributors</i>	<i>xiii</i>
<i>Preface</i>	<i>xvii</i>

INTRODUCTION

An Overview of Behavioral Medicine: Opportunities and Dangers	3
NEAL E. MILLER	
Factors Producing the Upsurge of Interest in Behavioral Medicine	3
Opportunities and Dangers	4
The Need for Understanding of the Time-Consuming but Cost-Effective Role of Basic Research	5
The Need for Developmental Research	5
Stress and Coping	6
Complexities Increase the Danger of Premature Applications	8
Predictability of Human Behavior	9
Value of Simple Ideas	10
A Formula for Success	10
Learning from the Advertising Profession	10
Value to Behavioral Science of Exposure to Medicine	11
Difficulties Inherent in Interdisciplinary Work	12
Factors Leading to Overestimates of Therapeutic Effectiveness	13
Role of Learning	14
Role of Electronic Advances in Facilitating Applications of Learning	17
Correcting a Homeostatic Defect in Patients with High Spinal Lesions	17
Wider Role of Visceral Learning in Homeostatis	19
References	21

CARDIOVASCULAR DISEASE

Environmental and Behavioral Influences in the Major Cardiovascular Disorders	25
ROBERT S. ELIOT AND JAMES C. BUELL	
Psychosocial Stress in Animals	26
Psychosocial and Behavioral Factors in Human Cardiovascular Disease	29
References	36
Behavioral Factors in the Etiology and Pathogenesis of Cardiovascular Diseases: Sudden Death, Hypertension, and Myocardial Infarction	41
C. DAVID JENKINS	
Atherosclerotic Diseases	41
Social Deprivation	43
Chronic Disturbing Emotions	46
Type A Behavior Pattern	48
Hypertension	49
Summary	53
References	53
Behavioral Factors in the Physiological Mechanisms of Cardiovascular Disease	55
J. ALAN HERD	
Behavioral Adjustment after Myocardial Infarction: A Selective Review of Recent Descriptive, Correlational, and Intervention Research	67
THOMAS F. GARRITY	
Organization of the Review	67
Recovery during Hospitalization	67
Recovery after Discharge from Hospital	73
Methodological Critiques of the Field	79
Recommendations for Future Research Activity	80
References	82

Clinical Trials of Changing Behavior to Prevent Cardiovascular Disease	89
STEPHEN B. HULLEY AND STEPHEN P. FORTMANN	
The Multiple Risk Factor Intervention Trial	90
Stanford Five-City Project (5CP)	92
Commentary	93
Conclusions	97
References	97
NEOPLASTIC DISEASE	
Behavioral Issues in Cancer	101
BERNARD H. FOX	
Epidemiology	102
Prevention	107
Detection	112
Diagnosis	114
Treatment	116
Rehabilitation	123
Continuing Care	124
Terminal Illness	125
The Posthumous Phase	127
Conclusion	127
References	128
Epidemiological Aspects of Biobehavior in the Etiology of Cancer: A Critical Review	135
FLORENCE R. MORRISON AND RALPH A. PAFFENBARGER, JR.	
Catastrophic Events and Cancer	137
Animal Experiments	140
Personality Traits and Cancer	142
Summary	155
References	155
Behavioral Influences on Immune Responses	163
ROBERT ADER	
Disease Susceptibility	166
Immunologic Reactivity	170
Conditioning Effects	173
Summary	178
References	179

Biobehavioral Factors in Animal Work on Tumorigenesis	183
VERNON RILEY	
Introduction	183
Selected Studies on Stress and Cancer	184
Considerations Relevant to Experimental Design in Stress Studies	194
Summary	204
Bibliography	204
Biobehavioral Approaches to Cancer Prevention and Detection	215
LAWRENCE W. GREEN, BARBARA RIMER, AND THOMAS W. ELWOOD	
A Model for Educational Diagnosis and Planning	216
The Diagnostic Steps in Cancer Education	218
Multiple Causation and Interdisciplinary Participation	219
The Literature of Cancer Education	220
Fear	223
Detection	224
Delay	228
Informed Consent in Cancer Epidemiology and Prevention	229
Summary and Conclusions	230
References	231
Psychiatric, Psychosocial, and Behavioral Interventions in the Treatment of Cancer: An Historical Overview	235
JIMMIE C. HOLLAND AND JULIA H. ROWLAND	
Introduction	235
Psychotherapeutic Approach	238
Psychopharmacologic Approach	245
Behavioral Approaches	247
Possible New Directions for Interventions	250
Research Approaches to the Search for New Interventions	253
Summary	255
Bibliography	256
Current Behavioral, Social, and Educational Programs in Control of Smoking: A Selective Critical Review	261
RICHARD I. EVANS, PETER C. HILL, BETTYE E. RAINES, AND ALLEN H. HENDERSON	
Current Smoking Trends	261
Format of the Review	262
Some Concluding Remarks	279
References	280

WORKING GROUPS

Life Events, Stress, and Social Milieu	287
GEORGE STONE	
Physiological Concomitants of Behavioral Processes	293
JOHN I. LACEY	
Animal Models in Research	297
J. ALAN HERD	
Intervention Strategies	301
A. BARNEY ALEXANDER	

SPECIAL TOPICS

Inhibitory Behavioral Stress Effects upon Blood Pressure Regulation	307
DAVID E. ANDERSON	
Environmentally Induced Cardiovascular Response in Type A and B Individuals	321
THEODORE M. DEMBROSKI	
Effects of Presumably Stressful Stimulation (PSS) on the Development of Animal Tumors: Some Issues	329
BENJAMIN H. NEWBERRY	
The Human Research Context	330
General Characteristics of Findings on Psychobiological Factors and Animal Cancer	333
Tumor System Variables	335
Temporal Characteristics of Stimulation	338
Intensity and Related Variables	340
Physiological Mechanisms	344
Conclusions	345
References	346

Beta-adrenergic Hyperreactivity and Behavioral Stress: A Precursor to Established Essential Hypertension?	351
PAUL A. OBRIST, KATHLEEN C. LIGHT, JANICE L. HASTRUP, AND ALAN W. LANGER	
Animal Models in Biobehavioral Research: Effects of Anxiety Stress on Immunocompetence and Neoplasia	371
VERNON RILEY, M. A. FITZMAURICE, AND DARREL H. SPACKMAN	
Introduction	371
Materials and Methods	375
Results	378
Discussion	394
Summary	396
References	397
Psychological and Physiological Correlates of Type A Behavior Pattern	401
REDFORD B. WILLIAMS, JR., THOMAS HANEY, AND JAMES A. BLUMENTHAL	
<i>Subject Index</i>	407
