

# Contents

<i>Contributors</i>	<i>ix</i>
<i>Preface</i>	<i>xiii</i>
<b>1 Toward a Conjunction of Biomedical and Behavioral Sciences</b>	<b>1</b>
DAVID A. HAMBURG	
The Burden of Illness	1
Collaboration	2
The Emergence of Behavioral Biology	3
Cardiovascular Diseases	9
Biobehavioral Science and Disease Prevention in Adolescence	13
Health and Behavior in Aging	15
Differential Susceptibility to Disease	16
A Model of Coping Behavior	17
Broadening the Spectrum of Health Research and Education	19
References	20
<b>PART I</b>	
<b>BASIC MECHANISMS</b>	
<b>2 Changing Concepts of Neuroendocrine Control</b>	<b>25</b>
WILLIAM F. GANONG	
Introduction	25
Hypothalamic Hormones	26
Control of Hypophysiotropic Hormone Secretion	30
Chemical Messengers that Are both Neurotransmitters and Hormones	32
Conclusions	35
References	36
<b>3 Stress, Corticotropin-Releasing Factor, and Behavior</b>	<b>39</b>
GEORGE F. KOOB	
The Stress Response	39
Behavioral Effects of ACTH	40
Direct Neurotropic Actions of Corticotropin-Releasing Factor	41
Summary	47
References	48

<b>4 Brain and Pituitary Cyclic Nucleotide Response to Stress</b>	<b>53</b>
JAMES L. MEYERHOFF, G. JEAN KANT, G. RUFUS SESSIONS, EDWARD H. MOUGEY, LEE L. PENNINGTON, AND ROBERT H. LENOX	
Introduction	53
Experiment I: Comparison of Responses to Forced Immobilization versus Cold Exposure	54
Experiment II: 15-Minute Immobilization	58
Experiment III: Effect of Locomotor Activity on Brain Regional Cyclic Nucleotides	60
Experiment IV: The Time Course of Cerebellar Cyclic GMP Response to Locomotor Activity	63
Discussion	64
Conclusions	67
References	67
<b>5 Neuroendocrine Response Patterns and Stress: Biobehavioral Mechanisms of Disease</b>	<b>71</b>
REDFORD B. WILLIAMS, JR.	
Introduction	71
Physiological Response Patterns and Behavioral Challenge	76
Pathophysiological Consequences of Neuroendocrine Responses to Stress	90
Neuroendocrine and Autonomic Responses as Determinants of Behavior	95
Implications for Treatment	97
Summary and Conclusions	98
References	98
<b>6 Brain Mechanisms in Effects of Social Support on Viability</b>	<b>103</b>
EVERETT W. BOVARD	
Effects of Social Relationships	103
Hypothalamic Mechanism	110
Amygdaloid Mediation	120
References	125

## **PART II APPLIED PSYCHONEUROENDOCRINOLOGY**

<b>7 The Biochemical Effects of Tactile Deprivation in Neonatal Rats</b>	<b>133</b>
SAUL M. SCHANBERG AND CYNTHIA M. KUHN	
References	146

<b>8 Biochemical Simulation of Anxiety Stress Employing Natural and Synthetic Corticoids: Influences on Neoplastic Processes</b>	<b>149</b>
DARREL H. SPACKMAN, M. A. FITZMAURICE, AND VERNON RILEY	
Introduction	149
Materials, Methods, and Assay Procedures	150
Results	156
Discussion	170
Summary	177
References	178
<b>9 Behavioral Influences and Beta-Adrenergic Mechanisms: The Kidney and Sodium Retention</b>	<b>183</b>
PAUL A. OBRIST, ALBERTO GRIGNOLO, JOHN P. KOEPKE, ALAN W. LANGER, AND KATHLEEN C. LIGHT	
Introduction	183
Survey of Experiments	184
References	186
<b>10 Type A Behavior: Mechanisms Linking Behavioral and Pathophysiological Processes</b>	<b>189</b>
DAVID C. GLASS	
Psychological Stress and Coronary Heart Disease	189
Type A Behavior and Coronary Heart Disease	190
Pattern A as a Psychological Construct	194
Conclusions	197
References	198
<b>11 Psychological and Endocrinological Correlates of Chronic Stress at Three Mile Island</b>	<b>201</b>
ANDREW BAUM, MARC A. SCHAEFFER, C. RAYMOND LAKE, RAYMOND FLEMING, AND DANIEL L. COLLINS	
Stress	202
Sources of Stress at Three Mile Island	204
Field Study of Chronic Stress at Three Mile Island	206
Evidence of Chronic Stress at Three Mile Island	207
Hormonal Correlates of Chronic Uncertainty	213
References	215
<i>Author Index</i>	219
<i>Subject Index</i>	231
