Contents

Preface x

1 Introducing Health Psychology 1

The Changing Field of Health 2

Changing Patterns of Illness and Death 4

The Escalating Cost of Medical Care 5

• What Is Health? 6

• Changing Models of Health 10

Psychology's Involvement in Health 13

Psychology in Medical Settings 13

Psychosomatic Medicine 14

Behavioral Medicine 15

The Emergence of Behavioral Health 17

Health Psychology 17

Chapter Summary 20

Glossary 21

Suggested Readings 21

2 Conducting Research in Psychology and Epidemiology 23

The Role of Theory in Health Psychology 24

Definition of Theory 25

Function of Theories 25

Establishing Reliability and Validity 26

Establishing Reliability 26

Establishing Validity 27

Research Methods in Psychology 28

Experimental Designs 28

Ex Post Facto Designs 29

Correlational Studies 30

Single-Subject Designs 31

Cross-Sectional and Longitudinal Studies 31

Summary of Psychological Research Methods 32

The Placebo in Research and Treatment 32

Research Methods in Epidemiology 35

The Field of Epidemiology 35

The Purposes of Epidemiological Studies 36

Areas of Epidemiological Study 37

Summary of Epidemiological Methods 40

Examples of Epidemiological Research 40

Making a Case Against Cigarettes 40

The Alameda County Study 42

Causation or Risk Factor? 44

Chapter Summary 45

Glossary 46

Suggested Readings 47

3 Defining and Measuring Stress 48

The Nervous System and the Physiology of Stress 49

The Peripheral Nervous System 50

The Neuroendocrine System 53

Physiology of the Stress Response 54

Summary of the Physiology of Stress 55

Theories of Stress 55

Selye's View 55

Mason's View 56

Box: *Hans Selye: Pioneer in Stress Research* 57

Lazarus's View 58

Sources of Stress 61

Crowding 61

Pollution 64

Noise 65

Social Isolation 66

Occupation 69

Sleep Deprivation 71

The Measurement of Stress 73

Methods of Measurement 73

The Reliability and Validity of Stress Measures 78

Chapter Summary 79

Glossary 80

Suggested Readings 82

4 Understanding Stress and Illness 83

Physiology of the Immune System 84

Organs of the Immune System 84

Function of the Immune System 85

Immune System Disorders 88

Psychoneuroimmunology 89

The History of Psychoneuroimmunology 89

Research in Psychoneuroimmunology 90

Physical Mechanisms of Influence 92

Therapeutic Effects 93

Summary of Psychoneuroimmunology Research 94

Does Stress Cause Illness? 94

Stress and Physical Illness 95

Headaches 95

Cardiovascular Disease 96

Ulcers 99

Other Physical Disorders 100

Summary of the Stress and Illness Interaction 100

Stress and Psychological Disorders 100

Depression 101

Schizophrenia 102

Anxiety Disorders 103

Summary of Stress and Psychological Disorders 104

Personality Factors and Stress 104

The Hardy Personality 104

The Identity Disruption Model 106

Chapter Summary 107

Glossary 108

Suggested Readings 109

5 Understanding Pain 110

Pain and the Nervous System 111

The Somatosensory System 111

Afferent Neurons 112

The Spinal Cord 113

The Brain 114

Neurotransmitters and Pain 116

The Modulation of Pain 117

The Meaning of Pain 117

Box: Feeling No Pain 119

The Stages of Pain 119

Pain Syndromes 120

Theories of Pain 124

The Measurement of Pain 126

Physiological Measures 127

Behavioral Assessment 128

Self-Reports 129

Medical Treatments for Pain 132

Drugs 132

Transcutaneous Electrical Neural Stimulation 134

Acupuncture 134

Surgery 135

Summary of Medical Treatments 136

Chapter Summary 136

Glossary 137

Suggested Readings 138

6 Coping with Stress and Pain 139

Personal Resources That Influence Coping 139

Social Support 140

Box: Can You Escape Social Isolation? 141

Personal Control 144

Techniques for Coping with Stress and Pain 145

Hypnosis 145

Relaxation Training 147

Biofeedback 151

Behavior Modification 155

Cognitive Therapy 157

Chapter Summary 162

Glossary 164

Suggested Readings 164

7 Identifying Behavioral Factors in Cardiovascular Disease 165

The Cardiovascular System 166

The Coronary Arteries 168

Coronary Heart Disease 168

Stroke 170

Blood Pressure 171

Measures of Cardiovascular Function 172

Measurements of Electrical Activity in the Heart 172

Angiography 173

Summary of Cardiovascular Measurements 174

Lifestyle and Cardiovascular Health 174

Changes in Lifestyle 175

Changes in Cardiovascular Disease 175

Risk Factors in Cardiovascular Disease 177

Inherent Risk Factors 178

Physiological Conditions 178

Behavioral Factors 182

Box: The Oat Bran Controversy 184

The Type A Behavior Pattern 184

Hostility 189

Modifying Risk Factors for Cardiovascular Disease 192

Reducing Hypertension 193

Lowering Serum Cholesterol 194

Modifying the Type A Behavior Pattern 195

Chapter Summary 197

Glossary 197

Suggested Readings 198

8 Identifying Behavioral Factors in Cancer 199

What Is Cancer? 200

Mortality Rates from Cancer 201

Risk Factors for Cancer 203

Smoking 203

Diet 205

Alcohol 208

Ultraviolet Light 210

Sexual Behavior 211

Summary of Behavioral and Environmental Risk Factors 212

Emotional Factors 212

Personality Factors 215

Psychosocial Factors and the Survival of Cancer Patients	217
Modifying Risk Factors for Cancer	219
Chapter Summary	220
Glossary	221
Suggested Readings	221

9 Receiving Health Care 222

Seeking Health Care 223

Illness Behavior 224

Box: The Health Belief Model 227

The Sick Role 230

Choosing a Practitioner 232

Being in the Hospital 233

The Hospital Patient Role 233

"Good" Patients Versus "Bad" Patients 236

Preparing for Stressful Medical Procedures 238

Techniques for Coping 239

Children and Hospitalization 240

Benefiting from Health Campaigns 242

Information Campaigns 243

Workplace Wellness Programs 246

Community-Wide Interventions 250

Chapter Summary 253

Glossary 254

Suggested Readings 254

10 Adhering to Medical Advice 255

The Problem of Adherence 256

Adherence or Compliance? 256

Assessing Adherence 257

How Frequent Is Nonadherence? 259

What Factors Predict Adherence? 260

Illness Characteristics 261

Personal Characteristics 263

The Practitioner-Patient Interaction 267

Reasons for Nonadherence 270

Improving Adherence 271

Chapter Summary 273

Suggested Readings 274

11 Living with Chronic Illness 275

The Impact of Chronic Illness 276

Impact on the Patient 277

Impact on the Family 279

Following a Cardiac Rehabilitation Program 281

Lifestyle Changes 282

Psychological Reactions After Heart Disease 284

Psychological Interventions in Cardiac Rehabilitation 285

Summary of Cardiac Rehabilitation Programs 286

Coping with Cancer 286

The Extent of the Problem 287

Psychological Treatment for Cancer Patients 290

Adjusting to Diabetes 291

The Physiology of Diabetes 293

The Impact of Diabetes 294

Health Psychology's Involvement with Diabetes 295

Summary of Diabetes Management 297

Dealing with AIDS 297

Symptoms of AIDS 299

The Spread of AIDS 300

Psychologists' Role in the AIDS Epidemic 305

Summary of AIDS Interventions 306

Living with Alzheimer's Disease 307

Helping the Patient 309

Helping the Family 310

Summary of Alzheimer's Interventions 313

Chapter Summary 313

Glossary 314

Suggested Readings 315

12 Smoking Tobacco 316

The Respiratory System 317

A Brief History of Smoking 319

Who Smokes and Who Does Not? 321

- Demographic Trends 321
- Personality Differences 323

Smoking and Health 325

- The Relationship Between Smoking and Illness 325
- Does Quitting Help? 326
- What Components in Smoke Are Dangerous? 328
- Cigar and Pipe Smoking 329
- Passive Smoking 330

Why Do People Smoke? 331

- The Genetic Model 331
- The Nicotine Addiction Model 332
- The Opponent Process Model 333
- The Social Learning Model 333
- Research Evidence 334

Why Do People Start Smoking? 336

Methods of Reducing Smoking Rates 337

- Deterring Smoking 337
- Quitting Smoking 340

Box: *Smoking as a Means of Weight Control?* 345

Smokeless Tobacco 346

Chapter Summary 348

Glossary 349

Suggested Readings 350

13 Using Alcohol and Other Drugs 351

A Brief History of Drinking 352

The Prevalence of Drinking Today 355

The Effects of Alcohol 356

- Hazards of Alcohol 356
- Benefits of Alcohol 360

Why Do People Drink? 362

- The Tension Reduction Hypothesis 362

Box: *Is Alcoholism Hereditary?* 363

- The Disease Model 365

Box: *Tolerance, Dependence, Withdrawal, and Addiction* 366

- The Social Learning Model 369

Quitting Drinking 370

- Spontaneous Remission 370
- Treatments Oriented Toward Abstinence 370

Controlled Drinking 373

- Studies with Abstinence as the Goal 373
- Studies with Control as the Goal 374
- Quitting Versus Drinking in Moderation 376

The Problem of Relapse 376

Other Drugs 377

- Health Effects 377
- Drug Misuse and Abuse 383
- Treatment for Drug Abuse 383
- Summary on Drugs 385

Chapter Summary 385

Glossary 386

Suggested Readings 387

14 Eating to Control Weight 388

The Digestive System 390

Factors in Weight Maintenance 393

- Experimental Starvation 393
- Experimental Overeating 394
- The Concept of Setpoint 395

Overeating and Obesity 396

- Why Are Some People Obese? 396

Box: *The Pleasures and Perils of Flavor* 400

- Is Obesity Unhealthy? 403

Dieting 405

- What Kind of Program Is Best? 406

Box: *Drastic Means of Losing Weight* 407

- Does Dieting Work? 409
- Is Dieting Necessary? 411

Eating Disorders 411

- Anorexia Nervosa 412
- Bulimia 416

Chapter Summary 422

Glossary 423

Suggested Readings 424

15	Exercising	425		
	Types of Exercise	426		
	Isometric Exercise	426		
	Isotonic Exercise	427		
	Isokinetic Exercise	427		
	Anaerobic Exercise	427		
	Aerobic Exercise	427		
	Reasons for Exercising	428		
	Physical Fitness	428		
	Weight Control	430		
	Psychological Effects of Exercise	431		
	Decreased Depression	431		
	Reduced Anxiety	433		
	Buffer Against Stress	435		
	Increased Self-Esteem	436		
	Cardiovascular Effects of Exercise	437		
	Early Studies	437		
	The San Francisco Longshoremen Study	438		
	The Harvard Alumni Study	438		
	The Framingham Heart Study	441		
	Exercise and Cholesterol Levels	442		
	How Much Is Enough?	442		
	Other Health Benefits of Exercise	443		
	Protection Against Colon Cancer	443		
	Prevention of Osteoporosis	444		
	Summary of Exercise Benefits	444		
	Hazards of Exercise	445		
	Exercise Addiction	445		
	Box: Exercise Myths	446		
	Injuries from Exercise	448		
	Other Health Risks	449		
	Death During Exercise	449		
	Exercise Dropouts	450		
			Predicting Dropouts	450
			Reducing Dropout Rates	451
			Chapter Summary	451
			Glossary	452
			Suggested Readings	452
