CHAPTER 1: INTRODUCTION	1
An Essay Concerning Human Misunderstanding	1
About This Book	5
Respiration and Psychophysiology	7
<i>Clinical Psychophysiology</i>	7
<i>Electrical Psychology</i>	8
Transducers	9
Some Rudiments of Electrobiopotentials	9
Direct Current ( <i>dc</i> )	10
The Galvanometer	11
Capacitance	11
Alternating Current ( <i>ac</i> )	12
Rectifiers and Filters	13
Amplifiers	13
Integration, Time-Series, and Sequential Dependency	14
Rhythm	15
Rhythmogenesis	18
Negative Feedback Systems	19
Sequential Disinhibition	20
CHAPTER 2: ELEMENTS OF THE ANATOMY AND PHYSIOLOGY OF THE RESPIRATORY SYSTEM	21
Introduction	21
The Airway Passages	22
The Nose	22

<i>The Mouth, Pharynx, and Trachea</i>	24
The Lungs	24
<i>Inspiration and Expiration</i>	25
<i>Breathing by Contracting the Intercostal Muscles</i>	25
<i>Breathing by Contracting the Diaphragm</i>	27
<i>Normal Breathing</i>	28
Parameters of Lung Ventilation	37
<i>The Total Lung Capacity</i>	37
<i>Direct Measurement of Volume: Spirometry</i>	39
<i>Indirect Measurement of Volume: Pneumography and         Plethysmography</i>	39
Hyperventilation	40
Hypoventilation	44
Respiratory Control Centers of the Brain	45
<i>The Pneumotaxic and Apneustic Centers of the Pons and Medulla</i>	46
<i>The Respiratory Centers of the Cerebral Cortex</i>	49
<i>Centrally Mediated Abnormal Breathing</i>	50
Endorphins and Breathing Control	51
The Hering-Breuer Reflex	52
The Biological Role of Air Ions	52
CHAPTER 3: THE CIRCULATORY SYSTEM AND THE HEART	57
Introduction	57
The Model	63
General Organization of the Cardiovascular System: The Circulatory System and the Heart	64
<i>Arteries, Arterioles, Capillaries, and Veins</i>	65
Blood Circulation through the Brain	69
<i>Chemical Control of Cerebral Blood Flow: CO<sub>2</sub></i>	75
Vasomotor Reflexes	77
The Lymphatic System	80
The Heart	80
The Regulation of Blood Pressure and the Kidneys	84
CHAPTER 4: BLOOD AND THE RED BLOOD CELLS	87
Introduction	87
Blood	92
<i>Leukocytes</i>	93

<i>Platelets</i>	94
<i>The Red Blood Cells</i>	95
<i>Acid-Base Homeostasis and Other Factors in Oxyhemoglobin Dissociation</i>	98
<i>The Oxygen Dissociation Curve (ODC) and O<sub>2</sub> Concentration</i>	105
Some Pathophysiological Conditions Associated with Hypoxia and Hypoxemia	106

CHAPTER 5: CAPNOMETRY AND THE COMPUTERIZED PSYCHOPHYSIOLOGICAL  
PROFILE 109  
*with Joseph Grimaldi*

Introduction	109
Dyspnea	109
The First Profile	116
The Psychophysiological Profile	120
<i>Parameters of the Profile</i>	122
Apparatus	122
Method	123
Monitoring Breathing: The Capnometer	124
<i>The Respiration Ratio: I/E</i>	128
Monitoring Blood O <sub>2</sub> : The Oximeter	129
<i>Breathing Mode: Abdomen versus Chest</i>	130
The Heart	132
<i>The Effect of Diaphragmatic Breathing on the Heart</i>	133
<i>Cardiac Interbeat Interval and the RSA</i>	137
<i>Breathing and Thermal Monitoring</i>	138
<i>Temperature at the Apex of the Head</i>	140
Monitoring Muscle Activity	143
<i>Microvibration (MVB)</i>	144
<i>Electromyography (EMG)</i>	145
Electroencephalography (EEG)	153
<i>The EEG in Migraine</i>	155
<i>EEG in the Psychophysiological Profile</i>	165
Breathing and So-Called Alpha/Theta Training	168

CHAPTER 6: SOME FUNCTIONAL RELATIONSHIPS BETWEEN HYPERVENTILATION  
AND THE ENDOCRINE, CARDIOVASCULAR, AND  
NERVOUS SYSTEMS 173

Introduction	173
--------------	-----

The Effect of Female Gonadal Hormones on Breathing	174
Hyperventilation and the Cardiovascular System	176
<i>Hyperventilation and Blood Pressure</i>	177
<i>Hyperventilation and Syncope</i>	178
<i>The Effect of Hyperventilation on the Heart</i>	178
The Effects of Hyperventilation on Neurons and the Nervous System	184
<i>Hyperventilation and Brain Hypoxia</i>	185
<i>Hyperventilation and the Electroencephalograph</i>	186
<i>Hyperventilation and Idiopathic Epilepsy</i>	187

#### CHAPTER 7: RESPIRATION, HYPERVENTILATION, AND MENTAL DISORDERS 193

Introduction	193
Symptoms of the Hyperventilation Syndrome	194
Psychological Manifestations of the Hyperventilation Syndrome	196
Respiratory Patterns and Mental Disorders	199
<i>The Inspiration–Expiration Ratio</i>	202
<i>The Resting Breath Rate</i>	203
<i>The Ventilatory Response to Carbon Dioxide</i>	203
Hyperventilation and Anxiety	204
Is There a Valid Hyperventilation Symptoms Scale?	209
Hyperventilation and Panic Attacks	213
Hyperventilation and Agoraphobia	219
The Search for Traits	220
<i>Metabolic Acidosis in HV and Panic Attacks</i>	222
<i>The Controversy over Lactate versus CO<sub>2</sub> Sensitivity in Panic Disorder: A Squabble over Types?</i>	223
<i>Types of Physiological Assessment</i>	227

#### CHAPTER 8: BEHAVIORAL TREATMENT AND CONTROL OF BREATHING IN PHYSIOTHERAPEUTIC, YOGIC, AND RELAXATION METHODS 231

Introduction	231
Physiotherapeutic Breathing Techniques	231
Yogic Breathing Methods	233
<i>Transcendental Meditation</i>	235
<i>Modified Yogic Breathing Methods</i>	237
<i>Breathing through the Nose</i>	237

<i>Abdominal Breathing</i>	238
<i>The Relaxation Response</i>	240
<i>The Quieting Response (QR)</i>	242

CHAPTER 9: BEHAVIORAL ASSESSMENT AND BREATHING TRAINING IN THE  
TREATMENT OF HYPERVENTILATION, ASTHMA, AND OTHER CONDITIONS:  
INTEGRATING GUIDED VISUAL IMAGERY, MUSIC, AND PHYSIOLOGICAL  
FEEDBACK 245

Introduction	245
<i>Respiration Rate</i>	245
<i>Respiration Mode and Pattern</i>	246
<i>End-Tidal Carbon Dioxide</i>	246
<i>Cardiorespiratory Synchrony</i>	246
<i>The Electroencephalograph</i>	250
<i>Finger Temperature</i>	250
Physiological Volumetric and CO <sub>2</sub> Feedback Methods in Breathing Retraining	252
<i>Monitoring Thoracic and Abdominal Mechanics: Impedance and Pneumographic and Other Changes</i>	253
<i>Monitoring End-Tidal Carbon Dioxide</i>	255
<i>The Initial Intake Interview</i>	257
<i>The Hyperventilation Provocation Test and the Think Test</i>	259
<i>General Training Procedure</i>	262
Biofeedback	263
<i>The Profile</i>	263
<i>Breathing Training (Day 1)</i>	265
<i>Second Training Session (Day 2)</i>	267
<i>Third Training Session (Day 3)</i>	267
<i>Diaphragmatic Fatigue</i>	268
Guided Imagery, PETCO <sub>2</sub> Biofeedback, and EEG: Rapid Induction	
<i>Hypoarousal (RAR<sup>™</sup>)</i>	268
<i>Altered Metabolism</i>	274
<i>Respiratory Suspension</i>	275
<i>Electroencephalograph</i>	276
Asthma	281
<i>Common Types of Asthma</i>	286
<i>Psychological Factors in Asthma</i>	287
<i>Allergic Mediators in Bronchial Asthma</i>	288
<i>Behavioral Treatment Strategies to Reduce Asthma: Breathing Training and Biofeedback</i>	289

Emphysema	296
Recent Developments in the Application of Breathing Training: Reducing Menopausal Hot Flashes	300
CHAPTER 10: IN CONCLUSION	301
APPENDIX: INITIAL INTAKE INFORMATION	307
References	315
Index	351
