

Contents

| | | |
|----------|---|-----------|
| 1 | Introduction | 1 |
| 1.1 | Aim and structure of the book | 1 |
| 1.2 | General outline of Hertz's <i>Mechanics</i> | 2 |
| 1.3 | What is new in this book? | 5 |
| 1.4 | The publication of Hertz's book and the preserved drafts | 6 |
| 1.5 | Notation, quotes, references, etc. | 7 |
| 2 | The principles of mechanics before Hertz | 8 |
| 2.1 | Principles and laws | 9 |
| 2.2 | Foundations of mechanics | 20 |
| 2.3 | Basic notions | 22 |
| 2.4 | Novel expositions and critical works | 27 |
| 3 | Mechanization of physics | 30 |
| 3.1 | The decline of the mechanistic world view | 38 |
| 4 | Problematization of the concept of force | 40 |
| 4.1 | Forces and atoms | 40 |
| 4.2 | The problematization of distance forces. Field theory | 41 |
| 4.3 | Rejections of atomism | 45 |
| 4.4 | Energetics | 47 |
| 5 | A biographical survey | 50 |
| 5.1 | Childhood and student years (1857–1883) | 50 |
| 5.2 | Privat Dozent in Kiel (1883–1885) | 54 |
| 5.3 | Professor in Karlsruhe (1885–1889) | 56 |
| 5.4 | Professor in Bonn (1889–1894) | 57 |
| 6 | Hertz's road to mechanics | 63 |
| 6.1 | Hertz's electromagnetic work as a background for his mechanics | 63 |

| | | |
|-----------|---|------------|
| 6.1.1 | Axiomatization | 63 |
| 6.1.2 | Mechanization | 66 |
| 6.1.3 | The elimination of distance forces | 67 |
| 6.2 | Research on gravitation | 71 |
| 6.3 | Ether | 73 |
| 6.4 | An energetic beginning | 77 |
| 6.5 | Chronology of the drafts | 80 |
| 7 | Images of nature | 83 |
| 7.1 | A comparison of Hertz's and Helmholtz's signs and images | 85 |
| 7.2 | Correctness | 86 |
| 7.3 | Logical permissibility | 87 |
| 7.4 | Appropriateness | 89 |
| 7.4.1 | Distinctness | 90 |
| 7.4.2 | Simplicity | 92 |
| 7.5 | The relation among the criteria | 93 |
| 8 | Hertz's earlier ideas about images | 97 |
| 8.1 | Images in the <i>Kiel Lectures</i> | 97 |
| 8.2 | The parable of the paper money | 99 |
| 8.3 | The colorless theory and the gay garment | 101 |
| 8.4 | Comparison of the 1894 images with earlier concepts | 101 |
| 8.5 | Concepts in the <i>Mechanics</i> related to images | 106 |
| 9 | Images of mechanics | 111 |
| 9.1 | Principles of mechanics | 111 |
| 9.2 | The Newtonian–Laplacian image | 112 |
| 9.3 | The energetic image | 114 |
| 9.4 | Hertz's image | 115 |
| 9.5 | Conclusion of the comparison | 117 |
| 10 | Kantianism. A-priori and empirical elements of images | 119 |
| 10.1 | Scientific representations | 119 |
| 10.2 | A Kantian division | 121 |
| 10.3 | A metaphysics of corporeal nature | 123 |
| 10.4 | Kantianism in the first draft of Hertz's <i>Mechanics</i> . Existence problems | 124 |
| 10.5 | The division between kinematics and dynamics | 125 |
| 11 | Time, space and mass | 127 |
| 11.1 | Space | 127 |
| 11.1.1 | Pure geometry | 128 |
| 11.1.2 | Applied geometry | 131 |
| 11.2 | Time | 133 |

| | | |
|-----------|--|------------|
| 11.3 | Mass. The constitution of matter | 134 |
| 11.3.1 | The constitution of matter. Book one | 135 |
| 11.3.2 | The constitution of matter. Book two | 141 |
| 12 | The line element: The origin of the Massenteilchen | 146 |
| 12.1 | Hertz's line element | 146 |
| 12.2 | Vanishing identical material points rejected | 149 |
| 12.3 | Massenteilchen appear | 151 |
| 12.4 | A matter of space | 154 |
| 12.5 | The Massenteilchen shrink and become matter free | 156 |
| 12.6 | Conclusion | 158 |
| 13 | Hertz's geometry of systems of points | 159 |
| 13.1 | Geometrization of mechanics | 159 |
| 13.2 | Why the geometric form? | 159 |
| 13.3 | Direction, angle, and curvature in the printed book | 163 |
| 13.4 | Direction, angle, and curvature in Hertz's manuscripts | 165 |
| 14 | Vector quantities and their components | 173 |
| 14.1 | Introduction | 173 |
| 14.2 | Components and reduced components of a displacement | 173 |
| 14.3 | Vector quantities | 176 |
| 14.4 | Kinematic concepts | 178 |
| 14.5 | Vector quantities in Hertz's drafts | 180 |
| 14.6 | The (reduced) components in Hertz's drafts | 181 |
| 14.7 | The origin of Hertz's tensor analysis | 183 |
| 14.8 | Interaction between physical content and mathematical form | 185 |
| 15 | Connections. Material systems | 187 |
| 15.1 | Connections rather than forces | 187 |
| 15.2 | Derivation of the equations of connection | 189 |
| 15.3 | Holonomic and non-holonomic systems | 192 |
| 16 | The fundamental law | 198 |
| 17 | Free systems | 202 |
| 17.1 | Straightest paths | 202 |
| 17.2 | Dynamics of free systems | 204 |
| 18 | Cyclic coordinates | 208 |
| 18.1 | Routh and modified Lagrangians | 208 |
| 18.2 | Hidden cyclic motion. J.J. Thomson | 210 |
| 18.3 | A simple standard example | 211 |

| | | |
|-----------|---|------------|
| 18.4 | Helmholtz on adiabatic cyclic systems | 213 |
| 18.5 | What is new in Hertz's <i>Mechanics</i> ? | 217 |
| 18.6 | R. Liouville: One cyclic coordinate suffice | 217 |
| 19 | Unfree systems. Forces | 219 |
| 19.1 | Guided systems | 219 |
| 19.2 | Systems acted on by forces | 220 |
| 20 | Cyclic and conservative systems | 225 |
| 20.1 | Adiabatic cyclic systems | 225 |
| 20.2 | Conservative systems | 227 |
| 20.3 | Hidden non-holonomic connections are not allowed | 229 |
| 20.4 | The approximative character of cyclic and conservative systems | 230 |
| 21 | Integral principles | 235 |
| 21.1 | Shortest and geodesic paths | 236 |
| 21.2 | Integral principles of mechanics | 237 |
| 22 | A history of non-holonomic constraints | 240 |
| 22.1 | Hölder's rescue of Hamilton's principle | 240 |
| 22.2 | Repeated independent mistakes, rejections and rescues | 243 |
| 23 | Hertz on the Hamilton formalism | 247 |
| 23.1 | The straightest distance | 247 |
| 23.2 | The characteristic and principal functions | 249 |
| 24 | Mathematicians on the geometrization of the Hamilton–Jacobi formalism | 252 |
| 24.1 | Gauss and Hamilton on geodesics, optics and dynamics | 252 |
| 24.2 | Liouville and Lipschitz on the principle of least action | 255 |
| 24.3 | Trajectories as geodesics | 258 |
| 24.4 | Hertz and the mathematicians | 261 |
| 25 | Hertz on the domain of applicability of his mechanics | 263 |
| 25.1 | Practical applications | 263 |
| 25.2 | Validity and applicability of the fundamental law | 264 |
| 25.3 | Constructability of forces | 265 |
| 25.4 | Vitalism, teleology, reductionism, and mechanism in nineteenth-century biology | 267 |
| 25.5 | Hertz on living systems | 268 |
| 25.6 | 'Permissible,' 'probable'? | 272 |
| 25.7 | Applicability and correctness | 273 |

| | |
|--|------------|
| 26 Force-producing models | 274 |
| 27 Reception, extension and impact | 278 |
| 27.1 Reception | 278 |
| 27.2 Extensions and applications | 284 |
| 27.3 Impact | 286 |
| 28 List of conclusions | 290 |
| Appendix | 295 |
| Bibliography | 299 |
| Index | 313 |
