## ***Part I. Basic Concepts: Emotional Problems of Development***

Introduction . . . . .	3
1. Identifying emotional problems in children . . . . .	7
Learning theory and the development of problem behaviour . . . . .	18

## ***Part II. Biological Foundations of Emotional Problems***

Introduction . . . . .	27
2. Genetic and prenatal influences on emotional problems . . . . .	29
Heredity: Beginnings of individual differences . . . . .	29
Transmission of hereditary information . . . . .	32
Genetic accidents . . . . .	33
Prenatal influences . . . . .	34
Physical and psychological factors in pregnancy . . . . .	35
Obstetric factors and types of behaviour disorder . . . . .	39
Psychological trauma of birth . . . . .	40
Physical trauma of birth . . . . .	40
3. Physical adjustive systems: the brain and nervous system . . . . .	45
The reliability of the brain . . . . .	45
Minimal cerebral dysfunction . . . . .	48
Motor incoordination . . . . .	48

Hyperkinesis . . . . .	50
Specific reading backwardness . . . . .	50
Perceptual deficits . . . . .	51
Attention problems . . . . .	53
Learning and memory deficits . . . . .	53
Problems of concept formation . . . . .	55
Intellectual deficits . . . . .	56
Theoretical criticisms. . . . .	59
 4. Reaction tendencies of the nervous system . . . . .	 62
Dependability and sensitivity of nervous functioning . . . . .	64
Reaction tendencies of the brain and individual differences . . . . .	64
Reactive characteristics of the child . . . . .	67
Arousal theories . . . . .	69
Extraversion-Introversion . . . . .	70
Neuroticism . . . . .	72
Neuroticism and the ANS . . . . .	72
The autonomic nervous system and RAS . . . . .	73
Personality and problem behaviour . . . . .	74
 <b><i>Part III. Infancy (From birth to approximately eighteen months)</i></b>	
Introduction . . . . .	77
5. Origins of problem behaviour in infancy . . . . .	84
Critical periods . . . . .	85
The overriding influences of early learning and experience . . . . .	89
The stimulus control of behaviour . . . . .	91
Classical (Respondent) conditioning . . . . .	92
Discrimination learning . . . . .	94
Parent-infant interactions . . . . .	97
The difficult child . . . . .	98
The easy child . . . . .	100
Specific techniques of child rearing . . . . .	100
Parental illness . . . . .	102
 6. Instrumental learning and problem behaviour . . . . .	 103
Symbolic rewards (social reinforcement) . . . . .	107
Shaping . . . . .	111
 7. Separation problems . . . . .	 112
The development of bonds . . . . .	112
Theories concerning the development of attachment . . . . .	114
Disruption of early attachments . . . . .	118
Broken homes and long-term consequences . . . . .	124
Maternal deprivation studies . . . . .	125

***Part IV. Early Childhood: The Toddler Stage (From  
eighteen months to about three years of age)***

Introduction . . . . .	131
8. Dependency problems . . . . .	137
Independence strivings . . . . .	141
Self help . . . . .	143
The genesis of dependency problems . . . . .	144
Child-rearing practices and attitudes . . . . .	145
Reaction to feelings of helplessness . . . . .	146
Rejection . . . . .	149
Maternal overprotection . . . . .	150
Parent-child relationships . . . . .	152
Punishment . . . . .	155
9. Elimination training . . . . .	159
Bowel control and encopresis . . . . .	159
Bladder control and enuresis . . . . .	161
10. Problems of self-restraint . . . . .	166
Agencies and techniques of socialization . . . . .	168
Conduct problems . . . . .	169
Anger and aggression . . . . .	169
Social imitation (Observational learning) . . . . .	174
Sex training . . . . .	179
Sex play . . . . .	180
Masturbation . . . . .	180
Sex typing . . . . .	181

***Part V. Early Childhood: The Pre-school Stage (From three  
to five years approximately)***

Introduction . . . . .	189
11. Problems of over- and under-socialization . . . . .	195
The development of conscience . . . . .	196
Conformity . . . . .	200
The authoritarian character . . . . .	202
Emotional problems due to surplus and deficient social conditioning . . . . .	203
Psychopathic personality . . . . .	206
12. Developmental problems of speech and communication . . . . .	209
Stuttering . . . . .	210
Elective mutism . . . . .	211
Developmental aphasia . . . . .	212
Executive aphasia . . . . .	212
Receptive aphasia . . . . .	212

Early infantile autism . . . . .	213
Childhood psychosis/childhood schizophrenia . . . . .	216
<b><i>Part VI. Middle Childhood: The School-age (From about five to eleven or twelve years of age)</i></b>	
Introduction . . . . .	225
13. Problems of school-children . . . . .	230
Social class . . . . .	234
14. Reluctance and refusal to go to school . . . . .	236
School phobia . . . . .	239
Truancy . . . . .	247
15. Emotional and physical problems associated with fear	249
Learning to be fearful . . . . .	252
Nightmares and night terrors . . . . .	252
Phobias . . . . .	253
Anxiety and stress . . . . .	257
16. The development of psychosomatic problems . . . . .	259
The role of emotion in the asthma attack . . . . .	260
Patterning of ANS responses . . . . .	263
Personality structure of asthmatics . . . . .	265
17. Problems of under-achievement . . . . .	268
Self-esteem, "good adjustment" and achievement . . . . .	269
Environmental influences on achievement . . . . .	272
Language and retarded performance at school . . . . .	275
Family structure and achievement . . . . .	277
Intellect and achievement . . . . .	278
Educational subnormality . . . . .	280
18. Resistance to temptation . . . . .	281
Juvenile delinquency . . . . .	286
Types of delinquency . . . . .	291
The child's peer group . . . . .	296
EPILOGUE . . . . .	300
APPENDIX . . . . .	303
BIBLIOGRAPHY . . . . .	305
AUTHOR INDEX . . . . .	341
SUBJECT INDEX . . . . .	351
