

## TABLE DES MATIÈRES

<b>Résumés des articles</b> .....	ix
<b>Abstracts</b> .....	xi
<b>Préface</b> .....	xiii
<b>S. ALINHAC</b> — <i>An Example of Blowup at Infinity for a Quasilinear Wave Equation</i> .....	1
Introduction .....	2
I. Main result and ideas of the proof .....	2
II. Large time existence, induction hypothesis and first consequences .....	9
III. Improved $L^\infty$ estimates on $u$ .....	17
IV. A calculus of modified Klainerman's vector fields .....	36
V. Weighted $L^2$ norms, Poincaré Lemma and Energy Inequalities .....	58
VI. Commutations with the operator $P$ .....	64
VII. $L^2$ estimates of $u$ and $a$ .....	75
References .....	91
<b>H. BAHOURI &amp; J.-Y. CHEMIN</b> — <i>Microlocal analysis, bilinear estimates and cubic quasilinear wave equation</i> .....	93
Introduction .....	93
1. Method of the proof and structure of the paper .....	96
2. Littlewood-Paley theory and Paralinearization of the equation .....	102
3. Reduction to microlocalized estimates .....	106
4. Approximation of the solution and geometrical optics .....	118
5. The concept of microlocalized functions .....	127
6. The propagation theorem .....	132
7. The conclusion of the proof .....	136
References .....	139

M. KASHIWARA & P. SCHAPIRA — <i>Microlocal study of ind-sheaves I: micro-support and regularity</i> .....	143
1. Introduction .....	143
2. Notations and review .....	145
3. Complements of homological algebra .....	150
4. Micro-support and regularity .....	152
5. Invariance by contact transformations .....	159
6. Ind-sheaves and $\mathcal{D}$ -modules .....	161
7. An example .....	162
References .....	164
Y. LAURENT — <i>Regularity of <math>\mathcal{D}</math>-modules associated to a symmetric pair</i> .....	165
Introduction .....	165
1. Bifiltrations of $\mathcal{D}$ -modules .....	166
2. Symmetric pairs .....	174
References .....	179
A. MELIN & J. SJÖSTRAND — <i>Bohr-Sommerfeld quantization condition for non-selfadjoint operators in dimension 2</i> .....	181
0. Introduction .....	181
Contents of the paper .....	185
1. Construction of complex Lagrangian torii in $p^{-1}(0)$ in dimension 2 .....	185
Appendix A : Reduction of elliptic vector fields on a torus .....	195
Appendix B : 2-dimensional manifolds with elliptic vector fields .....	197
2. Review of Fourier integral operators between $H_\Phi$ spaces .....	201
3. Formulation of the problem in $H_\Phi$ and reduction to a neighborhood of $\xi = 0$ in $T^*\Gamma_0$ .....	203
4. Spectrum of elliptic first order differential operators on $\Gamma_0$ .....	208
5. Grushin problem near $\xi = 0$ in $T^*\Gamma_0$ .....	210
6. The main result .....	214
Appendix A : Remark on multiplicities .....	226
Appendix B : Modified $\bar{\partial}$ -equation for $(I_1(z), I_2(z))$ .....	228
7. Saddle point resonances .....	230
References .....	243
Y. MORIMOTO & C.-J. XU — <i>Logarithmic Sobolev inequality and semi-linear Dirichlet problems for infinitely degenerate elliptic operators</i> .....	245
1. Introduction .....	245
2. Logarithmic Sobolev inequality .....	247
3. Variational problems .....	251
4. Boundedness and regularity of weak solutions .....	254
5. Appendix : Logarithmic regularity estimate .....	259
References .....	263

J. RAUCH — <i>Group velocity at smooth points of hyperbolic characteristic varieties</i> .....	265
References .....	269
J.-M. TRÉPREAU — <i>Discrimination analytique des difféomorphismes résonnants de <math>(\mathbb{C}, 0)</math> et réflexion de Schwarz</i> .....	271
Introduction .....	271
1. Paires d'arcs analytiques et réflexions .....	276
2. Classification des paires de type 2 .....	281
3. Perturbations d'une paire de cercles tangents .....	285
4. Invariants géométriques d'une paire .....	291
5. Des exemples, avec une ellipse et une droite .....	302
Appendice: complément au Chapitre 2 .....	311
Références .....	318
