

## TABLE DES MATIÈRES

<b>Résumés des articles .....</b>	<b>xiii</b>
<b>Abstracts .....</b>	<b>xvii</b>
<b>Avant-Propos .....</b>	<b>xxi</b>
<b>B. MALGRANGE — <i>Les premiers travaux de Jean-Pierre Ramis</i> .....</b>	<b>1</b>
<b>G. RUGET — <i>Témoignage</i> .....</b>	<b>7</b>
<b>D. BERTRAND — <i>Travaux de J.-P. Ramis sur les équations différentielles linéaires</i> .....</b>	<b>11</b>
Acte I. Filtrations Gevrey <i>Dijon, 1976</i> ([R1]) .....	11
Acte II. (Re)sommation et groupes de Galois différentiels <i>Les Houches (1979)</i> ([R2]), <i>Rio (1985)</i> ([R4]), <i>Strasbourg (1991)</i> ([Mr-R6]) .....	13
Acte III. La conjecture d'Abhyankar différentielle <i>Toulouse (Nuit de la musique, 1993)</i> ([R10]) .....	16
Références .....	19
<b>D. CERVEAU — <i>Travaux de J.-P. Ramis sur les équations différentielles non linéaires</i> .....</b>	<b>21</b>
1. Systèmes hamiltoniens (Morales-Ramis) .....	21
2. Perturbations singulières .....	24
3. Feuilletages holomorphes .....	26
Références .....	31
<b>M. LODAY-RICHAUD — <i>Souvenirs strasbourgeois</i> .....</b>	<b>33</b>
<b>Y. ANDRÉ — <i>Galois representations, differential equations, and <math>q</math>-difference equations : sketch of a <math>p</math>-adic unification</i> .....</b>	<b>43</b>
Introduction .....	43
1. A mysterious analogy : linear complex differential equations and coverings in characteristic $p$ , tame and wild .....	44

2. The $p$ -adic analog of this analogy. An equivalence of categories .....	46
3. Another analogy : linear differential equations and $q$ -difference equations ; confluence .....	50
4. The $p$ -adic analog of this analogy. Another equivalence of categories [AdV] .....	51
References .....	53
<b>Y. ANDRÉ &amp; L. DI VIZIO — <i><math>q</math>-difference equations and <math>p</math>-adic local monodromy</i></b> .....	55
Introduction .....	55
Part I. Rank 1 .....	57
1. Generalities on $p$ -adic $q$ -difference equations of rank 1 .....	57
2. An example : the $q$ -exponential function .....	61
3. Solvability (at the boundary) .....	65
4. A characterization of solvability .....	67
5. Reduction to the case of $q$ -difference equations with polynomial coefficient .....	70
6. Frobenius structure in rank 1 : existence criterion .....	73
7. $q$ -deformation of differential equations with strong Frobenius structure .....	78
8. The group of isomorphism classes of $q$ -difference equations of rank 1 admitting a Frobenius structure .....	80
Appendices to part I .....	82
9. Frobenius structure of $d_q y(x) = \pi_q y(x)$ .....	82
10. $p$ -adic $q$ -exponential and Koblitz' Gamma function .....	84
Part II. Higher rank .....	87
11. Preliminaries : unramified extensions of $\mathcal{E}^\dagger$ .....	87
12. $q$ -difference modules and Frobenius structures .....	89
13. "Unit-root" $q$ -difference modules .....	98
14. Quasi-unipotence .....	104
15. Applications .....	108
References .....	110
<b>A. CONNES — <i>Renormalisation et ambiguïté galoisienne</i></b> .....	113
1. Introduction .....	114
2. Renormalisation, position du problème .....	116
3. Structure algébrique des graphes de Feynman .....	122
4. Renormalisation et problème de Riemann-Hilbert .....	127
5. Le groupe de renormalisation .....	132
6. Le groupe G et les difféomorphismes formels .....	134
7. Le groupe de renormalisation et la théorie de Galois .....	136
Références .....	141
<b>Y. LAURENT — <i>b-functions and integrable solutions of holonomic <math>\mathcal{D}</math>-module</i></b> ..	145
Introduction .....	145
1. $V$ -filtration and $b$ -functions .....	146
2. Reductive Lie algebras .....	153
References .....	164

A. LINS NETO — <i>Curvature of pencils of foliations</i> .....	167
1. Introduction .....	167
2. Proofs .....	172
References .....	189
 M. VAN DER PUT — <i>Skew differential fields, differential and difference equations</i>	191
Introduction .....	191
1. The construction of skew differential fields .....	192
2. Skew differential fields over $\mathbf{R}(\{x\})$ .....	192
3. Descent for $q$ -difference equations .....	200
4. Descent for ordinary difference equations .....	202
References .....	205
 M. VAN DER PUT & M. REVERSAT — <i>Krichever modules for difference and differential equations</i> .....	207
Introduction .....	207
1. Abelian differential equations .....	208
2. Abelian difference equations .....	217
References .....	225
 J. SAULOY — <i>Algebraic construction of the Stokes sheaf for irregular linear <math>q</math>-difference equations</i> .....	227
1. Introduction and general conventions .....	227
2. Local analytic classification .....	231
3. Algebraic summation .....	240
4. The $q$ -Gevrey filtration on the Stokes sheaf .....	247
References .....	250
 H. UMEMURA — <i>Monodromy preserving deformation and differential Galois group I</i> .....	253
1. Introduction .....	253
2. Review of R. Fuchs' paper .....	256
3. Infinite dimensional differential Galois theory .....	257
4. Proof of Theorem 1.1 .....	260
5. Framework of proving Theorem 1.3 .....	264
6. Questions .....	266
7. Appendix : Extract from a letter of B. Malgrange to D. Bertrand .....	267
References .....	269
