Agent-Based Modelling in Economics

Lynne Hamill and Nigel Gilbert

Centre for Research in Social Simulation (CRESS), University of Surrey, UK

WILEY

Contents

	Preface	**viii**
	Copyright notices	**ix**
1	**Why agent-based modelling is useful for economists**	**1**
	1.1 Introduction	1
	1.2 A very brief history of economic modelling	1
	1.3 What is ABM?	4
	1.4 The three themes of this book	5
	1.5 Details of chapters	6
	References	9
2	**Starting agent-based modelling**	**11**
	2.1 Introduction	11
	2.2 A simple market: the basic model	12
	2.3 The basic framework	13
	2.4 Enhancing the basic model: adding prices	18
	2.5 Enhancing the model: selecting traders	21
	2.6 Final enhancement: more economically rational agents	23
	2.7 Running experiments	25
	2.8 Discussion	26
	Appendix 2.A The example model: full version	27
	References	28
3	**Heterogeneous demand**	**29**
	3.1 Introduction	29
	3.2 Modelling basic consumer demand theory	30
	3.3 Practical demand modelling	39
	3.4 Discussion	43
	Appendix 3.A How to do it	46
	References	52

4 Social demand **53**
4.1 Introduction 53
4.2 Social networks 53
4.3 Threshold models 56
4.4 Adoption of innovative products 62
4.5 Case study: household adoption of fixed-line phones in Britain 64
4.6 Discussion 70
Appendix 4.A How to do it 70
References 78

5 Benefits of barter **80**
5.1 Introduction 80
5.2 One-to-one barter 81
5.3 Red Cross parcels 88
5.4 Discussion 96
Appendix 5.A How to do it 97
References 104

6 The market **105**
6.1 Introduction 105
6.2 Cournot–Nash model 105
6.3 Market model 108
6.4 Digital world model 117
6.5 Discussion 124
Appendix 6.A How to do it 125
References 131

7 Labour market **132**
7.1 Introduction 132
7.2 A simple labour market model 142
7.3 Discussion 151
Appendix 7.A How to do it 155
References 161

8 International trade **163**
8.1 Introduction 163
8.2 Models 172
8.3 Discussion 183
Appendix 8.A How to do it 185
References 187

9 Banking **189**
9.1 Introduction 189
9.2 The banking model 198
9.3 Discussion 206
Appendix 9.A How to do it 209
References 212

10 Tragedy of the commons **214**
10.1 Introduction 214
10.2 Model 218
10.3 Discussion 225
Appendix 10.A How to do it 228
References 232

11 Summary and conclusions **234**
11.1 Introduction 234
11.2 The models 234
11.3 What makes a good model? 237
11.4 Pros and cons of ABM 238
References 239

Index **242**
