Avant-Propos	vii
Preface to the Three Volumes	ix
Preface to this Volume	xvii
1 Some Elements about Ordinary Differential Equations	1
1.1 Ordinary Differential Equations in the Complex Domain	1
1.1.1 The Fundamental Existence Theorem	1
1.1.2 Some Usual Terminology	2
1.1.3 Algebraic Differential Equations	3
1.2 Solutions of Ordinary Differential Equations and Singularities	3
1.2.1 Notation	3
1.2.2 Problem	4
1.2.3 Linear Differential Equations	4
1.2.4 Nonlinear Differential Equations	5
1.3 The Painlevé Program, Painlevé Property and Painlevé Equations ..	8
1.3.1 Ordinary Differential Equations of Order One	9
1.3.2 Ordinary Differential Equations of Order Two, Painlevé Equations	10
1.3.3 Painlevé Equations and Related Topics	11
References	12
2 The First Painlevé Equation	15
2.1 The First Painlevé Equation	15
2.2 Painlevé Property for the First Painlevé Equation	15
2.3 First Painlevé Equation and Isomonodromic Deformations Condition	16
2.4 Lax Formalism	17
2.5 Symmetries	18
2.6 Asymptotics at Infinity	18
2.6.1 Dominant Balance Principle	19

2.6.2	Maximal Balance, Elliptic Function-type Behavior	20
2.6.3	Submaximal Dominant Balances, Truncated Solutions	21
2.7	First Painlevé Equation and Physical Models	22
	Appendix	23
	References	30
3	Tritruncated Solutions For The First Painlevé Equation	33
3.1	Normalization and Formal Series Solution	33
3.1.1	Normalization, Prepared Form	33
3.1.2	Formal Series Solution	34
3.1.3	Towards Truncated Solutions	35
3.2	A Reminder	37
3.3	Formal Series Solution and Borel-Laplace Summability	39
3.3.1	Formal Series Solution and Borel-Laplace Summability: a Perturbative Approach	40
3.3.2	Formal Series Solution and Borel-Laplace Summability: Second Approach	48
3.4	First Painlevé Equation and Tritruncated Solutions	54
3.4.1	Reminder	54
3.4.2	Formal Series Solution and Borel-Laplace Summation	56
3.4.3	Tritruncated Solutions	61
	Exercices	64
	References	67
4	A Step Beyond Borel-Laplace Summability	69
4.1	Introduction	69
4.2	Resurgent Functions and Riemann Surface	71
4.2.1	Notation	71
4.2.2	The Riemann Surface of \mathbb{Z} -Resurgent Functions	72
4.2.3	Riemann Surface and Sheets	74
4.2.4	Nearby Domains	77
4.2.5	Geodesics	80
4.3	Shortest Symmetric (\mathbb{Z}, ρ) -Homotopy	81
4.3.1	Symmetric \mathbb{Z} -Homotopy	81
4.3.2	Shortest Symmetric (\mathbb{Z}, ρ) -Homotopy	82
4.4	Convolution Product and Related Properties	85
4.4.1	A New Convolution Algebra	85
4.4.2	Convolution Space and Uniform Norm	87
4.4.3	An Extended Grönwall-like Lemma	89
4.5	Application to the First Painlevé Equation	91
4.5.1	A Step Beyond Borel-Laplace Summability	91
4.5.2	Concluding Remarks	93
4.6	Some Supplements	95
4.7	Comments	97
	References	97

5	Transseries And Formal Integral For The First Painlevé Equation	99
5.1	Introduction	99
5.2	Formal Integral : Setting	101
5.2.1	Notation	101
5.2.2	Setting	102
5.2.3	Formal Integral, General Considerations	107
5.3	First Painlevé Equation and Transseries Solutions	110
5.3.1	Transseries Solution - Statement	111
5.3.2	Transseries Solution - Proof	112
5.4	Formal Integral for the First Painlevé Equation	116
5.4.1	Notation and Preliminary Results	116
5.4.2	Painlevé I: Formal Integral	119
5.5	Comments	126
	References	127
6	Truncated Solutions For The First Painlevé Equation	129
6.1	Borel-Laplace Summability of the k -th Series and Beyond	129
6.1.1	Preliminary Results	129
6.1.2	The e_j -th Series	131
6.1.3	The ke_j -th Series	133
6.1.4	The Other k -th Series	136
6.2	Borel-Laplace Summability of the Transseries	136
6.2.1	A Useful Supplement	136
6.2.2	Borel-Laplace Summability of the Transseries	138
6.2.3	Remarks	141
6.2.4	Considerations on the Domain	141
6.3	Summability of the Formal Integral	143
6.4	Truncated Solutions for the First Painlevé Equation	143
6.5	Comments	145
	References	146
7	Supplements To Resurgence Theory	147
7.1	Introduction	147
7.2	Sectorial Germs	149
7.2.1	Sectors	149
7.2.2	Sectorial Germs	149
7.3	Microfunctions	150
7.3.1	Microfunctions - Definitions	151
7.3.2	Microfunctions and Convolution Product	152
7.4	Space of Singularities	158
7.4.1	Singularities	158
7.4.2	Convolution Product of Singularities	160
7.5	Formal Laplace Transform, Formal Borel Transform	161
7.5.1	Formal Laplace Transform for Microfunctions	161
7.5.2	Formal Borel transform for asymptotic classes	164

7.5.3	Formal Laplace Transform for Singularities and Back to Convolution Product	166
7.6	Laplace Transforms	171
7.6.1	Laplace Transforms	171
7.6.2	Singularities and Laplace Transform	173
7.7	Spaces of Resurgent Functions	175
7.7.1	Preliminaries	175
7.7.2	Resurgent Functions	178
7.8	Alien Operators	183
7.8.1	Alien Operators Associated with a Triple	184
7.8.2	Composition of Alien Operators	189
7.8.3	Alien Derivations	196
7.9	Ramified Resurgent Functions	201
7.9.1	Simple and Simply Ramified Resurgent Functions	202
7.9.2	Ramified Resurgent Functions	203
7.10	Comments	206
	References	206
8	Resurgent Structure For The First Painlevé Equation	209
8.1	The Main Theorem	209
8.1.1	Reminder	209
8.1.2	The Main Theorem	210
8.2	Stokes Phenomenon	213
8.3	The Alien Derivatives for the Seen Singularities	214
8.3.1	Preparations	215
8.3.2	Alien Derivations, First Approach	217
8.3.3	Alien Derivations, Second Approach	218
8.3.4	A Step Further	221
8.4	The Bridge Equation and Proof of the Main Theorem	222
8.5	Comments	224
	References	225
	Index	227
