Part I. Introduction by the Editors:	
Taxation and Labor Supply – Revisiting the Contributions by Richard Blundell	1
Part II. Overview	
Introduction	15
1. Tax Policy Reform: The Role of Empirical Evidence	19
1.1. Introduction	19
1.2. Key Margins of Adjustment	21
1.3. Effective Tax Rates	28
1.4. The Importance of Information and Complexity	31
1.5. Evidence on the Size of Responses to Tax Reform	33
1.5.1. Alternative Approaches to Measuring the Size of Responses	34
1.5.2. Randomized Control Trials	35
1.5.3. Structural Models	41
1.5.4. Dynamics and Frictions?	43
1.6. Implications from Theory for Tax Design	45
1.6.1. Optimal Design for Low-Income Workers	46
1.6.2. Tax Rates at the Top	48
1.7. Work Incentives, Redistribution and Base-Broadening Reforms	50
1.8. Summary and Conclusions	53
2. Labour Supply and the Extensive Margin	55
2.1. Bounding Changes at the Extensive and Intensive Margins	58
2.2. Decomposing Total Hours Worked	59
2.3. Conclusions	62

Part III. Conceptual Contributions to Labor Supply Modelling

Introduction	65
3. Modelling the Joint Determination of Household Labor Supplies and Commodity Demands	69
3.1. Specification of the model	73
3.2. Econometric Analysis	77
3.3. Empirical Results	79
3.4. Conclusions	83
4. A Life-Cycle Consistent Empirical Model of Family Labor Supply Using Cross-Section Data	85
4.1. Introduction	85
4.2. Two-stage Budgeting and λ -constant Frisch Demands	88
4.3. An Empirical Specification of Family Labor Supplies	94
4.4. Estimation, Data and Results	98
4.4.1. A Maximum Likelihood Estimator	98
4.4.2. Data	99
4.4.3. Empirical Results	100
4.5. Summary and Conclusion	108
Data Appendix	109
5. Unemployment and Female Labor Supply	110
5.1. The Standard Labor Supply Model	112
5.2. Unemployed Workers	113
5.3. Empirical Results	116
5.4. Conclusions	125
Data Appendix	126
6. Estimating Labor Supply Responses Using Tax Reforms	133
6.1. Introduction	133
6.2. The UK Tax Policy Reforms	135
6.3. Identifying Labor Supply Responses From Tax Policy Reforms	139
6.3.1. A Specification for Labor Supply	139
6.3.2. A Grouping Estimator	140
6.3.3. Discontinuities in the Budget Set	144
6.3.4. The Identifying Assumptions	145
6.3.5. Household Composition and Labor Supply	147
6.3.6. The Relevance and Validity of the Instruments	147
6.3.7. Implementation of the Estimator	148
6.4. Labor Supply Responses	149
6.4.1. The Data	149
6.4.2. The Reduced Forms and the Validity of Instruments	152

6.4.3. Labor Supply Elasticities and Parameter Estimates	153
6.5. Conclusions	161
Appendix A: The Reduced Forms and Descriptive Statistics	162
Appendix B: The Computation of the Standard Errors	167
7. Job Changes and Hours Changes:	
Understanding the Path of Labor Supply Adjustment	170
7.1. Introduction	170
7.2. "In Work" Benefit Reforms in the United Kingdom	174
7.2.1. Institutional Background	174
7.2.2. Analytical Framework and Identification Issues	175
7.3. Data	178
7.4. Results	185
7.4.1. Benchmark Estimates	185
7.4.2. Heterogeneous Responses	187
7.4.3. Sensitivity Analysis	192
7.4.4. Wage Estimates	193
7.5. Conclusions	194
Part IV. Policy Applications	
Introduction	197
8. The Labor Market Impact of the Working Families'	
Tax Credit	201
8.1. Introduction	201
8.2. The Structure of Family Credit and the WFTC Reform	203
8.3. Demographics	205
8.3.1. Population Characteristics	205
8.3.2. Childcare Expenditure	205
8.4. Potential Incentives of WFTC	208
8.4.1. Incentives For Lone Parents	208
8.4.2. Incentives for Men in Couples	210
8.4.3. Incentives for Women in Couples	211
8.5. WFTC Reform Simulations	213
8.5.1. Data	213
8.5.2. Modelling Childcare Costs	213
8.5.3. Non-Behavioural Effects	214
8.5.4. Simulating Labor Supply Responses	216
8.6. Simulation Results	217
8.6.1. Policy Simulations: Lone Parents	218
8.6.2. Policy Simulations: Women with Employed Partners	219

8.6.3.	Policy Simulations: Women with Unemployed Partners	220
8.6.4.	Policy Simulations: Men in Couples	221
8.6.5.	Policy Simulations: A Sensitivity Analysis	222
8.7.	Conclusions	225
	Appendix	226
9.	Work Incentives And 'In-Work' Benefit Reforms: A Review	227
9.1.	Introduction	227
9.2.	Earnings And Employment Among Low-Skilled Workers	230
9.3.	The Impact Of Existing In-Work Benefit Programmes	232
9.3.1.	The Canadian Self Sufficiency Project: A Randomized Experiment	232
9.3.2.	The EITC Reforms in the USA: A Natural Experiment?	234
9.3.3.	The UK Family Credit Reforms	237
9.4.	Evaluating The WFTC Proposals	240
9.4.1.	The WFTC Reform	240
9.4.2.	Policy Simulations for the WFTC Reform	244
9.4.3.	What Form Should the Tax Credit Take?	247
9.5.	Conclusions	248
10.	Evaluating the Employment Impact of a Mandatory Job Search Program	250
10.1.	Introduction	250
10.2.	The Program	254
10.2.1.	Description of the New Deal for the Young Unemployed	254
10.2.2.	Choice of the Outcome Variables	256
10.3.	Identification and Estimation Methods	257
10.3.1.	The Choice of Comparison Group	258
10.3.2.	Implementation	262
10.3.3.	Other Estimation Issues	263
10.4.	Data	266
10.5.	Results	269
10.5.1.	Pilot Study: Men's Results	269
10.5.2.	National Roll Out: Men's Results	274
10.5.3.	The Impact of the Program on Women	277
10.5.4.	Discussion of the Results: A Comparison with the Existing Literature	281
10.6.	Conclusions	285

Appendix A: Data	286
Appendix B: Gateway Employment Effects Under Different Propensity Score Matching Techniques	291
Appendix C: Estimation Methods	291
Appendix D: UK Unemployment Benefit Rules	293
11. Welfare-to-Work: Which Policies Work and Why?	295
11.1. Introduction	295
11.2. The Changing Structure and Economic Environment of Low-Wage Workers in the UK	298
11.2.1. The Labor Market Background for the New Deal Reform	298
11.2.2. The Labor Market Background for the WFTC Reform	301
11.2.3. Inequality and the Real Wages of the Young Low Skilled	302
11.3. The New Deal and WFTC Reforms in Context	302
11.3.1. The Design of the New Deal	303
11.3.2. The Design of the WFTC	305
11.3.3. Aspects of Design	307
11.4. Evaluating the Labor Market Impact of Reforms	315
11.4.1. The Impact of the New Deal for Young People	315
11.4.2. Evaluating the Impact of the WFTC Reform	322
11.4.3. The Self Sufficiency Program (SSP) – An Experimental Evaluation	328
11.5. Conclusions: Designing an Appropriate Welfare to Work Policy	330
11.5.1. An Overview	330
11.5.2. An Assessment: Designing an Appropriate Welfare-to-Work Policy	332
12. Earned Income Tax Credit Policies: Impact and Optimality	334
12.1. Introduction	334
12.2. Earned Income Tax Credits and Their Relationship With Wage Subsidy Policies	337
12.3. The Labor Market Background for the Shift Towards In-Work Benefits	338
12.4. The Earned Income Tax Credit Reforms: WFTC and EITC	340
12.5. The Impact and Optimality	346
12.5.1. Impact	347
12.5.2. Is the Design Optimal?	353

12.6. Conclusions: Designing a Welfare-to-Work Policy Using Tax Credits	356
13. Employment, Hours of Work and the Optimal Taxation of Low-Income Families	358
13.1. Introduction	358
13.2. The Optimal Design Problem	360
13.2.1. Pareto Improving Reforms	361
13.2.2. Social Welfare Improving Reforms	362
13.3. Tax Credit Reform and Low-Income Support	363
13.4. A Structural Labor Supply Model	366
13.4.1. Preference Specification	366
13.4.2. Budget Constraint, Fixed Costs of Work and Childcare Costs	367
13.4.3. Optimal Individual Behavior	368
13.5. Data and Estimation	369
13.5.1. Data	369
13.5.2. Estimation	369
13.5.3. Specification and Structural Parameter Estimates	371
13.5.4. Simulating the WFTC Reform	374
13.6. Pareto Improving Reforms	374
13.6.1. Efficiency Implications for the Tax Schedule	375
13.6.2. Incorporating Hours Information	377
13.7. Optimal Design of the Tax and Transfer Schedule	377
13.7.1. Optimal Tax Specification	378
13.7.2. Implications for the Tax Schedule	379
13.7.3. Tagging by Age of Child	383
13.7.4. Introducing an Hours Rule	386
13.8. Summary and Conclusions	391
Appendix A: Likelihood Function	392
Appendix B: Proof of Proposition	394
Part V. Conclusions and Future Directions	397
Notes	409
