Preface vii

1. Iterated Integrals, Chen's Flat Connection and π_1 1

   1.1 Introduction 1
   1.2 Differential equations 2
   1.3 Program 7
   1.4 Lie algebras 8
   1.5 Chen's Lie algebra and connection 14
   1.6 Some work of Quillen 19
   1.7 Group homology 21
   1.8 The basic isomorphisms 25
   1.9 Lattices in nilpotent Lie groups 26
   1.10 Some Hodge theory 28

2. Iterated Integrals on Compact Riemann Surfaces 35

   2.1 Introduction 35
   2.2 Generalities on Riemann surfaces and iterated integrals . . 35
   2.3 Harmonic volumes and iterated integrals 42
   2.4 Use of the Jacobian 45
   2.5 Variational formula for harmonic volume 47
   2.6 Algebraic equivalence and homological equivalence of algebraic cycles 52
   2.7 Calculations for the degree 4 Fermat Curve 55
   2.8 Currents and Hodge theory 67

3. The Generalized Linking Pairing and the Heat Kernel 73

3.1 Introduction 73
3.2 The main theorem 84

Appendix: Orientations, Fiber Integration 95

Bibliography 101

List of Notations 103
