Preface xiii

Acknowledgments xvii

I Epistemology and Human Memory 1

1 Three Questions about Memory 3

- 1.1 What Is Memory? 3
- 1.2 How Does Memory Give Us Knowledge? 8
- 1.3 When and Why Did Memory Emerge? 12
- 1.4 Overview 13

2 Situating Episodic Memory 17

- 2.1 Is Memory a Natural Kind? 17
- 2.2 The Multiple Memory Systems Hypothesis 18
- 2.3 A Standard Taxonomy of Memory Systems 19
- 2.4 The Trilevel Approach 21
 - 2.4.1 The Concept of a Memory System 22
 - 2.4.2 Generating the Hierarchy of Kinds of Memory 22
- 2.5 Declarative Memory 23
 - 2.5.1 Functionalism and Multiple Realizability 24
 - 2.5.2 Avoiding Overgeneration 25
- 2.6 Nondeclarative Memory 26
 - 2.6.1 Implicit Representation 28
 - 2.6.2 Knowing How 29
- 2.7 Toward a New Taxonomy 30
 - 2.7.1 Common Neural Mechanisms 32
 - 2.7.2 Interacting Systems 32
 - 2.7.3 General Theories of Learning 33

2.8 Starting with Episodic Memory	34
2.8.1 Episodic versus Autobiographical Memory	35
2.8.2 Episodic versus Semantic Memory	35
3 Memory Knowledge	37
3.1 Naturalism and Reliabilism	37
3.1.1 Normativity	40
3.1.2 Pluralism	43
3.2 The Reliability of Episodic Memory	48
3.2.1 The Generality Problem and Memory	48
3.2.2 Metamemory and Belief	51
3.2.3 Episodic Content and Truth	52
3.2.4 The Concept of Reliability	54
II Episodic Memory as Mental Time Travel	57
4 The Commonsense Conception	59
4.1 The Experience Condition	61
4.2 The Current Representation Condition	62
4.2.1 Direct Realism	62
4.2.2 Indirect Realism	64
4.2.3 A Compromise View	64
4.3 The Previous Representation Condition	65
4.4 The Appropriate Connection Condition	66
4.5 The Content-Matching Condition	67
4.6 The Factivity Condition	68
4.7 Distinguishing between Memory and Imagination	70
4.7.1 Degree of Flexibility	71
4.7.2 Level of Detail	72
5 The Causal Theory	75
5.1 The Causal Condition	75
5.2 The Memory Trace Condition	76
5.2.1 Traces in Philosophy and Psychology	77
5.2.2 Local versus Distributed Traces	78
5.3 The Continuous Connection Condition	79
5.4 Properly Functioning Memory Systems	80
5.5 Content Similarity	81
5.6 Constructive Memory	82
5.6.1 Encoding	86
5.6.2 Consolidation and Reconsolidation	87
5.6.3 Retrieval	87

5.7	Approximate Content Similarity	89
5.8	A Causal Theory of Constructive Memory	91
5.8.1	Remembering and Updating	92
5.8.2	Remembering and Pastness	92
5.8.3	Remembering and Acceptance	93
5.9	The Epistemology of Constructive Memory	93
5.9.1	Preservationism	94
5.9.2	Moderate Generationism	94
5.9.3	Radical Generationism	95
6	The Simulation Theory	97
6.1	The Changing Concept of Episodic Memory	97
6.2	Remembering as Mental Time Travel	99
6.2.1	Constructive Episodic Simulation	100
6.2.2	Scene Construction	101
6.3	Remembering as Simulating the Past	103
6.3.1	Nonexperiential Information	103
6.3.2	Properly Functioning Episodic Construction Systems	104
6.4	The Episodic Construction System	105
6.5	The Personal Past	106
6.6	Remembering and Merely Imagining the Past	107
6.7	Beyond the Causal Theory	110
6.8	Related Approaches	113
6.8.1	Remembering and Imagining	113
6.8.2	Remembering and Mindreading	113
6.8.3	Remembering and Episodic Counterfactual Thought	115
6.9	Objections to the Simulation Theory	116
6.9.1	The Metaphysics of Mental Time Travel	116
6.9.2	The Phenomenology of Mental Time Travel	117
6.9.3	Memory without Experience	118
6.10	Remembering as Imagining the Past	120
III	Mental Time Travel as a Source of Knowledge	123
7	The Information Effect	127
7.1	The Misinformation Effect: Harmful Incorporation	128
7.2	Helpful Incorporation	129
7.2.1	The Contamination View	130
7.2.2	Interactions between Testimony and Memory	131
7.3	Explaining the Appeal of the Contamination View	133
7.3.1	Incorporation and Reliability	133
7.3.2	Incorporation and Truth	134
7.3.3	Incorporation and the Anti-Luck Condition	135

7.4	Skeptical Implications of the Contamination View	136
7.5	Initial Attempts to Avoid Skepticism	138
7.6	Incorporation and Epistemic Luck	140
7.6.1	The Modal Conception of Epistemic Luck	140
7.6.2	The Honesty Bias	142
7.7	The Information Effect	145
7.8	Avoiding Skepticism	147
8	Metamemory and the Source Problem	149
8.1	The Source Problem	149
8.2	Metacognitive Belief-Producing Systems	150
8.2.1	Two-Level Systems	150
8.2.2	Metacognition	152
8.3	Reliability in Metacognitive Systems	154
8.4	Power and Speed in Metacognitive Systems	158
8.5	The Source-Monitoring Framework	162
8.5.1	Effects on Reliability	163
8.5.2	Effects on Power and Speed	165
8.6	Metacognition in Internalism and Externalism	166
9	Metamemory and the Process Problem	169
9.1	The Process Problem	169
9.2	Do Agents Face the Process Problem?	174
9.3	How Hard Is the Process Problem?	175
9.3.1	Mental Time Travel	176
9.3.2	Mindreading and Related Processes	178
9.3.3	Pure Forms of Imagination	178
9.4	Do Agents Need to Solve the Process Problem?	179
9.5	Do Agents Solve the Process Problem?	180
9.6	Formal Process-Monitoring Criteria	181
9.6.1	Flexibility	181
9.6.2	Intention	182
9.6.3	Spontaneity	184
9.7	Content-Based Process-Monitoring Criteria	185
9.7.1	Vivacity	185
9.7.2	Coherence	188
9.7.3	Affective Valence and Intensity	189
9.8	Phenomenal Process-Monitoring Criteria	190
9.8.1	The Feeling of Prior Belief	191
9.8.2	The Feeling of Familiarity	191
9.8.3	The Feeling of Pastness and the Feeling of Futurity	192

9.9	Toward a Process-Monitoring Framework	194
9.10	Process Monitoring and Mindreading	198
IV	The Evolution of Mental Time Travel	201
10	The Puzzle of Conscious Episodic Memory	203
10.1	When Did Episodic Memory Evolve?	204
10.2	From Episodic-like Memory to Conscious Mental Time Travel	206
10.2.1	Contextual versus Phenomenological Definitions	206
10.2.2	The Phenomenology of Episodic Memory	207
10.3	Subjective Time	210
10.4	Consciousness of Subjective Time	213
10.4.1	Anoetic Consciousness	213
10.4.2	Noetic Consciousness	214
10.4.3	Autonoetic Consciousness	214
10.4.4	Chronesthesia	215
10.5	Why Did Episodic Memory Evolve?	216
11	Consciousness and Memory Knowledge	219
11.1	Past-Oriented Explanations	219
11.1.1	Episodic versus Procedural Memory	219
11.1.2	Episodic versus Semantic Memory	220
11.2	Social Explanations	221
11.2.1	Impression Reevaluation	221
11.2.2	Other Social Factors	222
11.3	Future-Oriented Explanations	222
11.3.1	Niche Construction	223
11.3.2	Simulating the Future	224
11.3.3	Reducing Delay Discounting	226
11.4	Toward a Metacognitive Explanation	227
11.5	Consciousness, Metamemory, and Subjective Certainty	228
11.5.1	Consciousness and Source Monitoring	229
11.5.2	Consciousness and Process Monitoring	231
11.5.3	Interactions between Source Monitoring and Process Monitoring	232
11.6	The Accuracy of Episodic Phenomenology	234
11.7	The Necessity of Metamemory	235
12	Conclusion	237
	Notes	241
	References	253
	Index	285
