Part I

Foundations of Exercise in Chronic Disease and Disability 1

Geoffrey E. Moore, J. Larry Durstine, and Patricia L. Painter

Chapter 1 Exercise Is Medicine in Chronic Care 3 *Robert Sallis and Geoffrey E. Moore*

Exercise Is Medicine 3
Take-Home Message 12
Suggested Readings 12

Chapter 2 Basic Physical Activity and Exercise Recommendations for Persons With Chronic Conditions. 15

Benjamin T. Gordon, J. Larry Durstine, Patricia L. Painter, and Geoffrey E. Moore

Definitions Used in This Book 15
Basic *CDD4* Recommendations for Physical Activity or Exercise
in Chronic Conditions 18
How to Prescribe Physical Activity or Exercise in Chronic Care 21
Graded Exercise Testing 25
Minimum Exercise Recommendations When an Exercise Test Is Not Available 27
Clinically Supervised Exercise Programming 28
ACSM's Exercise Personnel Certifications 30
Suggested Readings 31

Chapter 3 Art of Clinical Exercise Programming 33

Patricia L. Painter and Geoffrey E. Moore

Step 1: Assess Current Health Status 33
Step 2: Assess Current Level of Physical Activity 34
Step 3: Identify Exertional Symptoms That Limit Physical Activity 35
Step 4: Evaluate Physical Function and Performance 35
Step 5: Selecting Physical Performance Assessments 37
Activities of Daily Living and Instrumental Activities of Daily Living 37
Commonly Used Tests of Physical Functioning 37

- Step 6: Considerations for Formal Exercise Tolerance Testing 41
- Step 7: Considerations for Program Referral 43
- Step 8: Develop a Strategy for Monitoring Progress 43
- Take-Home Message 45
- Suggested Readings 46
- Additional Resources 46

- Chapter 4 Art of Exercise Medicine:
Counseling and Socioecological Factors 47**
Geoffrey E. Moore, Michael Costello, and Patricia L. Painter
- Common Behavioral Techniques Used in Exercise Counseling 48
 - Other Aspects of Exercise Counseling 51
 - Socioecological Disparities and Exercise in Chronic Conditions 55
 - Integration Into a Medical Home Model 57
 - Suggested Readings 57
 - Additional Resource 59

Part II

- Common Chronic Conditions
and Comorbidities 61**
Geoffrey E. Moore and J. Larry Durstine

- Chapter 5 Approach to the Common Chronic Conditions 63**
Geoffrey E. Moore, Patricia L. Painter, J. Larry Durstine, and Benjamin T. Gordon
- Nature of Multiple Conditions and Related Comorbidities 63
 - General Recommendations for Exercise 63
 - Recommendations for Exercise Assessment 64
 - Recommendations for Exercise Programming 65
 - CDD4* Alternative Recommendation: The Functional Exercise Trial 65
 - General Solutions for Common Chronic Conditions 66
 - Integration Into a Medical Home Model 67
 - Suggested Readings 68

- Chapter 6 Chronic Conditions Strongly Associated
With Physical Inactivity. 71**
*J. Larry Durstine, Geoffrey E. Moore, Patricia L. Painter, Richard Macko,
Benjamin T. Gordon, and William E. Kraus*
- Hypertension and Dyslipidemia 71
 - Overweight, Obesity, Prediabetes, and Type 2 Diabetes Mellitus 80
 - Arthritis and Back Pain 85
 - Osteoporosis 88
 - Suggested Readings 91
 - Additional Resources 93
 - Web Resources 93

Chapter 7	Chronic Conditions Very Strongly Associated With Tobacco	95
	<i>Christopher B. Cooper, Brett A. Dolezal, J. Larry Durstine, Benjamin T. Gordon, Sherry O. Pinkstaff, Abraham S. Babu, and Shane A. Phillips</i>	
	Chronic Obstructive Pulmonary Disease	95
	Coronary Artery Disease and Atherosclerosis	100
	Angina and Silent Ischemia	102
	Peripheral Arterial Disease	106
	Suggested Readings	110
	Additional Resources	112
Chapter 8	Cancer	115
	<i>Kathryn Schmitz</i>	
	Basic Pathophysiology	115
	Management and Medications	116
	Effects on the Exercise Response	119
	Effects of Exercise Training	119
	Recommendations for Exercise Testing	120
	Recommendations for Exercise Programming	121
	Integration Into a Medical Home Model	122
	Suggested Readings	123
	Additional Resources	123
Chapter 9	Significant Sequelae Related to Common Chronic Conditions	125
	<i>Jessica S. Oldham, Patricia L. Painter, Elizabeth J. Protas, Geoffrey E. Moore, and Richard Macko</i>	
	Depression as a Comorbidity	125
	Lower-Limb Amputation	128
	Frailty	130
	Suggested Readings	132
	Additional Resource	132
Part III	Cardiovascular Diseases	133
	<i>Jonathan N. Myers and Peter H. Brubaker</i>	
Chapter 10	Chronic Heart Failure	135
	<i>Peter H. Brubaker and Jonathan N. Myers</i>	
	Basic Pathophysiology	135
	Management and Medications	136
	Effects on the Exercise Response	137
	Effects of Exercise Training	137

	Recommendations for Exercise Testing	138
	Recommendations for Exercise Programming	139
	Integration Into a Medical Home Model	140
	Take-Home Message	140
	Suggested Readings	141
	Additional Resources	142
Chapter 11	Atrial Fibrillation	143
	<i>Jonathan N. Myers and J. Edwin Atwood</i>	
	Basic Pathophysiology	143
	Management and Medications	143
	Effects on the Exercise Response	144
	Effects of Exercise Training	144
	Recommendations for Exercise Testing	145
	Recommendations for Exercise Programming	145
	Integration Into a Medical Home Model	146
	Take-Home Message	146
	Suggested Readings	146
	Additional Resources	147
Chapter 12	Pacemakers and Implantable Cardioverter-Defibrillators	149
	<i>Clinton A. Brawner and Barry Lewis</i>	
	Permanent Pacemakers	149
	Implantable Cardioverter-Defibrillators	150
	Combination Pacemaker–Defibrillator Devices	150
	Management and Medications	150
	Effects on the Exercise Response	151
	Effects of Exercise Training	151
	Recommendations for Exercise Testing	151
	Recommendations for Exercise Programming	152
	Integration Into a Medical Home Model	152
	Suggested Readings	152
	Additional Resources	153
Chapter 13	Valvular Heart Disease	155
	<i>Matthew W. Parker</i>	
	Basic Pathophysiology	155
	Mitral Valve Disease	155
	Aortic Valve Disease	156
	Right-Sided Valvular Heart Disease	156
	Management and Medications	156
	Effects on the Exercise Response	157
	Effects of Exercise Training	158
	Recommendations for Exercise Testing	158

Recommendations for Exercise Programming 158
 Integration Into a Medical Home Model 159
 Take-Home Message 160
 Suggested Readings 160
 Additional Resources 160

Chapter 14 Heart Transplantation 163

Audrey B. Silva and Gerson Cipriano Jr.

Effects on the Exercise Response 163
 Effects of Exercise Training 163
 Management and Medications 164
 Recommendations for Exercise Testing 165
 Recommendations for Exercise Training 165
 Integration Into a Medical Home Model 166
 Take-Home Message 166
 Suggested Readings 166
 Additional Resources 167

Chapter 15 Aneurysms 169

Holly Fonda and Jonathan N. Myers

Management and Medications 170
 Effects on the Exercise Response 170
 Effects of Exercise Training 171
 Recommendations for Exercise Testing 171
 Recommendations for Exercise Programming 172
 Integration Into a Medical Home Model 172
 Take-Home Message 173
 Suggested Readings 173
 Additional Resources 174

Part IV Pulmonary Diseases. 175

Tony Babb

Chapter 16 Chronic Restrictive Pulmonary Disease. 177

Connie C. W. Hsia

Basic Pathophysiology 177
 Management and Medications 178
 Effects on the Exercise Response 179
 Effects of Exercise Training 180
 Recommendations for Exercise Testing 180
 Recommendations for Exercise Programming 181
 Integration Into a Medical Home Model 181
 Take-Home Message 181
 Suggested Readings 181

Chapter 17	Asthma	183
	<i>Kenneth W. Rundell</i>	
	Basic Pathophysiology 183	
	Management and Medications 184	
	Effects on the Exercise Response 185	
	Effects of Exercise Training 185	
	Recommendations for Exercise Testing 186	
	Recommendations for Exercise Programming 187	
	Integration Into a Medical Home Model 187	
	Take-Home Message 187	
	Suggested Readings 188	
	Additional Resources 188	
Chapter 18	Cystic Fibrosis	189
	<i>Erik Hulzebos, Maarten S. Werkman, Bart C. Bongers, and Tim Takken</i>	
	Management and Medications 189	
	Effects on the Exercise Response 189	
	Effects of Exercise Training 191	
	Recommendations for Exercise Testing 191	
	Recommendations for Exercise Programming 191	
	Integration Into a Medical Home Model 192	
	Take-Home Message 193	
	Suggested Readings 193	
	Additional Resources 193	
Chapter 19	Pulmonary Hypertension	195
	<i>Kelly Chin</i>	
	Management and Medications 195	
	Effects on the Exercise Response 195	
	Effects of Exercise Training 196	
	Recommendations for Exercise Testing 196	
	Recommendations for Exercise Programming 196	
	Integration Into a Medical Home Model 197	
	Take-Home Message 197	
	Suggested Readings 197	
	Additional Resource 198	
Part V	Immunological, Hematological, and Organ Failure	199
	<i>David C. Nieman</i>	
Chapter 20	Chronic Kidney and Liver Disease	201
	<i>Patricia L. Painter</i>	
	Renal Disease 201	
	Liver Disease 202	
	Management and Medications for Kidney Disease 202	

	Management and Medications for Liver Disease	203
	Effects on the Exercise Response	203
	Effects of Exercise Training	204
	Recommendations for Exercise Testing	205
	Recommendations for Exercise Programming	206
	Integration Into a Medical Home Model	206
	Take-Home Message	206
	Suggested Readings	207
	Additional Resources	207
Chapter 21	Acquired Immune Deficiency Syndrome	209
	<i>David C. Nieman, Gregory A. Hand, G. William Lyster, and Wesley D. Dudgeon</i>	
	Basic Pathophysiology	209
	Management and Medications	210
	Effects on the Exercise Response	211
	Effects of Exercise Training	211
	Recommendations for Exercise Testing	212
	Recommendations for Exercise Programming	212
	Integration Into a Medical Home Model	213
	Take-Home Message	213
	Suggested Readings	213
	Additional Resources	213
Chapter 22	Chronic Fatigue Syndrome	215
	<i>Steven P. Bailey and David C. Nieman</i>	
	Basic Pathophysiology	215
	Management and Medications	216
	Effects on the Exercise Response	216
	Effects of Exercise Training	216
	Recommendations for Exercise Testing	217
	Recommendations for Exercise Programming	217
	Integration Into a Medical Home Model	218
	Take-Home Message	218
	Suggested Readings	219
	Additional Resources	219
Chapter 23	Fibromyalgia	221
	<i>David C. Nieman</i>	
	Basic Pathophysiology	221
	Management and Medications	222
	Effects on the Exercise Response	222
	Effects of Exercise Training	222
	Recommendations for Exercise Testing	223
	Recommendations for Exercise Programming	223
	Integration Into a Medical Home Model	224

Take-Home Message	224
Suggested Readings	225
Additional Resources	225

Chapter 24 Hemostasis Disorders 227

Michael Lockard and David C. Nieman

Basic Pathophysiology of Hemorrhagic Disorders	227
Basic Pathophysiology of Thrombotic Disorders	228
Management and Medications	228
Effects on the Exercise Response	229
Effects of Exercise Training	231
Recommendations for Exercise Testing	232
Recommendations for Exercise Programming	232
Integration Into a Medical Home Model	233
Take-Home Message	233
Suggested Readings	234
Additional Resources	234

Part VI

Neuromuscular Conditions 235

Elizabeth J. Protas and Richard Macko

Chapter 25 Stroke, Brain Trauma, and Spinal Cord Injuries 237

Richard Macko

Basic Pathophysiology of Stroke	237
Basic Pathophysiology of Traumatic Brain Injury	238
Basic Pathophysiology of Spinal Cord Injury	238
Common Elements	238
Systemic Effects of Central Nervous System Injury	240
Management and Medications	241
Effects on the Exercise Response	241
Effects of Exercise Training	242
Recommendations for Exercise Testing	243
Recommendations for Exercise Programming	244
Integration Into a Medical Home Model	246
Take-Home Message	246
Suggested Readings	247

Chapter 26 Peripheral Neuropathy, Myopathy, and Myasthenia Gravis 249

Charlene Hafer-Macko

Basic Pathophysiology of Peripheral Neuropathy	249
Basic Pathophysiology of Myopathy	250
Basic Pathophysiology of Myasthenia Gravis	250
Management and Medications	251
Effects on the Exercise Response	253

	Effects of Exercise Training	254
	Recommendations for Exercise Testing	254
	Recommendations for Exercise Programming	255
	Integration Into a Medical Home Model	257
	Take-Home Message	257
	Suggested Readings	258
	Additional Resources	258
Chapter 27	Cerebral Palsy	259
	<i>Désirée B. Maltais</i>	
	Basic Pathophysiology	259
	Management and Medications	259
	Effects on the Exercise Response	260
	Effects of Exercise Training	261
	Recommendations for Exercise Testing	261
	Recommendations for Exercise Programming	263
	Integration Into a Medical Home Model	264
	Take-Home Message	265
	Suggested Readings	265
	Additional Resources	266
Chapter 28	Multiple Sclerosis	267
	<i>Tara Patterson and Jill Seale</i>	
	Basic Pathophysiology	267
	Management and Medications	267
	Effects on the Exercise Response	270
	Effects of Exercise Training	270
	Recommendations for Exercise Testing	270
	Recommendations for Exercise Programming	271
	Integration Into a Medical Home Model	271
	Take-Home Message	271
	Suggested Readings	272
	Additional Resource	272
Chapter 29	Parkinson's Disease	273
	<i>Elizabeth J. Protas and Rhonda K. Stanley</i>	
	Basic Pathophysiology	273
	Management and Medications	274
	Effects on the Exercise Response	276
	Effects of Exercise Training	276
	Recommendations for Exercise Testing	277
	Recommendations for Exercise Programming	278
	Integration Into a Medical Home Model	279
	Take-Home Message	279
	Suggested Readings	279
	Additional Resources	280

Chapter 30 Muscular Dystrophy 281

Janke de Groot and Bart Bartels

- Basic Pathophysiology 281
- Management and Medications 282
- Effects on the Exercise Response 282
- Effects of Exercise Training 282
- Recommendations for Exercise Testing 282
- Recommendations for Exercise Programming 283
- Integration Into a Medical Home Model 283
- Take-Home Message 284
- Suggested Readings 284
- Additional Resources 284

Part VII

Cognitive and Psychological Disorders 285

Bradley D. Hatfield

Chapter 31 Dementia and Alzheimer's Disease 287

Jessica S. Oldham, Jo B. Zimmerman, and Bradley D. Hatfield

- Basic Pathophysiology 287
- Management and Medications 288
- Effects on the Exercise Response 289
- Effects of Exercise Training 289
- Recommendations for Exercise Testing 290
- Recommendations for Exercise Programming 291
- Integration Into a Medical Home Model 291
- Take-Home Message 292
- Suggested Readings 292
- Additional Resources 292

Chapter 32 Depression and Anxiety Disorders 293

Jessica S. Oldham, Jo B. Zimmerman, and Bradley D. Hatfield

- Basic Pathophysiology 293
- Management and Medications 295
- Effects on the Exercise Response 296
- Effects of Exercise Training 297
- Recommendations for Exercise Testing 298
- Recommendations for Exercise Programming 298
- Integration Into a Medical Home Model 298
- Take-Home Message 299
- Suggested Readings 299
- Additional Resources 300

Part VIII Case Studies 301

Geoffrey E. Moore

Abdominal Aortic Aneurysm	303	Heart Transplant	332
Amyotrophic Lateral Sclerosis	304	Human Immunodeficiency Virus	334
Asthma	306	Hypertension, Dyslipidemia, and Obesity	335
Atrial Fibrillation	307	Interstitial Lung Disease (Chronic Restrictive Lung Disease)	336
Becker Muscular Dystrophy	309	Major Depressive Disorder	338
Breast Cancer Survivor	310	Multiple Sclerosis	339
Cerebral Palsy	312	Myasthenia Gravis	342
Chronic Fatigue Syndrome	313	Myocardial Infarction	344
Chronic Heart Failure With Mild COPD	315	Parkinson's Disease	346
Chronic Kidney Disease: Stage 4, Renal Insufficiency	316	Peripheral Artery Disease	348
Chronic Kidney Disease: Stage 5, Treated With Hemodialysis	318	Pulmonary Hypertension	349
Chronic Kidney Disease: Status/Post-Renal Transplantation	319	Refractory Angina	350
Chronic Obstructive Pulmonary Disease	321	Spinal Cord Injury	352
Coronary Artery Disease and Dyslipidemia, Status/Post-Angioplasty With Stent Placement	322	Stroke	354
Cystic Fibrosis	324	Type 2 Diabetes and Disability From Morbid Obesity With Multiple Chronic Conditions	356
Deep Venous Thrombosis	326	Type 2 Diabetes and Obesity With Osteoarthritis	358
Dementia and Frailty	328	Valvular Heart Disease	360
Fibromyalgia	329	Visual Impairment	361
Hearing Impairment	330		

Appendix A Common Medications 363

Appendix B Basic CDD4 Recommendations 379
