Preface .....	xiii
---------------	------

## Part 1

### I Hilbert Spaces

1 Linear Spaces .....	1
2 Hermitian Forms .....	3
3 Hilbert Spaces .....	6
4 Projections .....	9
5 Continuous Linear Functionals .....	12
6 Orthonormal Sets .....	13
7 Isometric Hilbert Spaces .....	15

### II Bounded Linear Operators on a Hilbert Space

1 Bounded Linear Operators .....	17
2 The Adjoint Operator .....	19
3 Projections .....	21
4 Some Spectral Theorems .....	23
5 Operator Convergence .....	28
6 The Spectral Resolution of a Bounded Self-Adjoint Operator .....	33
7 The Spectral Resolution of Bounded Normal and Unitary Operators .....	37
7.1 Normal Operators .....	37
7.1 Unitary Operators .....	39

### III Unbounded Linear Operators on a Hilbert Space

1 Unbounded Linear Operators .....	41
2 The Graph of an Operator .....	42
3 Symmetric and Self-Adjoint Operators .....	44
4 The Spectral Resolution of an Unbounded Self-Adjoint Operator .....	46

**Part 2****IV Regular Linear Hamiltonian Systems**

1	The Representation of Scalar Problems .....	51
2	Dirac Systems .....	54
3	$S$ -Hermitian Systems .....	56
4	Regular Linear Hamiltonian Systems .....	57
5	The Spectral Resolution of a Regular Linear Hamiltonian Operator .....	64
6	Examples .....	70

**V Atkinson's Theory for Singular Hamiltonian Systems  
of Even Dimension**

1	Singular Hamiltonian Systems .....	74
2	Existence of Solutions in $L^2_{\mathcal{A}}(a, b)$ .....	75
3	Boundary Conditions .....	79
4	A Preliminary Greens Formula .....	81

**VI The Niessen Approach to Singular Hamiltonian Systems**

1	Boundary Values of Hermitian Forms .....	88
2	The Eigenvalues of $\mathcal{A}(x)$ .....	91
3	Generalization of the Second Weyl Theorem .....	92
4	Singular Boundary Value Problems .....	94
5	The Green's Function .....	95
6	Self-Adjointness .....	97
7	Modification of the Boundary Conditions .....	100
8	Other Boundary Conditions .....	102
9	The Limit Point Case .....	102
10	The Limit $m$ Case .....	103
11	The Limit Circle Case .....	104
12	Comments Concerning the Spectral Resolution .....	106

**VII Hinton and Shaw's Extension of Weyl's  $M(\lambda)$  Theory to Systems**

1	Notations and Definitions .....	107
2	The $M(\lambda)$ Matrix .....	109
3	$M$ Circles .....	111
4	Square Integrable Solutions .....	115
5	Singular Boundary Conditions .....	117
6	The Differential Operator $L$ .....	118
7	Extension of the Boundary Conditions .....	122
8	The Extended Green's Formula with One Singular Point .....	125

9 Self-Adjoint Boundary Value Problems with Mixed Boundary Conditions ..... 131

10 Examples ..... 132

**VIII Hinton and Shaw’s Extension with Two Singular Points**

1  $M(\lambda)$  Functions, Limit Circles,  $L^2$  Solutions ..... 138

2 The Differential Operator ..... 141

3 The Resolvent, The Green’s Function ..... 142

4 Parameter Independence of the Domain ..... 144

5 The Extended Green’s Formula with Two Singular Points ..... 145

6 Examples ..... 148

6.1 The Jacobi Boundary Value Problem ..... 149

6.2 The Legendre Boundary Value Problem ..... 150

6.3 The Tchebycheff Problem of the First Kind ..... 150

6.4 The Tchebycheff Problem of the Second Kind ..... 151

6.5 The Generalized Laguerre Boundary Value Problem ..... 152

6.6 The Ordinary Laguerre Boundary Value Problem ..... 152

6.7 The Hermite Boundary Value Problem ..... 152

6.8 Bessel Functions ..... 153

6.9 The Legendre Squared Problem ..... 154

6.10 The Laguerre-Type Problem ..... 155

**IX The  $M(\lambda)$  Surface**

1 The Connection Between the Hinton-Shaw and Niessen Approaches ..... 159

2 A Direct Approach to the  $M(\lambda)$  Surface ..... 162

3 Examples ..... 164

**X The Spectral Resolution for Linear Hamiltonian Systems with One Singular Point**

1 The Specific Problem ..... 167

2 The Spectral Expansion ..... 168

3 The Converse Problem ..... 176

4 The Relation Between  $M(\lambda)$  and  $P(\lambda)$  ..... 181

5 The Spectral Resolution ..... 182

6 An Example ..... 184

7 Subspace Expansions ..... 185

8 Remarks ..... 187

## XI The Spectral Resolution for Linear Hamiltonian Systems with Two Singular Points

1	The Specific Problem .....	189
2	The Spectral Expansion .....	190
3	The Converse Problem .....	199
4	The Relation Between $M_a$ , $M_b$ , and $P(\lambda)$ .....	203
5	The Spectral Resolution .....	205

## XII Distributions

1	Test Functions with Compact Support, $D$ ; Distributions Without Constraint, $D'$ .....	207
2	Limits of Distributions .....	211
3	Test Functions of Rapid Decay, $S$ ; Distributions of Slow Growth, $S'$ .....	212
4	Test Functions of Slow Growth, $P$ ; Distributions of Rapid Decay, $P'$ .....	213
5	Test Functions Without Constants, $E$ ; Distributions of Compact Support, $E'$ .....	214
6	Distributional Differential Equations .....	215

## Part 3

### XIII Orthogonal Polynomials

1	Basic Properties of Orthogonal Polynomials .....	223
2	Orthogonal Polynomials, Differential Equations, Symmetry Factors and Moments .....	226

### XIV Orthogonal Polynomials Satisfying Second Order Differential Equations

1	The General Theory .....	237
2	The Jacobi Polynomials .....	239
3	The Legendre Polynomials .....	243
4	The Generalized Laguerre Polynomials .....	245
5	The Hermite Polynomials .....	249
6	The Generalized Hermite Polynomials .....	252
	6.1 The Generalized Hermite Polynomials of Even Degree .....	253
	6.2 The Generalized Hermite Polynomials of Odd Degree .....	255
7	The Bessel Polynomials .....	257

**XV Orthogonal Polynomials Satisfying Fourth Order**

**Differential Equations**

1	The General Theory .....	261
2	The Jacobi Polynomials .....	262
3	The Generalized Laguerre Polynomials .....	264
4	The Hermite Polynomials .....	265
5	The Legendre-Type Polynomials .....	265
6	The Laguerre-Type Polynomials .....	270
7	The Jacobi-Type Polynomials .....	274

**XVI Orthogonal Polynomials Satisfying Sixth Order**

**Differential Equations**

1	The H.L. Krall Polynomials .....	281
2	The Littlejohn Polynomials .....	287
3	The Second Littlejohn Polynomials .....	289
4	Koekoek's Generalized Jacobi Type Polynomials .....	290

**XVII Orthogonal Polynomials Satisfying Higher Order**

**Differential Equations**

1	The Generalized Jacobi-Type Polynomials .....	291
2	The Generalized Laguerre-Type Polynomials $\{L_n^{\alpha M}(x)\}_{n=0}^{\infty}$ .....	295
3	The Generalized Laguerre-Type Polynomials $\{L_n^{2(1/R)}(x)\}_{n=0}^{\infty}$ .....	296

**XVIII Differential Operators in Sobolev Spaces**

1	Regular Second Order Sobolev Boundary Value Problems .....	302
2	Regular Sobolev Boundary Value Problems for Linear Hamiltonian Systems .....	307
3	Singular Second Order Sobolev Boundary Value Problems .....	312

**XIX Examples of Sobolev Differential Operators**

1	Regular Second Order Operators .....	327
2	Regular Hamiltonian Systems .....	328
3	Singular Second Order Sobolev Boundary Value Problems .....	330
3.1	The Laplacian Operators .....	330
3.2	The Bessel Operators .....	331
3.3	The Jacobi Operator .....	333
3.4	The Generalized Laguerre Operator .....	334
3.5	The Hermite Operator .....	336
3.6	The Generalized Even Hermite Operator .....	336
3.7	The Generalized Odd Hermite Operator .....	336

**XX The Legendre-Type Polynomials and the Laguerre-Type  
Polynomials in a Sobolev Space**

1	The Legendre-Type Polynomials .....	339
2	The Laguerre-Type Polynomials .....	340
3	Remarks .....	341
<b>Closing Remarks .....</b>		<b>343</b>
<b>Index .....</b>		<b>345</b>
