Preface	vii
<b>On Streams and Coinduction</b>	<b>1</b>
Preface	3
Acknowledgments	5
Chapter 1. Streams and Coinduction	7
1.1. Streams	7
1.2. Proofs by Coinduction	7
1.3. Definitions by Coinduction	9
1.4. Examples of Coinductive Proofs	11
1.5. Coinduction and Greatest Fixed Points	12
1.6. Other Coalgebras	13
1.7. Discussion	14
Chapter 2. Stream Calculus	15
2.1. Behavioural Differential Equations	15
2.2. Basic Stream Calculus	17
2.3. Coinduction-Up-To	21
2.4. Basic Properties	22
2.5. Infinite Sum	23
2.6. Solving Behavioural Differential Equations	25
2.7. Solving Difference Equations	28
2.8. Streams and Weighted Automata	30
2.9. Rational Streams	32
2.10. Streams and Languages	33
2.11. Discussion	34
Chapter 3. Analytical Differential Equations	37
3.1. Shuffle Product and Shuffle Inverse	37
3.2. Stream Exponentiation	39
3.3. Comparing Convolution and Shuffle Product	40
3.4. Solving Analytical Differential Equations	44
3.5. Discussion	48
Chapter 4. Coinductive Counting	51
4.1. Introduction	51
4.2. Compositions of Natural Numbers	52
4.3. Surjections	54

4.4. Counting with Probabilities	56
4.5. Well-Bracketed Words	56
4.6. Streams and Continued Fractions	58
4.7. More on Well-Bracketed Words	59
4.8. Permutations	60
4.9. Set Partitions	67
4.10. Special Numbers	69
4.11. Discussion	69
<b>Chapter 5. Component Connectors</b>	<b>73</b>
5.1. Introduction	73
5.2. Timed Data Streams	74
5.3. Basic Connectors: Channels	75
5.4. More Channels and the Merge Connector	77
5.5. Composing Connectors	78
5.6. Connector Equivalence	82
5.7. Protocol Verification	84
5.8. Discussion	86
<b>Appendix A. Key Differential Equations</b>	<b>89</b>
<b>Bibliography</b>	<b>91</b>
<b>Modelling and Verification of Probabilistic Systems</b>	<b>93</b>
<b>Preface</b>	<b>95</b>
Acknowledgements	95
<b>Chapter 1. Introduction</b>	<b>97</b>
1.1. Motivation	98
1.2. The models	99
1.3. Properties of Interest	100
1.4. Probabilistic Model Checking and Other Analysis Methods	100
<b>Chapter 2. Discrete-Time Markov Chains</b>	<b>101</b>
2.1. Introduction	101
2.2. Paths and Probability Measures	103
2.3. Probabilistic Computation Tree Logic (PCTL)	104
2.4. PCTL Model Checking	106
2.5. Case Study: The IPv4 ZeroConf Protocol	112
2.6. Discussion	115
<b>Chapter 3. Markov Decision Processes</b>	<b>117</b>
3.1. Introduction	117
3.2. Paths and Probability Measures	118
3.3. Probabilistic Computation Tree Logic (PCTL)	120
3.4. PCTL Model Checking	122
3.5. Fairness	129
3.6. Case Study: Self-Stabilisation Algorithms	132
3.7. Discussion	135

Chapter 4. Continuous-Time Markov Chains	137
4.1. Introduction	137
4.2. Paths and Probability Measures	139
4.3. Steady-State and Transient Behaviour	140
4.4. Continuous Stochastic Logic (CSL)	141
4.5. CSL Model Checking	142
4.6. Complexity of CSL Model Checking	148
4.7. Case Study: Dynamic Power Management	148
4.8. Discussion	153
Chapter 5. Probabilistic Timed Automata	155
5.1. Time, Clocks and Zones	155
5.2. Syntax of Probabilistic Timed Automata	156
5.3. Parallel Composition	158
5.4. Semantics of Probabilistic Timed Automata	158
5.5. Probabilistic Timed Computation Tree Logic (PTCTL)	162
5.6. Model Checking: The Region Graph Approach	164
5.7. Model Checking: The Digital Clocks Approach	169
5.8. Case Study: IEEE 1394 FireWire Root Contention	175
5.9. Discussion	180
Chapter 6. Implementation	181
6.1. Introduction	181
6.2. Sparse Matrices	182
6.3. Multi-Terminal Binary Decision Diagrams	185
6.4. Model Representation with MTBDDs	191
6.5. MTBDD-Based Model Checking	194
6.6. Discussion	200
Appendix A. Measure Theory and Probability	203
Appendix B. Iterative Solution Methods	205
B.1. The Jacobi Method	206
B.2. The Gauss–Seidel Method	206
B.3. Over-Relaxation Methods	207
Bibliography	209
