## **Chapter XI.** Integral Equations

Introduction	33
Part A. Solution Methods Using Analytic Functions and Sectionally Analytic Functions	38
Introduction $\ldots$	38
§ 1. The Wiener-Hopf Method	38
Introduction. Wiener-Hopf Equations	38
1. The Wiener-Hopf Method	39
2. Decomposition of an Analytic Function Defined in a Strip	
in the Complex Plane	42
3. Factorisation of an Analytic Function Defined in a Strip	
in the Complex Plane	43
4. Application to the Wiener-Hopf Integral Equation	
of the Second Kind	45
5. Application to the Milne Problem	47
6. Application to the Dock Problem	53
