INTRODUCTION

1	Science and Humanism in Educational Practice	3
	Humanism in Education	4
	Science and the Problem of Dehumanization	8
	Science as a Tool for the Achievement of Humanistic Goals	10

PART I DEVELOPMENT

2	Developmental Psychology: Focus on the Individual	15
	Basic Concepts in Developmental Psychology	16
	Early Developmental Psychology	18
	Contemporary Developmental Psychology	29
3	The Development of Intelligence	51
	The Psychometric View of Intelligence	52
	Multiple-Ability Theories of Intelligence	72
	Piaget's Developmental Theory of Intelligence	77
4	The Development of Creativity	99

	The Creative Product	100
	The Creative Process	105
	The Determinants of the Development of Creativity	114
	Creativity and Instruction	120
5	Social Development	131
	Theories of Social Development	132
	Sources of Social Development	141
PART II	LEARNING AND MOTIVATION	167
6	Learning and Motivation: Focus on the Environment	171
	Basic Concepts in Learning and Motivation	172
	Foundations of the Psychology of Learning and Motivation	174
	Schools of Thought in the Twentieth Century	180
	Learning, Motivation and Instructional Goals	194
7	Behavior Modification	201
	Behavior Modification and Humanistic Instruction	203
	Describing Behavior Change	205
	Acquisition	208
	Acquisition through Observation	229
	Acquisition of Discriminations	238
	Acquisition Based on Response-Class Control	245
	Extinction	247
	Punishment	255
	Alternative Approaches to Reducing Response Strength	262
	Behavior Modification and Learning Complexity	263
8	Verbal Learning and Memory	267
	Verbal Learning	268
	Memory	279
	Verbal Processes and Intelligence	295
9	Rule Learning	301
	Concepts: Classification Rules	302
	Theories of Concept Learning	304
	The Conditions of Concept Learning	308
	Learning Language Rules	312
	Problem Solving: Teaching Students How to Discover Rules	320
	Rule Learning and Intellectual Development	322

10	Intellectual Skills	327
	The Emerging Concept of Intellectual Skills	330
	Existing Conceptualizations of Intellectual Skills	331
	Abilities, Skills, and Instruction	343
PART III	THE PSYCHOLOGY OF INSTRUCTION	345
11	Evaluation: Science in Instruction	349
	Evaluation Defined	350
	Types of Evaluation	352
	Establishing Objectives for Instruction	352
	Measuring Learner Performance	372
	Standards for Judging Test Performance	387
	The Quality of Educational Tests	396
	Evaluating the Effectiveness of Instructional Procedures	400
	Science as a Tool for Instructional Problem Solving	409
12	The Instructional Process	415
	Historical Antecedents of Contemporary Instructional Practice	416
	Contemporary Views on Instruction	419
	Analytic Instruction: A Systems Approach to Educational Problem Solving	426
13	Individualized Education	463
	Basic Concepts in Individualized Instruction	465
	Models Aimed at Reducing Individual Differences	470
	Humanistic Approaches to Individualization	473
	Structured-Curriculum Models	476
	The Systems Approach to Individualization	485
	Choosing a Strategy for Individualization	505
	Individualization and the Goals of Instruction	505
	References	511
	Index	529
