

Table of Contents

Keynote I

A Process Toward Total Dependability - Airbus Fly-by-Wire Paradigm <i>Pascal Traverse, Isabelle Lacaze, Jean Souyris</i>	1
---	---

Session 1A: Distributed Algorithms

Building and Using Quorums Despite Any Number of Process of Crashes <i>Roy Friedman, Achour Mostefaoui, Michel Raynal</i>	2
Failure Detection with Booting in Partially Synchronous Systems <i>Josef Widder, Gérard Le Lann, Ulrich Schmid</i>	20
Total Order Communications: A Practical Analysis <i>Roberto Baldoni, Stefano Cimmino, Carlo Marchetti</i>	38
Gracefully Degrading Fair Exchange with Security Modules <i>Gildas Avoine, Felix Gärtner, Rachid Guerraoui, Marko Vukolić</i>	55

Session 1B: Fault Tolerant Design and Protocols

Adding Fault-Tolerance Using Pre-synthesized Components <i>Sandeep S. Kulkarni, Ali Ebnenasir</i>	72
Efficiency of Dynamic Arbitration in TDMA Protocols <i>Jens Chr. Lisner</i>	91
An Architectural Framework for Detecting Process Hangs/Crashes <i>Nithin Nakka, Giacinto Paolo Saggese, Zbigniew Kalbarczyk, Ravishankar K. Iyer</i>	103
Energy Efficient Configuration for QoS in Reliable Parallel Servers <i>Dakai Zhu, Rami Melhem, Daniel Mossé</i>	122

Session 2A: Practical Experience Reports and Tools I

Novel Generic Middleware Building Blocks for Dependable Modular Avionics Systems <i>Christophe Honvault, Marc Le Roy, Pascal Gula, Jean Charles Fabre, Gérard Le Lann, Eric Bornschlegl</i>	140
--	-----

Integrating Fault Tolerance and Load Balancing in Distributed Systems
Based on CORBA
A.V. Singh, L.E. Moser, P.M. Melliar-Smith 154

Performance Evaluation of Consistent Recovery Protocols Using
MPICH-GF
*Namyoon Woo, Hyungsoo Jung, Dongin Shin, Hyuck Han,
Heon Y. Yeom, Taesoon Park* 167

Session 2B: Assessment and Analysis

An Approach to Experimentally Obtain Service Dependability
Characteristics of the Jgroup/ARM System
Bjarne E. Helvik, Hein Meling, Alberto Montresor 179

The Effectiveness of Choice of Programming Language as a Diversity
Seeking Decision
Meine J.P. van der Meulen, Miguel Revilla 199

Formal Safety Analysis of a Radio-Based Railroad Crossing Using
Deductive Cause-Consequence Analysis (DCCA)
Frank Ortmeier, Wolfgang Reif, Gerhard Schellhorn 210

Panel

Dependability Challenges and Education Perspectives
Henrique Madeira 225

Keynote II

Availability in Industry and Science - A Business Perspective
Manfred ReitenSPIeß 226

Session 3A: Measurement

Fast Run-Time Reconfiguration for SEU Injection
David de Andrés, José Albaladejo, Lenin Lemus, Pedro Gil 230

Assembly-Level Pre-injection Analysis for Improving Fault Injection
Efficiency
Raul Barbosa, Jonny Vinter, Peter Folkesson, Johan Karlsson 246

A Data Mining Approach to Identify Key Factors in Dependability Experiments <i>Gergely Pintér, Henrique Madeira, Marco Vieira, István Majzik, András Pataricza</i>	263
---	-----

Session 3B: Practical Experience Reports and Tools II

PathCrawler: Automatic Generation of Path Tests by Combining Static and Dynamic Analysis <i>Nicky Williams, Bruno Marre, Patricia Mouy, Muriel Roger</i>	281
---	-----

A New Methodology and Tool Set to Execute Software Test on Real-Time Safety-Critical Systems <i>Caiazza Alessandro, Di Maio Roberto, Scalabrini Fernando, Poli Fabio, Impagliazzo Leonardo, Amendola Arturo</i>	293
--	-----

A Grey-Box Approach to the Functional Testing of Complex Automatic Train Protection Systems <i>De Nicola Giuseppe, di Tommaso Pasquale, Esposito Rosaria, Flammini Francesco, Marmo Pietro, Orazio Antonio</i>	305
---	-----

Session 4A: Hardware Verification

Deterministic Test Vector Compression/Decompression Using an Embedded Processor <i>Maciej Bellos, Dimitris Nikolos</i>	318
---	-----

Efficient Single-Pattern Fault Simulation on Structurally Synthesized BDDs <i>Jaan Raik, Raimund Ubar, Sergei Devadze, Artur Jutman</i>	332
--	-----

Session 4B: Fast Abstracts I

Session 5A: Dependable Networking

Structure-Based Resilience Metrics for Service-Oriented Networks <i>Daniel J. Rosenkrantz, Sanjay Goel, S.S. Ravi, Jagdish Gangolly</i>	345
---	-----

Efficient Protection of Many-to-One Communications <i>Miklós Molnár, Alexandre Guitton, Bernard Cousin, Raymond Marie</i>	363
--	-----

Session 5B: Fast Abstracts II

Session 6A: Practical Experience Reports and Tools III

Impact of Faults in Combinational Logic of Commercial Microcontrollers
D. Gil, J. Gracia, J.C. Baraza, P.J. Gil 379

Implementation of a Testing and Diagnostic Concept for an NPP
Reactor Protection System
*Tamás Bartha, István Varga, Alexandros Soumelidis,
Géza Szabó* 391

COMPAS - Compressed Test Pattern Sequencer for Scan Based Circuits
Ondřej Novák, Jiří Zahrádka, Zdeněk Pláva 403

Session 6B: Reliability Engineering and Testing

Fault Links: Exploring the Relationship Between Module and Fault
Types
*Jane Huffman Hayes, Inies Raphael C.M., Vinod Kumar Surisetty,
Anneliese Andrews* 415

Model-Based Identification of Fault-Prone Components
Stefan Wagner, Jan Jürjens 435

Regression Test Selection for Testable Classes
Eliane Martins, Vanessa Gindri Vieira 453

Author Index 471
