Contents

Preface xi

1 Elementary Topics 1
- 1.1 Arithmetic 2
- 1.2 Computation 4
- 1.3 Algebra 7
- 1.4 Geometry 9
- 1.5 Calculus 13
- 1.6 Combinatorics 16
- 1.7 Probability 20
- 1.8 Logic 22
- 1.9 Historical Remarks 25
- 1.10 Philosophical Remarks 32

2 Arithmetic 35
- 2.1 The Euclidean Algorithm 36
- 2.2 Continued Fractions 38
- 2.3 Prime Numbers 40
- 2.4 Finite Arithmetic 44
- 2.5 Quadratic Integers 46
- 2.6 The Gaussian Integers 49
- 2.7 Euler's Proof Revisited 54
- 2.8 $\sqrt{2}$ and the Pell Equation 57
- 2.9 Historical Remarks 60
- 2.10 Philosophical Remarks 67

3 Computation 73
- 3.1 Numerals 74
- 3.2 Addition 77
- 3.3 Multiplication 79
- 3.4 Division 82
- 3.5 Exponentiation 84

Stillwell, John
Elements of mathematics

digitalisiert durch:

3.6 P and NP Problems 87
3.7 Turing Machines 90
3.8 *Unsolvable Problems 94
3.9 *Universal Machines 97
3.10 Historical Remarks 98
3.11 Philosophical Remarks 103

4 Algebra 106
4.1 Classical Algebra 107
4.2 Rings 112
4.3 Fields 117
4.4 Two Theorems Involving Inverses 120
4.5 Vector Spaces 123
4.6 Linear Dependence, Basis, and Dimension 126
4.7 Rings of Polynomials 128
4.8 Algebraic Number Fields 133
4.9 Number Fields as Vector Spaces 136
4.10 Historical Remarks 139
4.11 Philosophical Remarks 143

5 Geometry 148
5.1 Numbers and Geometry 149
5.2 Euclid's Theory of Angles 150
5.3 Euclid's Theory of Area 153
5.4 Straightedge and Compass Constructions 159
5.5 Geometric Realization of Algebraic Operations 161
5.6 Algebraic Realization of Geometric Constructions 164
5.7 Vector Space Geometry 168
5.8 Introducing Length via the Inner Product 171
5.9 Constructible Number Fields 175
5.10 Historical Remarks 177
5.11 Philosophical Remarks 184

6 Calculus 193
6.1 Geometric Series 194
6.2 Tangents and Differentiation 197

6.3 Calculating Derivatives 202
6.4 Curved Areas 208
6.5 The Area under $y = x^n$ 211
6.6 *The Fundamental Theorem of Calculus 214
6.7 Power Series for the Logarithm 218
6.8 *The Inverse Tangent Function and π 226
6.9 Elementary Functions 229
6.10 Historical Remarks 233
6.11 Philosophical Remarks 239

7 Combinatorics 243
7.1 The Infinitude of Primes 244
7.2 Binomial Coefficients and Fermat's Little Theorem 245
7.3 Generating Functions 246
7.4 Graph Theory 250
7.5 Trees 252
7.6 Planar Graphs 254
7.7 The Euler Polyhedron Formula 256
7.8 Nonplanar Graphs 263
7.9 *The Kőnig Infinity Lemma 264
7.10 Sperner's Lemma 268
7.11 Historical Remarks 272
7.12 Philosophical Remarks 274

8 Probability 279
8.1 Probability and Combinatorics 280
8.2 Gambler's Ruin 282
8.3 Random Walk 284
8.4 Mean, Variance, and Standard Deviation 286
8.5 *The Bell Curve 290
8.6 Historical Remarks 292
8.7 Philosophical Remarks 296

9 Logic 298
9.1 Propositional Logic 299
9.2 Tautologies, Identities, and Satisfiability 302

9.3 Properties, Relations, and Quantifiers 304
9.4 Induction 307
9.5 *Peano Arithmetic 311
9.6 *The Real Numbers 315
9.7 *Infinity 320
9.8 *Set Theory 324
9.9 *Reverse Mathematics 327
9.10 Historical Remarks 330
9.11 Philosophical Remarks 333

10 Some Advanced Mathematics 336
10.1 Arithmetic: the Pell Equation 337
10.2 Computation: the Word Problem 344
10.3 Algebra: the Fundamental Theorem 349
10.4 Geometry: the Projective Line 354
10.5 Calculus: Wallis's Product for π 360
10.6 Combinatorics: Ramsey Theory 365
10.7 Probability: de Moivre's Distribution 369
10.8 Logic: the Completeness Theorem 376
10.9 Historical and Philosophical Remarks 381
