List of Figures	xvii
List of Tables	xxiii
1. Introduction	1
1.1 Introduction to Requirements	1
1.2 Introduction to Systems Engineering	4
1.3 Requirements and Quality	7
1.4 Requirements and the Lifecycle	8
1.5 Requirements Traceability	11
1.6 Requirements and Modelling	15
1.7 Requirements and Testing	17
1.8 Requirements in the Problem and Solution Domains	18
1.9 How to Read This Book	21
2. A Generic Process for Requirements Engineering	23
2.1 Introduction	23
2.2 Developing Systems	23
2.3 Generic Process Context	26
2.3.1 Input Requirements and Derived Requirements ..	27
2.3.2 Acceptance Criteria and Qualification Strategy ..	28
2.4 Generic Process Introduction	30
2.4.1 Ideal Development	30
2.4.2 Development in the Context of Change	31
2.5 Generic Process Information Model	32
2.5.1 Information Classes	33
2.5.2 Agreement State	35
2.5.3 Qualification State	36
2.5.4 Satisfaction State	37
2.5.5 Information Model Constraints	37
2.6 Generic Process Details	38
2.6.1 Agreement Process	38
2.6.2 Analyze and Model	40
2.6.3 Derive Requirements and Qualification Strategy ..	42
2.7 Summary	45

3.	System Modelling for Requirements Engineering	47
3.1	Introduction	47
3.2	Representations for Requirements Engineering	47
3.2.1	Data Flow Diagrams	47
3.2.2	Entity Relationship Diagrams	54
3.2.3	State Transition Diagrams	55
3.2.4	Statecharts	56
3.2.5	Object-oriented Approaches	57
3.3	Representations and Information	60
3.4	Methods	61
3.4.1	What Is in a Method?	61
3.4.2	Structured Methods	61
3.4.3	Object-oriented Methods	66
3.4.4	Formal Methods	71
3.5	Summary	73
4.	Writing and Reviewing Requirements	75
4.1	Introduction	75
4.2	Requirements for Requirements	76
4.3	Structuring Requirements Documents	77
4.4	Key Requirements	79
4.5	Using Attributes	79
4.6	Ensuring Consistency Across Requirements	80
4.7	Value of a Requirement	82
4.8	The Language of Requirements	83
4.9	Requirement Boilerplates	85
4.10	Granularity of Requirements	87
4.11	Criteria for Writing Requirements Statements	89
4.12	Summary	91
5.	Requirements Engineering in the Problem Domain	93
5.1	What Is the Problem Domain?	93
5.2	Instantiating the Generic Process	95
5.3	Agree Requirements with Customer	96
5.4	Analyze and Model	96
5.4.1	Identify Stakeholders	96
5.4.2	Create Use Scenarios	99
5.4.3	Scoping the System	102
5.5	Derive Requirements	103
5.5.1	Define Structure	104
5.5.2	Capture Requirements	107
5.6	Derive Qualification Strategy	114
5.6.1	Define Acceptance Criteria	114
5.6.2	Define Qualification Strategy	115
5.7	Summary	116

6.	Requirements Engineering in the Solution Domain	117
6.1	What Is the Solution Domain?	117
6.2	Engineering Requirements from Stakeholder Requirements to System Requirements	119
6.2.1	Producing the System Model	120
6.2.2	Creating System Models to Derive System Requirements	120
6.2.3	Banking Example	126
6.2.4	Car Example	129
6.2.5	Deriving Requirements from a System Model ...	134
6.2.6	Agreeing the System Requirements with the Design Team	136
6.3	Engineering Requirements from System Requirements to Subsystems	136
6.3.1	Creating a System Architecture Model	137
6.3.2	Deriving Requirements from an Architectural Design Model	138
6.4	Other Transformations Using a Design Architecture	139
6.5	Summary	140
7.	Advanced Traceability	141
7.1	Introduction	141
7.2	Elementary Traceability	141
7.3	Satisfaction Arguments	143
7.4	Requirements Allocation	148
7.5	Reviewing Traceability	148
7.6	The Language of Satisfaction Arguments	149
7.7	Rich Traceability Analysis	150
7.8	Rich Traceability for Qualification	151
7.9	Implementing Rich Traceability	151
7.9.1	Single-layer Rich Traceability	151
7.9.2	Multi-layer Rich Traceability	151
7.10	Metrics for Traceability	152
7.10.1	Breadth	153
7.10.2	Depth	153
7.10.3	Growth	153
7.10.4	Balance	155
7.10.5	Latent Change	156
7.11	Summary	158
Chapter 8	Management Aspects of Requirements Engineering	161
8.1	Introduction to Management	161
8.2	Requirements Management Problems	163
8.2.1	Summary of Requirement Management Problems	164

8.3	Managing Requirements in an Acquisition Organization	165
8.3.1	Planning	165
8.3.2	Monitoring	168
8.3.3	Changes	168
8.4	Supplier Organizations	170
8.4.1	Bid Management	171
8.4.2	Development	175
8.5	Product Organizations	178
8.5.1	Planning	178
8.5.2	Monitoring	182
8.5.3	Changes	183
8.6	Summary	184
8.6.1	Planning	184
8.6.2	Monitoring	184
8.6.3	Changes	185
9.	DOORS: A Tool to Manage Requirements	187
9.1	Introduction	187
9.2	The Case for Requirements Management	187
9.3	DOORS Architecture	188
9.4	Projects, Modules and Objects	189
9.4.1	DOORS Database Window	189
9.4.2	Formal Modules	189
9.4.3	Objects	192
9.4.4	Pictures	195
9.4.5	Tables	196
9.5	History and Version Control	196
9.5.1	History	196
9.5.2	Baselining	197
9.6	Attributes and Views	198
9.6.1	Attributes	198
9.6.2	Views	199
9.7	Traceability	199
9.7.1	Links	199
9.7.2	Traceability Reports	200
9.8	Import and Export	202
9.9	Summary	204
	Bibliography	205
	Index	209
